allied universal security services: Legends of the Security Services Industry Keith Oringer, Michael Hymanson, 2024-09-25 The global contract security market now totals over \$200 billion, with the number of private security officers exceeding that of public law enforcement officers. But this wasn't always the case. *Legends of the Security Services Industry: Profiles in Leadership* presents the unique stories of 15 industry legends, who transformed the industry from early private detective and small night watch companies into large-scale contract security

companies. The large-scale companies include, but are not limited to, Pinkerton, Burns International, The Wackenhut Corporation, Guardsmark, Wells Fargo, and U.S. Security Associates; as well as today's leading security companies, Allied Universal, Securitas, G4S, Prosegur, and GardaWorld. The book begins in the nineteenth century, with early U.S. legendary detectives: Allan Pinkerton and William Burns. Then, the book focuses largely from the mid-twentieth century to the present, where successive generations of legends built large-scale contract security companies which competed with, and then acquired, those formed by the early legends. Part II legends George Wackenhut, Ira Lipman, and Tom Wathen; Part III legends, Charles Schneider, Kenneth W. Oringer, William Whitmore, Jr., and Albert Berger; and Part IV, Scandinavian legends Jørgen Philip-Sørensen, Lars Nørby Johansen, and Thomas Berglund, all developed major security companies. Part V includes current global security leaders Helena Revoredo Gut, Stephan Crétier, and Steve Jones. Part VI reviews the timelines and successful leadership of these legendary leaders, with a look at the future of the industry. The legends' personal stories contain colorful insight into how they capitalized on the industry's explosive growth. While each generation of legends faced unique social and competitive landscapes, their personal stories illustrate how they respectively succeeded. Their leadership and management prowess enabled them to achieve great success, as they displayed vision and achieved their goals through grit, determination, hard work, charisma, organizational skills, and calculated risk-taking. Each chapter has been extensively researched and includes firsthand accounts based on interviews with living legends, colleagues, and family of deceased legends. Personal, company and signature event photos add further color to the moving narrative. Their stories are not only highly interesting, but also provide a framework for current leaders, and the next generation of entrepreneurs, on how to build and lead large-scale security service companies. With a Foreword from Robert D. McCrie, PhD, longtime John Jay Professor and editor of the renowned industry publication *The Security Letter*.

allied universal security services: *The Vaxxed* Shawn A. McCastle, 2022-01-31 A deeply-reported examination of why the COVID-19 vaccine terminations represent a flawed practice by American corporations, driven by the same corporate exploitation that has carried news headlines, pushing more employees into depressed labor. You received sweet talk in the job interview but obtained sour grapes and pink slips for something basic as following through on your constitutional guarantee, your right to make personal decisions about your own bodily integrity. In *The Vaxxed: Culture War in the Workplace*, Shawn A. McCastle, a preeminent voice on business, I-O psychology, inequality, labor, and non-death grief examines the gritty, posterior issues of the COVID-19 pandemic and the mass terminations that rock the United States. Told through the lived experience of McCastle as he shares his own termination and removal from two major organizations, Allied-Universal Security Services and the World Bank Group headquartered in Washington, D.C. McCastle makes comparisons of the COVID-19 pandemic and the AIDS epidemic, showing how society is no better off today than yesterday by terminating the employment of employees who refused to provide their vaccination status or submit to COVID-19 vaccination at all. McCastle shows how ineffective CEOs copied and pasted other corporations' policies and how the lack of corporate creativity, policies, and vision drove one of the most destructive labor practices in American history. McCastle argues, corporations need to develop effective people strategies to minimize disruptions and friction within the workplace. McCastle also shows how organizations have been propped up by employees, but in crunch time, employees do not receive identical returns.

allied universal security services: *The City and the Hospital* Daniel Skinner, Jonathan R. Wynn, Berkeley Franz, 2023-11-07 A surprising look at how hospitals affect and are affected by their surrounding communities. An enduring paradox of urban public health is that many communities around hospitals are economically distressed and, counterintuitively, medically underserved. In *The City and the Hospital* two sociologists, Jonathan R. Wynn and Berkeley Franz, and a political scientist, Daniel Skinner, track the multiple causes of this problem and offer policy solutions. Focusing on three urban hospitals—Connecticut's Hartford Hospital, the flagship of the Hartford Healthcare system; the Cleveland Clinic, which coordinates with other providers for routine care while its main campus provides specialty care; and the University of Colorado Hospital, a rare example of an urban institution that relocated to a new community—the authors analyze the complicated relationship between a hospital and its neighborhoods. On the one hand, hospitals anchor the communities that surround them, often staying in a neighborhood for decades. Hospitals also craft strategies to engage with the surrounding community, many of those focused on buying locally and hiring staff from their surrounding area. On the other hand, hospitals will often only provide care to the neighboring community through emergency departments, reserving advanced medical care and long-term treatment for those who can pay a premium for it. In addition, the authors show, hospitals frequently buy neighborhood real estate and advocate for development programs that drive gentrification and displacement. To understand how urban healthcare institutions work with their communities, the authors address power, history, race, and urbanity as much as the workings of the medical industry. These varied initiatives and effects mean that understanding urban hospitals requires seeing them in a new light—not only as medical centers but as complicated urban forces.

This volume provides an integrated framework to assist policymakers in both public and private agencies. This Handbook will be an important reference for scholars in public economics, public administration, criminology, and criminal justice, as well as professionals and policymakers in the public and private sectors.

allied universal security services: *The Handbook of Security* Martin Gill, 2022-06-22 The substantially revised third edition of *The Handbook of Security* provides the most comprehensive analysis of scholarly security debates and issues to date. It reflects the developments in security technology, the convergence of the cyber and security worlds, and the fact that security management has become even more business focused. violence, and cybercrime through various offence types such as commercial robbery and bribery. This handbook comprises mostly brand new chapters and a few thoroughly revised chapters, with discussions of the impact of the pandemic. It includes contributions from some of the world's leading scholars from an even broader geographic scale to critique the way security is provided and managed. It speaks to professionals working in security and students studying security-related courses. allied universal security services: Fixing Broken Cities John Kromer, 2023-03-28 *Fixing Broken Cities* explores the planning, execution, and impact of urban repopulation and investment strategies that were launched in the wake of two crises: late twentieth-century economic disinvestment and the outbreak of the COVID-19 pandemic. Because past practices could no longer serve as a reliable guide to future outcomes in this uncertain environment, any new initiatives had to involve a significant level of risk-taking. Based on the author's experience as a policymaker and practitioner, this book provides detailed insights into the origins and outcomes of these high-risk strategies, along with an explanation of why they succeeded or failed. This new edition examines policy initiatives from a fresh perspective, based on an awareness that (1) real estate ventures are best evaluated over the long term, rather than shortly after the completion of construction activity; (2) policies that had guided the allocation of public-sector resources during past decades of urban disinvestment need to be reconsidered in light of the economic resurgence that many American cities are now experiencing; and (3) the places described in this book are representative of other municipalities, of all kinds, where the pandemic has led to a fundamental rethinking of the relationship between home and workplace. A key theme of the book is equitable development, the question of who should benefit from the allocation of scarce public capital, and what investment policies are most likely to support this principle over the long term. The author provides realistic guidance about pursuing the best opportunities for improvement in highly disadvantaged, resource-starved urban areas, with reference to several key issues that are pressing concerns for members of urban communities: enlivening downtown and neighborhood commercial areas, stabilizing and strengthening residential communities, eliminating industrial-age blight, and providing quality public education options. This new edition will be of great use to planning, housing and community development professionals, both regionally and nationally, as well as to students on Urban Politics and Planning courses.

allied universal security services: The Power of Differentiation Barry LaBov, 2024-06-25 If you want to make history with your brand, read this book! - Jonathan Randall, President of Mack Trucks North America Two facts to consider. There are over 500,000 brands in 2,000 categories worldwide. And nearly fifty million Americans left their jobs in 2021 alone. Realizing all this

underscores how challenging, critical, and rare a brand is to be valued and loved by not only its customers but its employees as well. According to Barry LaBov, it comes down to just one word: Differentiation. LaBov, author of dozens of books including *The Power of Differentiation*, is founder of LABOV Marketing, Communications and Training. In this book, he draws on his firm's forty years of differentiating hundreds of companies in dozens of industries. LaBov and team have inspired leaders to identify what makes their brand, products, technology, and services unique and to then celebrate it, first with the most important audience, their employees. *The Power of Differentiation* reveals the steps needed to uncover the magic and genius in a company's manufacturing and engineering because your brand lives inside your products and technology. It shares case studies of service enterprises that separated from the pack as they focused on their customer treatment because your brand is your experience to customers. It reveals the secrets to mobilizing the sales channel to represent your company as if its logo is tattooed on their heart. And it focuses on the power of a brand's lexicon or language because words create worlds. It's not about being perfect, either, as LaBov shares stories of flawed organizations that dominated their rivals. And you'll learn how to build your brand while defeating the competition as they lower prices by commoditizing or homogenizing their product. *The Power of Differentiation* is an uplifting, insightful journey into discovering and celebrating what makes your brand unique.

allied universal security services: The Rise of Security and Why We Always Want More Mike Croll, 2023-04-15 Security is now a \$500 billion global business, and it's growing fast. It's developed from the night watchman keeping a sleepy eye out, to the guard patrolling the shopping mall, to smart surveillance systems monitoring everything, everywhere, all the time. This book explains: --how demand for security is generated by an alignment of interests between big business, insurance companies, the media, lawyers, politicians, and human nature; --how our response to terrorism is driven by fear rather than risk; --and how security has become a key feature of our lives at home, on-line, at work, when shopping, and when flying. This is a panoramic view from an industry insider who describes why the more security we have, the more we want. And crucial question emerges, as security incorporates new technology including facial recognition, drones, artificial intelligence, digital analytics, location and heart rate monitoring: are we creating Big Brother or Big Mother? It's probably the most interesting book on security that you'll ever read.

allied universal security services: Directory of Corporate Counsel, Spring 2024 Edition , allied universal security services: Private Criminal Justice Ric Simmons, 2023-10-05 The United States is in the midst of a significant re-evaluation of its criminal justice system, with increasing calls for reforming or defunding the police and efforts to curb mass incarceration. But focusing on the public criminal justice system paints an incomplete picture of how we address criminal activity. In Private Criminal Justice, Ric Simmons shows how significant amounts of criminal activity are detected by private police and how many disputes are settled, not in public courts, but through informal agreements between the victim and the accused or through adjudicative procedures run by private institutions. In this timely and eye-opening book, Simmons examines the vast, diverse, and under-appreciated private criminal justice system, suggesting reforms that can make these private responses more fair and revealing lessons the private criminal justice system can teach reformers of the public criminal justice system.
