american history 21st century: Rethinking a Nation Philip Jenkins, 2019-06-22 The US continues to be the world's most powerful nation, an enormous driver of culture and technology. The present century has witnessed many momentous (and controversial) developments, the full significance of which may take many years to assess. *Rethinking a Nation* offers an ambitious, historically-informed analysis to help readers understand the current state of US affairs and their likely future course. Providing a survey of US history since 2000, and considering the current state of the nation in light of the events of the past two decades, Philip Jenkins discusses the impact of the 9/11 attacks and the two lengthy wars that ensued; the causes and outcome of the economic near-collapse of 2008; critical debates over the proper role of the state in matters like health care; and the stark decline of traditional industries and working class communities. At the fore in his

exploration are themes of the growing gulf between old and new Americas; the crisis of whiteness; the challenge to masculinity; the pervasive impacts of technology; surging inequality; and the new American role in a multipolar world. With chapters covering topics and issues such as race and immigration, the Obama government, protest movements, gender and sexuality, climate change debates, social media, fracking, the Trump election, and the US in global context, this is an essential text for undergraduate and postgraduate students of American history and anyone seeking to understand the contemporary US.

american history 21st century: Dictatorships in Twenty-First-Century Latin America Osvaldo Hurtado, 2022-11-22 Written by former President of Ecuador Osvaldo Hurtado, *Dictatorships in Twenty-First-Century Latin America* explores the most important Latin American political phenomenon to emerge in the first two decades of the twenty-first century: democratic governments elected by citizens have become autocratic governments through the manipulation of the

constitutional order and the legislative and judicial functions. Unlike traditional Latin American dictatorships, those of the twenty-first century have not been established by the military but by civilian politicians who were voted into power by the people to govern their countries subject to the provisions of the constitution and the law. Once the leaders assumed the presidency, however, they ignored the constitution under which they were elected and replaced it with one tailored to their political ambitions, using the broad powers assigned to them to remain in power indefinitely. This is what Presidents Hugo Chávez and Nicolás Maduro in Venezuela, Evo Morales in Bolivia, Rafael Correa in Ecuador, Daniel Ortega in Nicaragua, and Nayib Bukele in El Salvador have all done. Hurtado explains the paradox of this new Latin American authoritarian trend occurring when, for the first time in the history of the subcontinent, democratic institutions governed in all countries, with the sole exception of Cuba.

american history 21st century: *American Power in the 21st Century* David Held, Mathias Koenig-Archibugi, 2004-11-30 America wields a combination of military, economic and cultural power that many consider unprecedented. The way America uses this power has repercussions on every major issue of world affairs, including the prospects of regional security, the spread of democratic governance, and the provision of global public goods in economic and environmental domains. This volume explores the questions raised by American power from a variety of perspectives. Is the emphasis laid on military power likely to be self-defeating for the United States in the long run? Is soft power or persuasion a more effective way to promote American interests and goals? How is American predominance perceived in Europe, China and the Arab world? Will it last or will other powers coalesce to resist US hegemony? The authors address these and other fundamental questions in rigorous and historically sensitive analyses of this critical juncture in global politics. The book will be of great interest to students and scholars in political science and international relations, as well as all those concerned with and by one of the key topics of our time. Contributors include: Robert Cooper, Michael Cox, Zhiyuan Cui, Abdelwahab El-Affendi, G. John Ikenberry, Robert Kagan, Mary Kaldor, Joseph S. Nye, Thomas Risse.

american history 21st century: *The 21st Century Black History* Lee Arnold Green Sr., 2022-05-23 Black History in the 21st Century: From the Atlantic Slave Trade in America to Its Impact on African Americans Today is mainly about the injustices suffered by African Americans in America, especially the impact of the Atlantic slave trade in America on the negro race today, to include people of color. The impact of the Atlantic slave trade in the twenty-first century is high-tech lynching in America, that is, without the noose around the neck of the African American. High-tech lynching is defined in this book as the following: There are two phases of high-tech lynching. The first phase is characterized by violence, death, and/or destruction by white racists, race haters, or white supremacists, practicing bad spirit principal part racist hatred of racism against African Americans on the streets, to include people of color. The practice of racism is the use of racial or racist epithets characterized by the sentiment of racial segregation, white cultural and political domination that characterizes discriminatory language and/or physical practice of racism that involves violence, death, and/or destruction against black Americans in America. These are racist incidents on the streets. That is the first phase of high-tech lynching in the twenty-first century in America. And then an African American takes his or her racist case to court for courtroom proceedings. This is the second phase of high-tech lynching in America in the twenty-first century, wherein the courtroom, the DA, or district attorney, become hairsplitters of the letter of the law and nitpick at the spirit of the law as to the alleged violation or crime to justify the action or bad

behavior of racist white policemen or white supremacists, characterized by their bad spirit principal part racist hatred of racism. Therefore, high-tech lynching involves the judges of the courts in America that go along with their district attorney's travesty of justice or mockery of the justice system. To include the legislators who make the laws in America and oftentimes their designated juries based on their homogeneity of bad spirit principal part racist hatred. Therefore, high-tech lynching is the effect of America's Atlantic slave trade on African Americans today in this the twenty-first century, post-Jim Crow as a system of predatory laws and tyranny of racism practiced against African Americans.

american history 21st century: Latin America in the 21st Century Gian Luca Gardini, 2012-04-12 Twenty-first century Latin America is rich in history, culture, and political and social experimentation. In this fascinating and insightful analysis, Gardini looks at contemporary developments at three interconnected levels: state, region and globe. At the state level, leaders such as Evo Morales of Bolivia and Chavez of Venezuela embody a renewed intellectual autonomy in the continent, while revealing significant discrepancies between their rhetoric and their actions. At the regional level, while a consensus has emerged over Latin American unity as the only way towards development, the existence of several competing schemes of regional economic and political integration more accurately reflect the diversity of the area. At the global level, elements of change, such as the rise of Brazil and the involvement of China as a new trade partner, sit alongside traits of continuity, such as the crucial political, economic and ideational role played by Washington. Overall, Gardini argues that despite the numerous challenges to be faced, Latin America is now more wealthy, autonomous and better-placed in global geopolitics than at any time in its recent history.
