black mountain real estate: Black Mountain Laird Barron, 2020-04-28 Ex-Mob enforcer Isaiah Coledrige has hung out a shingle as a private eye in New York's Hudson Valley, and in his newest case, a seemingly simple murder investigation leads him to the most terrifying enemy he has ever faced. When a small-time criminal named Harold Lee turns up in the Ashokan reservoir--sans a heartbeat, head, or hands--the local Mafia capo hires Isaiah Coleridge to look into the matter. The Mob likes crime, but only the crime it controls...and as it turns out, Lee is the second independent contractor to meet a bad end on the business side of a serrated knife. One such death can be overlooked. Two makes a man wonder. A guy in Harold Lee's business would make his fair share of enemies, and it seems a likely case of pure revenge. But as Coledrige turns over more stones, he finds himself dragged into something deeper and more insidious than he could have imagined, in a labyrinthine case spanning decades. At the center are an heiress moonlighting as a cabaret dancer, a powerful corporation with high-placed connections, and a serial killer who may have been honing his skills since the Vietnam War...

black mountain real estate: Black Mountain College Anne Chesky Smith, Heather South, 2014-10-20 Located in the mountains of North Carolina, Black Mountain College was founded in 1933 by John Andrew Rice, Theodore Dreier, and other former faculty members from Rollins College. Their mission was to provide a liberal arts education that developed the student as a whole. Students and faculty lived and worked together on campus. Grades were abolished, and the arts were central to education. The college rented space for their first campus at Blue Ridge Assembly. In 1941, the college moved to the Lake Eden property they had purchased across the valley, allowing the school to grow. Many refugee artists found a home there, which provided an open and safe environment to create. Among the famous faculty and students of the college were Robert Rauschenberg, John Cage, Merce Cunningham, and Buckminster Fuller. Funding for the college was always scarce, and in debt, the college was finally forced to close its doors in 1957. Black Mountain College operated for only 24 years but left a lasting impact on the arts and education on an international scale.

black mountain real estate: Realm of the Black Mountain Elizabeth Roberts, 2024-10-24

Montenegro was admitted to the UN as its 192nd member in June 2006, thus recovering the independence it had lost nearly ninety years earlier at the Versailles Peace Conference. This is the first full-length history of the country in English for a century, tracing the history of the tiny Balkan state from its earliest roots in the medieval empire of Zeta through its consistently ambiguous and frequently problematic relationship with its larger neighbour Serbia, the emergence of a priest/warrior ruler in the shape of the Vladika and its emergence from Ottoman suzerainty at the Congress of Berlin. In more recent history, the book focuses on Montenegro's troubled twentieth century, its prominent role in the Balkan wars, its unique deletion from world maps as an independent state despite being on the winning side in the Great War, its ignominious role in the wars leading to the disintegration of Yugoslavia and its final reemergence as a member of the international community on the anniversary of the Battle of Kosovo in 2006. Since independence, Montenegro has grappled with the question of Euro-Atlantic integration, including membership of NATO (achieved) and the EU (applicant). Even as it has fought to define its identity, it has gone from being one of the poorest nations in the Western Balkans to having the highest per capita income of the region. It successfully navigated democratic transition in 2020.

black mountain real estate: Mount Mitchell and the Black Mountains Timothy Silver, 2003-12-04 Each year, thousands of tourists visit Mount Mitchell, the most prominent feature of North Carolina's Black Mountain range and the highest peak in the eastern United States. From Native Americans and early explorers to land speculators and conservationists, people have long been drawn to this rugged region. Timothy Silver explores the long and complicated history of the Black Mountains, drawing on both the historical record and his experience as a backpacker and fly fisherman. He chronicles the geological and environmental forces that created this intriguing landscape, then traces its history of environmental change and human intervention from the days of Indian-European contact to today. Among the many tales Silver recounts is that of Elisha Mitchell, the renowned geologist and University of North Carolina professor for whom Mount Mitchell is named, who fell to his death there in 1857. But nature's stories--of forest fires, chestnut blight, competition among plants and animals, insect invasions, and, most recently, airborne toxins and acid rain--are also part of Silver's narrative, making it the first history of the Appalachians in which the natural world gets equal time with human history. It is only by understanding the dynamic between these two forces, Silver says, that we can begin to protect the Black Mountains for future generations.

black mountain real estate: White Church, Black Mountain Thomas Paul Burgess, 2021-05-11 A Belfast policeman untangles crimes dating back to the time of the Troubles—in an investigation that could undermine a fragile peace . . . In Belfast, Northern Ireland, the fragile peace process is still haunted by the crimes of the past. When Detective Inspector Dan Watson enters an interview room, he is astonished to see the familiar face of Eban Barnard, the younger brother of his late partner and mentor Detective Superintendent Alex, who was brutally assassinated by the Provisional IRA twenty years earlier. What Dan learns in that room defies credulity and threatens to

open a Pandora's box of secrets that will unhinge the lives of all those involved—and endanger the very peace process itself. Based on actual events and set against the backdrop of a society's hunger for redemptive catharsis, *White Church, Black Mountain* is a tightly constructed, fast-paced novel of murder, politics, and a traumatic childhood secret that explores themes of prejudice, corruption, retribution, and abiding grace. Praise for Thomas Paul Burgess's *Through Hollow Lands*: "An inventive, extravagant, high-energy thrill ride of a book." —Irish Times

black mountain real estate: Newspaper-Real Estate Schemes of the 1920s Margaret B. Barker, 2021-01-14 In the 1920s, newspapers and real estate developers colluded in a scheme to sell tiny vacation lots to subscribers. A zealous advertising campaign spawned a land-buying frenzy that sprouted dozens of waterfront summer colonies across the country. The resulting legal, social and environmental mayhem caused some of these communities to disappear or be drastically altered in character, while others managed to survive more or less intact. Drawing on newspaper accounts of the day, this book explores how the scheme eluded accusations of fraud, creating an assembly line for middle class resorts through a lucrative merger of real estate and journalism. Pell Lake, Wisconsin, serves as a case study that yields the best evidence for determining if it was all a scam. Told here for the first time, the story of this unusual alliance and the communities it created offers lessons for today's entrepreneurs, journalists, advertisers, real estate developers, environmentalists and anyone who has ever lived in a resort community.
