amsco world history questions: Lefty's Journey Ralph DeFalco, 2011-11-22 When Ralph arrived at the row house in the South Bronx, he had to step back as his family made their way up the steps. They started to creak as they carried their luggage, and all that went through his mind was that they would collapse if he also climbed those steps. Where he came from, all the steps were made of either marble or granite. How in the world would these wooden stairs hold up? Ralph had been surrounded by the unpolluted blue Mediterranean that reflected the ever present blue sky. If the temperature became too hot, he cooled off in that blue water to his heart's content. Now, in the bowels of the South Bronx, the only thing that turned blue was his demeanor. His only relief from the stifling summer heat, along with some of the boys from the neighborhood, would be to illegally open a fire hydrant when the police were not around.

amsco world history questions: Issues in American Political Life Robert Thobaben, Charles Funderburk, Donna Schlagheck, 2015-07-02 A core text for undergraduate courses in American Public Policy, or supplemental reading in such courses as Introduction to American Government or Politics, American Public Policy Analysis, Introduction to Political Science. A substantive alternative to typical issues texts-which cover too many issues, too superficially-this intriguing and comprehensive text offers a more in-depth and coherent approach to contemporary policy problems and solutions. It provides a conceptual framework in which students can become comfortable actually doing policy analysis, and in learning skills beyond reading about certain

political issues. Thematically organized, it looks at nine specific issues grouped into three broad categories that hold an enduring importance in American political life—money and politics, violence and politics, and biology and politics. All nine chapters and their respective topics (campaigns, corruption, welfare, crime, terrorism, arms control, the environment, biomedical issues, and biotechnology) have a strong conceptual base with current political dimensions and policy concerns woven throughout. Students not only learn the context, status, and prospects of issues confronting the U.S. government, but also see how these issues now cross our domestic borders into a global realm.
