best english learning resources: *A New Representation of Chinese Learners* Yingmei Luo, 2021-07-26 This book examines Chinese tertiary students' experiences of learning English in Sino-Australian programs in China. Using an institutional ethnography, the book examines one well-established Sino-Australian program based at a Chinese university. The book explores the ways that participant students used the Chinese words, tropes and their meanings to describe their English learning experiences with both local Chinese and foreign English teachers. This book introduces an innovative theoretical framework, "representation theory with a multilingual perspective", to analyse how Chinese students' everyday experiences are constructed and mediated through language, discourse and identity. This framework also highlights graphic examples of how concepts are created in both Chinese and English, and thus serves as a powerful tool for deconstructing dichotomies between China and the West. The aim of this book is, then, two-fold: to show how a novel theoretical lens can help us to develop more nuanced understandings of Chinese students, and to propose a new methodological and theoretical framework through which one can challenge the monolingual subjectivity and parochial views of both Chinese and Western conceptions.

best english learning resources: *Strategic Language Learning* Xuesong Gao, 2010 This monograph reports on a longitudinal inquiry into mainland Chinese undergraduates' language learning experiences at an English medium university in a multilingual setting with a focus on their strategic language learning efforts. This book examines the issue as to what extent language

learners' strategic learning efforts depend on their 'choice', if 'the element of choice' is the defining characteristic of language learners' strategic learning behavior. The inquiry, using a qualitative and ethnographic research approach, reveals dynamic interaction between learners' agency and contextual conditions underlying the participants' strategic learning process. Such understanding informs pedagogical efforts to foster individual learners' capacity for strategic learning and their capacities in opening up and sustaining a social learning space for exercising their strategic learning capacity or utilizing their strategic learning knowledge. --Book Jacket.
