allied universal corporate: The Vaxxed Shawn A. McCastle, 2022-01-31 A deeply-reported examination of why the COVID-19 vaccine terminations represent a flawed practice by American corporations, driven by the same corporate exploitation that has carried news headlines, pushing more employees into depressed labor. You received sweet talk in the job interview but obtained sour grapes and pink slips for something basic as following through on your constitutional guarantee, your right to make personal decisions about your own bodily integrity. In *The Vaxxed: Culture War in the Workplace*, Shawn A. McCastle, a preeminent voice on business, I-O psychology, inequality, labor, and non-death grief examines the gritty, posterior issues of the COVID-19 pandemic and the mass terminations that rock the United States. Told through the lived experience of McCastle as he shares his own termination and removal from two major organizations, Allied-Universal Security Services and the World Bank Group headquartered in Washington, D.C. McCastle makes comparisons of the COVID-19 pandemic and the AIDS epidemic, showing how society is no better off today than yesterday by terminating the employment of employees who refused to provide their vaccination status or submit to COVID-19 vaccination at all. McCastle shows how ineffective CEOs copied and pasted other corporations' policies and how the lack of corporate creativity, policies, and vision drove one of the most destructive labor practices in American history. McCastle argues, corporations need to develop effective people strategies to minimize disruptions and friction within

the workplace. McCastle also shows how organizations have been propped up by employees, but in crunch time, employees do not receive identical returns.

allied universal corporate: The Ransomware Hunting Team Renee Dudley, Daniel Golden, 2022-10-25 A real-life technological thriller about a band of eccentric misfits taking on the biggest cybersecurity threats of our time. "What Michael Lewis did for baseball in *Moneyball*, Renee Dudley and Daniel Golden do brilliantly for the world of ransomware and hackers. Cinematic, big in scope, and meticulously reported, this book is impossible to put down." —Doug Stanton, *New York Times* bestselling author of *In Harm's Way* and *Horse Soldiers* Scattered across the world, an elite team of code crackers is working tirelessly to thwart the defining cyber scourge of our time. You've probably never heard of them. But if you work for a school, a business, a hospital, or a municipal government, or simply cherish your digital data, you may be painfully familiar with the team's sworn enemy: ransomware. Again and again, an unlikely band of misfits, mostly self-taught and often struggling to make ends meet, have outwitted the underworld of hackers who lock computer networks and demand huge payments in return for the keys. The Ransomware Hunting Team traces the adventures of these unassuming heroes and how they have used their skills to save millions of ransomware victims from paying billions of dollars to criminals. Working tirelessly from bedrooms and back offices, and refusing payment, they've rescued those whom the often hapless FBI has been unwilling or unable to help. Foremost among them is Michael Gillespie, a cancer survivor and cat lover who got his start cracking ransomware while working at a Nerds on Call store in the town of Normal, Illinois. Other teammates include the brilliant, reclusive Fabian Wosar, a high school dropout from Germany who enjoys bantering with the attackers he foils, and his protégé, the British computer science prodigy Sarah White. Together, they have established themselves as the most effective force against an escalating global threat. This book follows them as they put their health, personal relationships, and financial security on the line to navigate the technological and moral challenges of combating digital hostage taking. Urgent, uplifting, and entertaining, Renee Dudley and Daniel Golden's *The Ransomware Hunting Team* is a real-life technological thriller that illuminates a dangerous new era of cybercrime.

allied universal corporate: Legends of the Security Services Industry Keith Oringer, Michael Hymanson, 2024-09-25 The global contract security market now totals over \$200 billion, with the number of private security officers exceeding that of public law enforcement officers. But this wasn't always the case. *Legends of the Security Services Industry: Profiles in Leadership* presents the unique stories of 15 industry legends, who transformed the industry from early private detective and small night watch companies into large-scale contract security companies. The large-scale companies include, but are not limited to, Pinkerton, Burns International, The Wackenhut Corporation, Guardsmark, Wells Fargo, and U.S. Security Associates; as well as today's leading security companies, Allied Universal, Securitas, G4S, Prosegur, and GardaWorld. The book begins in the nineteenth century, with early U.S. legendary detectives: Allan Pinkerton and William Burns. Then, the book focuses largely from the mid-twentieth century to the present, where successive generations of legends built large-scale contract security companies which competed with, and then acquired, those formed by the early legends. Part II legends George Wackenhut, Ira Lipman, and Tom Wathen; Part III legends, Charles Schneider, Kenneth W. Oringer, William Whitmore, Jr., and Albert Berger; and Part IV, Scandinavian legends Jørgen Philip-Sørensen, Lars Nørby Johansen, and Thomas Berglund, all developed major security companies. Part V includes current global security leaders Helena Revoredo Gut, Stephan Crétier, and Steve Jones. Part VI reviews the timelines and successful leadership of these legendary leaders, with a look at the future of the industry. The legends' personal stories contain colorful insight into how they capitalized on the industry's explosive growth. While each generation of legends faced unique social and competitive landscapes, their personal stories illustrate how they respectively succeeded. Their leadership and management prowess enabled them to achieve great success, as they displayed vision and achieved their goals through grit, determination, hard work, charisma, organizational skills, and calculated risk-taking. Each chapter has been extensively researched and includes firsthand accounts based on interviews

with living legends, colleagues, and family of deceased legends. Personal, company and signature event photos add further color to the moving narrative. Their stories are not only highly interesting, but also provide a framework for current leaders, and the next generation of entrepreneurs, on how to build and lead large-scale security service companies. With a Foreword from Robert D. McCrie, PhD, longtime John Jay Professor and editor of the renowned industry publication *The Security Letter*.

allied universal corporate: Disruption in Financial Reporting Krish Bhaskar, John Flower, 2021-01-20 Since the global financial crisis of 2007-8, new laws and regulations have been introduced with the aim of improving the transparency in financial reporting. Despite the dramatically increased flow of information to shareholders and the public, this information flow has not always been meaningful or useful. Often it seems that it is not possible to see the wood for the trees. Financial scandals continue, as Wirecard, NMC Health, Patisserie Valerie, going back to Carillion (and many more) demonstrate. Financial and corporate reporting have never been so fraught with difficulties as companies fail to give guidance about the future in an increasingly uncertain world aided and abetted by the COVID-19 pandemic. This concise book argues that the changes have simply masked an increase in the use of corporate PR, impression management, bullet points, glossy images, and other simulacra which allow poor performance to be masked by misleading information presented in glib boilerplate texts, images, and tables. The tone of the narrative sections in annual reports is often misleading. Drawing on extensive research and interviews with insiders and experts, this book charts what has gone wrong with financial reporting and offers a range of solutions to improve information to both investors and the public. This provides a framework for a new era of forward-looking corporate reporting and guidance based on often conflicting multiple corporate goals. The book also examines and contrasts the latest thinking by the regulatory authorities. Providing a compelling exploration of the industry's failings and present difficulties, and the impact of future disruption, this timely, thought-provoking book will be of great interest to students, researchers, and professionals as well as policy makers in accounting, financial reporting, corporate reporting, financial statement analysis, and governance.
