anatoly training programme: Into the Void John Youskauskas, Melvin Croft, 2025-05 The world had been fascinated with astronauts and spaceflight since well before the first crewed

launches in 1961, when Yuri Gagarin, Alan Shepard, and John Glenn became household names. But when Alexei Leonov of the Soviet Union exited his spacecraft in March of 1965, a new era in spaceflight began. And when Ed White, clad in his gleaming space suit with a large American flag on his left shoulder, eased himself outside his Gemini spacecraft later that year, Americans too had a new space hero. They also learned a new acronym: EVA, short for extravehicular activity, more commonly known as “spacewalking.” Though few understood the tremendous risks White was taking in his twenty-two-minute space walk, Americans watched with immense pride and patriotism as White, tethered to Gemini 4, propelled himself around the spacecraft with a pressurized oxygen-fueled zip gun. But White’s struggle to fit his space-suited body back inside the claustrophobic Gemini spacecraft and close the hatch confirmed what NASA should have known: spacewalking wasn’t easy. More than fifty years and hundreds of space walks later, the art of EVA has evolved. The first space walks, preparation for walking on the moon, intended to prove that humans could function in raw space inside their own miniature spacecraft—a space suit. After the end of the lunar program, both the Americans and Soviets turned their focus to long-duration flights on space stations in low Earth orbit, and space walks were crucial to the success of these missions. The construction of the International Space Station—the most sophisticated spacecraft to date—required hundreds of hours of work by spacewalkers from many countries. In *Into the Void* John Youskauskas and Melvin Croft tell the unique story of those who have ventured outside the spacecraft into the unforgiving vacuum of space as we set our sights on the moon, Mars, and beyond.

anatoly training programme: One Coach's Journey from East to West Vladimir Zaglada, 2010-12-31
ONE COACH'S JOURNEY FROM EAST TO WEST: HOW THE FALL OF THE IRON CURTAIN CHANGED THE WORLD OF GYMNASTICS Until the fall of the Soviet Union the West and the Communists were engaged not only in a heated arms race but a race for Olympic gold, and Moscow poured tremendous resources into the effort, attracting some of the country's greatest minds. Author Vladimir Zaglada provides a look inside some of the Soviet Unions gymnastics think tanks, such as the Moscows Lenin Institute. *One Coach's Journey from East to West* also introduces us to some of the brilliant and colorful figures that have advanced the art of gymnastics and examines how the flood of coaching talent into the West has shifted the balance of power. The force of this flood has been somewhat impeded by cultural and language barriers, which are also discussed in the book. Hot topics such as the relentless increase in the difficulty level of artistic gymnastics are also discussed and a number of technical issues are covered, complete with illustrations. Zaglada provides a rare look inside the world of Soviet gymnastics at its height and provides information never before published in English. Did the machinery that cranked out Soviet gymnastics champions allow for a happy childhood? Why has the balance of power in gymnastics shifted in America's favor but will Russia retake the throne? The rigid line between amateurs (who are true professionals in almost all senses of the word) and professionals is the amateur in amateur gymnastics sacred? Is there an ideal physique for women's gymnastics? How much of current American coaching practice can be traced back to Soviet sports institutes? Ever heard of the profile system? What is the difference between an Arabian, an Onodi, and a Mostepanova? Why a few basic terms are constant sources of confusion. How effective was the system of incentives for Soviet gymnasts and coaches? How did the nomenklatura system of privileges and patronage impact Soviet gymnastics?

anatoly training programme: Russian Theatre in Practice Amy Skinner, 2019-04-18 Amidst the turmoil of political revolution, the stage directors of twentieth-century Russia rewrote the rules of theatre making. From realism to the avant-garde, politics to postmodernism, and revolution to repression, these practitioners shaped perceptions of theatre direction across the world. This edited volume introduces students and practitioners alike to the innovations of Russia's directors, from Konstantin Stanislavsky and Vsevolod Meyerhold to Anatoly Efros, Oleg Efremov and Genrietta Ianovskaia. Strongly practical in its approach, *Russian Theatre in Practice: The Director's Guide* equips readers with an understanding of the varying approaches of each director, as well as the opportunity to participate and explore their ideas in practice. The full range of the director's role is covered, including work on text, rehearsal technique, space and proxemics, audience theory and characterization. Each chapter focuses on one director, exploring their historical context, and combining an examination of their directing theory and technique with practical exercises for use in classroom or rehearsal settings. Through their ground-breaking ideas and techniques, Russia's directors still demand our attention, and in this volume they come to life as a powerful resource for today's theatre makers.

anatoly training programme: Children of Eve Juan Torrebiarte, 2013-02 Children of Eve: Space Travel Society is part of a new science fiction trilogy that reaches for the stars, as it aims to send man into the far corners of space. But there are forces afoot that don't want peaceful space travel to happen. In the near future, Professor Joshua O'Kelly of Houston, one of the founders of Eve's Space Travel Society, is kidnapped just before presenting his physics research to his long-time associate, Dr. Martia Gamma. Martia works for NASA II, the space security agency. As the story unfolds, other space agencies get involved and try to eliminate Josh. Josh and Martia have spent their whole careers trying to make space travel possible. Their tenacious personalities are the force behind the Children of the Eve project, but everything is now at a standstill. The villains Signor Hui and General Debarrets are doing the dirty work for the mysterious Mr. Gibbons, the Oil Trust

chairman, making a space war seems unavoidable. Born in 1963, Juan Torrebiarte is a member of the generation that was allowed to dream of space and other worlds without ever having a real chance to get there. As the story tells us, with technology in the early oil age, space travel was simply a non-possibility. The author is a priest and a teacher working in the Mayan highlands of western Guatemala. He has a degree in chemistry, geology, a Ph.D. in theology, and enjoys studying classic Greek and Hebrew. Publisher's website: <http://sbpra.com/JuanTorrebiart>
