Kassiantchouk, After Big Bang, Dark Matter, Dark Energy, and Universe expansion debunking in my book Time Matters from 2021, I asked myself How hard could it be to validate Bob Lazar's story? So, I started with the frozen candle episode, because it was about time dilation, and I am good at it. And besides, this episode, on the surface, contradicted with my own experience described in chapter 12. But all (new) physics has checked out! The same result was with another episode, and another ... Now I agree with Dr. Edgar Mitchell, Apollo 14 Astronaut, who said about Bob Lazar: His basic story is true - that he was too exposed to what he thought were alien craft and attempts to engineer and back engineer it. I think that his explanation of what's going on and his theory that he's utilizing is probably not on target. In plain English - Bob described real events, but he used wrong theory when trying to explain the observations. But now we have the right theory (this book starts with it, though you can skip it, except for chapter 1 - which is must read), and it checks out with Bob Lazar's anecdotes. Reading this book does not require advanced knowledge of physics. A teenager with the help of a science teacher or with the help of the Internet can understand it. Understanding reflection and refraction would be enough to start with. This book can be read two ways. Chapter by chapter - but that might be boring to you. Better try another way: read chapter 1 to get a grasp on time dilation, redshift, and refraction. Then jump to chapter 13 and continue reading there, sometimes going back to earlier chapters when they are referenced. Engineers, check chapter 30 first: like a fridge once impossible, Bob Lazar's craft becomes possible. Everybody else check chapter 39 first: it gives a general impression on how physics solves Bob Lazar's story.

bob lazarus resume: Dreamland Bob Lazar, 2019-10-15 Bob Lazar is the reason Area 51 became

infamous in the 1980s and his recent appearance on Joe Rogan's podcast with 7 million listeners is credited with inspiring the Storm Area 51 phenomenon. In his DREAMLAND autobiography, Lazar reveals every detail of his highly controversial story about being an insider within the world's most

legendary military research base. Bob Lazar was a brilliant young physicist that found himself employed at a top secret facility in the middle of the desert outside Las Vegas. Under the watchful eye of the government elite, he is tasked with understanding an exotic propulsion system being used by an advanced aerospace vehicle he is told came from outer space. The stressful work and long, odd hours start to wear on Bob and he becomes concerned for his safety. He tells his wife and a couple close friends about what he's doing in the desert, and his employers find out and are furious. When they station goons outside his house, Bob seeks help from wealthy UFOlogist, John Lear, who encourages Bob to take his story to award-winning investigative journalist George Knapp at KLAS-TV, a CBS affiliate. To prove he's telling the truth, Bob takes a group of people out into the desert to watch a test flight of the flying saucer. On the way home, they are stopped by the police, who notify the base, and Bob loses his job. In a series of interviews with CBS TV, Bob Lazar then blows the lid off Area 51, blows the whistle on the effort to conceal this craft from the American people, and blows up his career as a top physicist. Bob Lazar's reports have been the subject of intense controversy for decades. He has been interviewed numerous times and his story has been corroborated by other individuals he worked with and who were present when these events happened. But until now, Bob Lazar has never told his own story, in every detail in his own words, about those exciting days in the desert outside of Las Vegas and how the world came to learn about the experiments being conducted at Area 51.

bob lazar resume: Invoking the Beyond: Paul D. Collins, Phillip D. Collins, 2020-11-22 The Gnostic revival of the Enlightenment witnessed the erection of what could be called the “Kantian Rift,” an epistemological barrier between external reality and the mind of the percipient. Arbitrarily proclaimed by German philosopher Immanuel Kant, this barrier rendered the world as a terra incognita. Suddenly, the world “out there” was deemed imperceptible and unknowable. In addition to the outer world, the cherished metaphysical certainties of antiquity—the soul, a transcendent order, and God—swiftly evaporated. The way was paved for a new set of modern mythmakers who would populate the world “out there” with their own surrogates for the Divine. Collectively, these surrogates could be referred to as the Beyond because they epistemologically and ontologically overwhelm humanity. In recent years, the Beyond has been invoked by theoreticians, literary figures, intelligence circles, and deep state operatives who share some variant of a technocratic vision for the world. In turn, these mythmakers have either directly or indirectly served elitist interests that have been working toward the establishment of a global government and the creation of a New Man. Their hegemony has been legitimized through the invocation of a wrathful earth goddess, a technological Singularity, a superweapon, and extraterrestrial “gods.” All of these are merely masks for the same counterfeit divinity... the Beyond.

Bernocco, Future Magazine) What is hidden in the top secret military base called Area51? What happened in Roswell in July 1947? What tests are conducted in the middle of one of the driest deserts in the world? Why are hundreds of billions of dollars invested in top secret military projects in Area 51? Who really runs this military base and, above all, where do these technologies come from? bob lazar resume: Area 51 David Darlington, 2014-01-07 Area 51, Dreamland, Groom Lake, Paradise Ranch, Watertown Strip, the Box: all refer to the top-secret research installation, located a hundred miles north of Las Vegas, which, for many, has come to stand for all that is shadowy and nefarious about the military-industrial-intelligence complex. Built under the direction of the CIA in the 1950s, the base served as the original test site for the U-2 spy plane and F-117 stealth fighter jet. In more recent years, Area 51 has spurred public interest from its role in the government's \$30 billion Black Budget, from legal claims of worker illness due to toxic burning, and from sensational charges about captured alien spacecraft. It has also given birth to a feisty guerrilla subculture bent on exploding the secrecy surrounding this mysterious spot. David Darlington unfolds the history, legs, and characters involved with Area 51, weaving a weird tale of intrigue and outrage and UFOs that speaks volumes about popular culture and American democracy at the of the twentieth century.
