ashok kumar public safety book: Challenges to Civil Rights Guarantees in India A.G. Noorani, South Asia Human Rights Documentation Centre, 2011-10-13 The civil rights of Indian citizens are guaranteed both in the Indian Constitution and through the State's international commitments. Despite these guarantees, the civil rights framework encounters numerous challenges from the State—problematic counter-terrorism laws, continuation of the death penalty, misuse of arrest and preventive detention powers, lack of implementation, and impunity. Through nine incisive essays on both traditional and emerging issues, this volume examines the prevailing imbalance between individual rights and State power. Many laws designed to protect the State do little more than protect State power at the expense of her citizens, directly flouting the Constitution, international law, and democratic principles. The authors critically analyse most of these laws, examining their justifications, background debates, and evolution, along with how they violate constitutional and international law. Taking into account relevant and contemporary comparative case law and developments in international law, this book makes a strong case for bold legal reforms and suggests various measures for improvement.

ashok kumar public safety book: Ecological Impacts of Stone Mining Gulshan Kumar Sharma, I. Rashmi, Shakir Ali, S. Kala, Ashok Kumar, M. Madhu, 2024-09-24 This edited book covers the impact of stone mining activities on soil, water, air, agriculture, vegetation, and policy aspects. It provides information on rehabilitation and restoration measures for stone mine spoil areas and other associated adverse impacts on human health caused by mining activities. Additionally, the book covers information related to the impact of stone mining on the socio-economic conditions of mining area inhabitants and appropriate government policies and support to meet the United Nations Sustainable Development Goals-15.3 (SDG-15.3) for degraded stone mine spoil sites toward Land Degradation Neutrality (LDN). The dumping of stone mine waste has many negative implications for the environment, soil, and natural resources. Although stone mining is the main source of livelihood for millions of people around the world and plays a crucial role in the economic development of many countries, it was estimated that nearly 4 million people die every year, especially in developing countries, due to environmental pollution from quarrying, sandblasting, and the emission of toxic gases. Mining leads to land degradation by the stacking of mine waste, loss of fertile topsoil and vegetation covers, abstraction and deterioration of the natural drainage system, deforestation, groundwater depletion, loss of plant and aquatic biodiversity, and public health issues. The book covers information about all aspects of dimensional stone mining activity and is a useful read for researchers, planners, capacity builders, scientists, and policymakers for achieving SDG 15.3. It would also be helpful for undergraduate and graduate students of agriculture, forestry, ecology, soil science, and environmental science disciplines.

Majority of baked goods are made up of all-purpose flour having serious risk concerns/impact on health and higher consumption of bakery goods can increase sugar, cholesterol level and can also cause further problem in liver or heart functions. Although, gluten free, multigrain baked confectionaries are now a day's available in the market but the still the better understanding of the bio-based products is need of current time. The biological viewpoint especially for the bakery goods can serve as initial point for better handling baked goods in context of upbringing of healthy society. The book targets students and researchers interested in interdisciplinary research and devising novel biological applications with special focus on bakery products.

ashok kumar public safety book: *Economic Offences* Dr. Anil Samota, 2025-01-28 Today, the economic offences are overshadowing all other crimes. Impact wise, they affect the society, nation and the whole mankind more severely and adversely. The technological advancement has triggered this gravity multifold. We do not have much research work and available material with regard to these offences. Further, for these offences, no universal definition is there so far. The present book basically is a research work based upon actual case studies. Here sincere and honest efforts have been made to understand the basic nature and devise an appropriate definition of economic offences. This definition is having registered Copyrights with the competent authority. The remedial measures proposed for prevention of these offences are based upon the actual issues of the real cases and hence most appropriate in terms of reliability, applicability and acceptability.
