Colonial and Puritan Literature

The foundation of american literature history lies in the writings produced during the colonial period, heavily influenced by Puritan beliefs and values. Literature from this era primarily served religious and didactic purposes, aiming to instruct and guide the early settlers. The Puritans emphasized themes of morality, divine providence, and human depravity, reflecting their strict religious worldview.

Characteristics of Puritan Writing

Puritan literature is marked by plain style, biblical allusions, and a focus on spiritual introspection. Writers often employed diaries, sermons, and religious poetry to convey their messages. This literature was less concerned with artistic flourish and more with practical application to everyday life and faith.

Notable Figures

Key authors from this period include Anne Bradstreet, recognized as the first published American poet, and Jonathan Edwards, whose sermons like "Sinners in the Hands of an Angry God" exemplify Puritanical fire and theological rigor. Their works provide critical insight into early American values and the role of religion in shaping society.

The Romantic Period in American Literature

The Romantic period, spanning the early to mid-19th century, marked a significant shift in American literature history toward individualism, emotion, and nature. This era embraced imagination and creativity, often challenging established norms and expressing a deep appreciation for the natural world.

Major Themes and Styles

Romantic literature focused on themes such as the sublime, the supernatural, and the exploration of human emotion. Writers employed symbolism, allegory, and vivid imagery to evoke emotional responses and explore the complexities of the human spirit.

Prominent Authors and Works

Ralph Waldo Emerson and Henry David Thoreau were central figures in American Transcendentalism, a subset of Romanticism emphasizing self-reliance and the inherent goodness of people and nature. Edgar Allan Poe contributed Gothic elements and psychological depth, while Nathaniel Hawthorne explored moral complexity and historical legacy. Walt Whitman's expansive poetry celebrated democracy and the individual voice.

Realism and Naturalism

Following the Romantic period, American literature history saw the rise of Realism and Naturalism in the late 19th and early 20th centuries. These movements focused on depicting everyday life and social realities in an objective, often unembellished manner.

Defining Realism

Realism sought to portray ordinary characters and situations with accuracy and detail, eschewing romantic idealization. This approach aimed to reflect society's complexities and the struggles of common people, emphasizing ethical dilemmas and social conditions.

Naturalism's Influence

Naturalism extended Realism by incorporating a deterministic view of human life, influenced by scientific theories such as Darwinism. Naturalist writers emphasized environment, heredity, and social forces as shaping individual destiny, often highlighting harsher aspects of life.

Key Authors

Noteworthy Realist and Naturalist authors include Mark Twain, whose works like "Adventures of Huckleberry Finn" critique social injustice; Henry James, known for psychological insight; and Stephen Crane, whose "The Red Badge of Courage" exemplifies Naturalist themes. These writers deepened the American literature history by confronting contemporary social issues and human behavior.

Modernism and the Early 20th Century

The early 20th century ushered in Modernism, a revolutionary period in American literature history characterized by experimentation with form, style, and narrative techniques. Modernist writers sought to break from traditional conventions and explore fragmented realities amid rapid societal changes.

Innovations and Themes

Modernist literature often features stream-of-consciousness narration, fragmented structure, and exploration of alienation and disillusionment. Themes include the search for meaning in a chaotic world, the breakdown of traditional values, and the complexities of identity.

Influential Writers

F. Scott Fitzgerald captured the Jazz Age's glamour and despair, while Ernest Hemingway's terse prose conveyed stoicism and existential struggle. T.S. Eliot's poetry introduced dense symbolism and cultural critique, and William Faulkner's intricate narratives explored the American South's legacy. These authors significantly shaped the trajectory of American literature history by redefining literary expression.

Postmodernism and Contemporary Literature

In the latter half of the 20th century and into the 21st, American literature history has been defined by Postmodernism and diverse contemporary voices. This era is marked by skepticism toward grand narratives and an embrace of plurality, metafiction, and cultural diversity.

Characteristics of Postmodern Literature

Postmodern works often blur boundaries between genres, incorporate pastiche, and question objective truth. Playfulness, irony, and self-referentiality are common stylistic features, reflecting a fragmented and media-saturated society.

Diverse Contemporary Voices

Contemporary American literature includes a wide array of perspectives from marginalized communities, such as African American, Native American, Latina/o, and LGBTQ+ authors. Writers like Toni Morrison, Jhumpa Lahiri, and Junot Díaz explore themes of identity, displacement, and cultural hybridity, enriching the ongoing narrative of American literature history.

american literature history: A History of American Literature Percy H. Boynton, 2014 A History of American Literature In its beginnings American literature differs from the literatures of most other great nations; it was a transplanted thing. It sprang in a way like Minerva, full-armed from the head of Jove,—Jove in this case being England, and the armor being the heritage which the average American colonist had secured in England before he crossed the Atlantic. In contrast, Greek, Roman, French, German, English, and the other less familiar literatures can all be more or less successfully traced back to primitive conditions. Their early life was interwoven with the growth of the language and the progress of a rude civilization, and their earliest products which have come down to us were not results of authorship as we know it to-day. They were either folk poetry, composed perhaps and certainly enjoyed by the people in groups and accompanied by group singing and dancing,—like the psalms and the simpler ballads,—or they were the record of folk tradition, slowly and variously developed through generations and finally collected into a continuous story like the Iliad, the Æneid, the “Song of Roland,” the “Nibelungenlied,” and “Beowulf.” They were composed by word of mouth and not reduced to writing for years or generations, and they were not put into print until centuries after they were current in speech or transcribed by monks and scholars.

american literature history: A History of American Literature William Peterfield Trent, 1918

american literature history: A History of American Literature William B. Cairns, 2015-06-16 Excerpt from A History of American Literature This book attempts to trace within reasonable compass the course of literary development in America, and to present the most significant facts regarding American authors and their works. It places greatest emphasis on general movements because American literature is first of all important as an expression of national life. There are few American writings that require careful analysis and merit intensive study as masterpieces. But in a nation where education has from the first been so generally diffused, literary attempts of slight artistic merit may reflect not only the obvious changes in national life and ideals, but subtler tendencies and aspirations. For this reason attention is given not only to the few greater writers, but to many others whose works, though less important in themselves, are sometimes even more significant. The plan of the book and the decision what to include and what to exclude have been influenced by the authors experiences with college classes; but an attempt has been made to meet the wants of the general reader as well as those of the systematic student. In tracing tendencies and movements it has been necessary to adopt a geographical classification of authors; and this has sometimes been carried beyond the point where it is significant. It is a matter of the greatest importance whether an author represents the spirit of Puritan New England or the spirit of Cavalier Virginia; it is of little importance whether he chances to write in New Hampshire or in Vermont. For convenience, however, smaller as well as larger groupings have been made on the basis of residence. In adopting this plan the author wishes to disclaim any intention of over-emphasizing sectional differences. american literature history: A History of American Literature Since 1870 Fred Lewis

Pattee, 2015-06-25 Excerpt from A History of American Literature Since 1870 American literature in the larger sense of the term began with Irving, and, if we count The Sketch Book as the beginning, the centennial year of its birth is yet four years hence. It has been a custom, especially among the writers of text-books, to divide this century into periods, and all have agreed at one point: in the mid-thirties undoubtedly there began a new and distinct literary movement. The names given to this new age, which corresponded in a general way with the Victorian Era in England, have been various. It has been called the Age of Emerson, the Transcendental Period, the National Period, the Central Period. National it certainly was not, but among the other names there is little choice. Just as with the Victorian Era in England, not much has been said as to when the period ended. There has been no official closing, though it has been long evident that all the forces that brought it about have long since expended themselves and that a distinctively new period has not only begun but has already quite run its course. It has been our object to determine this new period and to study its distinguishing characteristics. We have divided the literary history of the century into three periods, denominating them as the Knickerbocker Period, the New England Period, and the National Period, and we have made the last to begin shortly after the close of the Civil War with those new forces and new ideals and broadened views that grew out of that mighty struggle. The field is a new one: no

other book and no chapter of a book has ever attempted to handle it as a unit. It is an important one: it is our first really national period, all-American, autochthonic. It was not until after the war that our writers ceased to imitate and looked to their own land for material and inspiration. The amount of its literary product has been amazing. There have been single years in which have been turned out more volumes than were produced during all of the Knickerbocker Period. The quality of this output has been uniformly high. american literature history: A Short History of American Literature (Classic Reprint) Walter Cochrane Bronson, 2016-09-15 Excerpt from A Short History of American Literature Throughout the book the literature has been presented in its relation to general conditions in America and to the literatures of England and the Continent of Europe, for only so can it be completely understood and its full significance perceived 3 but the personality of the authors and the intrinsic qualities of their work have, it is hoped, received due attention. The division into periods is not meant to be insisted upon too strongly. But some dividing lines must be run for convenience and clearness in treating of so wide and diversified a field, and those adopted are perhaps liable to fewer objections than any others. They have, however, been transgressed freely where it was necessary to do so in order to avoid splitting the discussion of an author's work. In the case of writers with whom the reader is probably not familiar and never need be, the method is chiefly descriptive 3 elsewhere the book is intended to be merely a guide in reading and studying the literature itself.
