amscos history textbook: Teach Truth Jesse Hagopian, 2025-01-14 In the face of relentless attacks on antiracist education, a much-needed reckoning with the roots of this latest wave of censorship and an urgent call to action to defend education. In just the last few years, scores of states have introduced or passed legislation that would require teachers to lie to students about structural racism and other forms of oppression. Books have been cut from curricula and pulled from school library shelves. Teachers have been fired and threatened with discipline. As long-time organizer, writer, and high school teacher Jesse Hagopian argues in Teach Truth, at stake is our democracy, not to mention the annihilation of entire systems of knowledge that challenge the status quo. As Hagopian shows by exploring the origins, philosophy, and manifestations of these attacks, the Right’s effort to regulate knowledge is an attempt to maintain its power over the American capitalist system, now and into the future. Yet the struggle for a liberatory education has a long history in the United States, from the days when it was illegal for Black people to be literate, to the Civil Rights and Black Power movements, to Black Lives Matter at School today. Teachers, students, and their allies are already building a movement – in the classroom, on campus, and in the streets – to defend antiracist education.

amscos history textbook: The Dynamics of Political Communication Richard M. Perloff, 2021-07-27 The third edition of The Dynamics of Political Communication continues its comprehensive coverage of communication and politics, focusing on problematic issues that bear on the functioning of democracy in an age of partisanship, social media, and political leadership that

questions media's legitimacy. The book covers the intersections between politics and communication, calling on related social science disciplines as well as normative political philosophy. This new edition is thoroughly updated and includes a survey of the contemporary political communication environment, unpacking fake news, presidential communication, hostile media bias, concerns about the waning of democracy, partisan polarization, political advertising and marketing, the relationship between social media and the news media, and the 2020 election, all the while drawing on leading new scholarship in these areas. It's ideally suited for upper-level undergraduate and graduate political communication courses in communication, journalism, and political science programs. This edition again features online resources with links to examples of political communication in action, such as videos, news articles, tweets, and press releases. For instructors, an instructor's manual, lecture slides, and test questions are also provided. Access the support material at www.routledge.com/9780367279417
