all the pretty horses trilogy: American Mythologies William Blazek, Michael K. Glenday, 2005-01-01 This challenging new book looks at the current reinvention of American Studies: a reinvention that, among other things, has put the whole issue of just what is 'American' and what is 'American Studies' into contention. The collection focuses, in particular, on American mythology. The editors themselves have written essays that examine the connections between mythologies of the United States and those of either classical European or Native American traditions. William Blazek considers Louise Erdrich's Love Medicine novels as chronicles combining Ojibwa mythology and contemporary U.S. culture in ways that reinvest a sense of mythic identity within a multicultural, postmodern America. Michael K Glenday's analysis of Jayne Anne Phillips' work and explores in it the contexts where myth and dream interact with each other. Betty Louise Bell is one of four essayists in this collection who focus their criticism on authors of Native American heritage. In the first part of 'Indians with Voices', Bell carefully argues that Roy Harvey Pearce's seminal Native American studies text *Savagism and Civilization* fails to acknowledge its white elitist assumptions about what constitutes The American Mind and views Native Americans along a primitive-savage binary that helped to create a twentieth-century 'national mythos of innocence and destiny'. Other essays include Christopher Brookeman's study of the impact of Muhammad Ali on Norman Mailer's non-fiction writing about heavyweight boxing.

all the pretty horses trilogy: The Spaces of Violence James Giles, 2006-04-09 Probes the interrelationship of violence and space in 10 contemporary American novels. James R. Giles examines 10 novels for the unique ways they explore violence and space as interrelated phenomena. These texts are Russell Banks's *Affliction*, Cormac McCarthy's *Outer Dark* and *Child of God*, Lewis Nordan's *Wolf Whistle*, Dorothy Allison's *Bastard Out of Carolina*, Don DeLillo's *End Zone*, Denis Johnson's *Angels*, Sherman Alexie's *Indian Killer*, Robert Stone's *Dog Soldiers*, and Bret Easton Ellis's *American Psycho*. These stories take place in settings as diverse as small towns, college campuses, suburbs, the brokerage houses and luxury apartments of Wall Street, football stadiums, Appalachian hills, and America's no-man's-land of Greyhound bus stations and highways. Violence, Giles finds, is mythological and ritual in many of these novels, whereas it is treated as systemic and naturalistic in others. Giles locates each of the novels he studies on a continuum from the mythological to the naturalistic and argues that they represent a fourthspace at the margins of physical, social, and psychological space, a territory at the cultural borders of the mainstream. These textual spaces are so saturated with violence that they suggest little or no potential for change and affirmation and are as degraded as the physical, social, and mental spaces out of which they emerge. A concluding chapter extends the focus of *The Spaces of Violence* to texts by Jane Smiley, Toni Morrison, Edwidge Danticat, and Chuck Palahniuk, who treat the destructive effects of violence on family structures.

all the pretty horses trilogy: [Religion in Cormac McCarthy's Fiction](#) Manuel Broncano, 2013-11-20 This book addresses the religious scope of Cormac McCarthy's fiction, one of the most controversial issues in studies of his work. Current criticism is divided between those who find a theological dimension in his works, and those who reject such an approach on the grounds that the nihilist discourse characteristic of his narrative is incompatible with any religious message. McCarthy's tendencies toward religious themes have become increasingly more acute, revealing that McCarthy has adopted the biblical language and rhetoric to compose an apocryphal narrative of the American Southwest while exploring the human innate tendency to evil in the line of Herman Melville and William Faulkner, both literary progenitors of the writer. Broncano argues that this apocryphal narrative is written against the background of the Bible, a peculiar Pentateuch in which *Blood Meridian* functions as the Book of Genesis, the *Border Trilogy* functions as the Gospels, and *No Country for Old Men* as the Book of Revelation, while *The Road* is the post-apocalyptic sequel. This book analyzes the novels included in what Broncano defines as the South-Western cycle (from *Blood Meridian* to *The Road*) in search of the religious foundations that support the narrative architecture of the texts.

range from Henry James and Theodore Dreiser to contemporary figures such as Joyce Carol Oates, Thomas Pynchon, and Sherman Alexie, and analyses of key works include *The Great Gatsby*, *Lolita*, *The Color Purple*, and *The Joy Luck Club*, among others. Relevant contexts for these works, such as the impact of Hollywood, the expatriate scene in the 1920s, and the political unrest of the 1960s are also explored, and their importance discussed. This is a stimulating overview of twentieth-century American fiction, offering invaluable guidance and essential information for students and general readers.
