cape and pistol society london: Gun Crime in Global Contexts Peter Squires, 2014-06-27
Every year around three-quarters of a million people die (directly or indirectly) as a result of gun violence, with most deaths occurring in the poorest, yet also most highly weaponized parts of the world. Firearm proliferation -- 875 million global firearms -- is a direct contributor to both regional conflicts and to crime. This book attempts to understand the inter-related dynamics of supply and demand which are weaponizing the world. Now over ten years after Peter Squires's *Gun Culture or Gun Control?*, the issues pertaining to gun violence and gun control have developed dramatically. With *Gun Crime in Global Contexts*, Peter Squires offers a cutting-edge account of contemporary developments in the politics of gun crime and the social and theoretical issues that surround the problem. This book contains: an innovative political analysis of neo-liberal globalization and weapon proliferation; an overview of recent gun control debates and gang strategies in the UK; an updated analysis of US gun politics: self-defence, race and the 'culture war'; a critical analysis of US school and rampage shootings, how they have impacted the gun debate and how different societies have responded to mass shootings; an examination of the UN's development of an Arms Trade Treaty (2001--13); a discussion of weapon trafficking; discussions about youth gangs around the world, including those in Brazil, Kenya, West Africa, Mexico and South Africa. With its interdisciplinary perspective and global reach, this book will be important reading for academics and students interested in youth and gang crime, violent crime and comparative criminal justice, as well as peace and security studies and international relations.

cape and pistol society london: Science and Sound in Nineteenth-Century Britain
Edward J. Gillin, 2023-12-22 *Science and Sound in Nineteenth-Century Britain* is a four-volume set of primary sources which seeks to define our historical understanding of the relationship between British scientific knowledge and sound between 1815 and 1900. In the context of rapid urbanization and industrialization, as well as a growing overseas empire, Britain was home to a rich scientific culture in which the ear was as valuable an organ as the eye for examining nature. Experiments on how sound behaved informed new understandings of how a diverse array of natural phenomena operated, notably those of heat, light, and electro-magnetism. In nineteenth-century Britain, sound was not just a phenomenon to be studied, but central to the practice of science itself and broader understandings over nature and the universe. This collection, accompanied by extensive editorial commentary, will be of great interest to students and scholars of the History of Science.

cape and pistol society london: Policing and Boundaries in a Violent Society Guy Lamb, 2022-01-31 This book explores how social and territorial boundaries have influenced the approaches and practices of the South Africa Police Service (SAPS). By means of a historical analysis of South Africa, this book introduces a new concept, 'police frontierism', which illuminates the nature of the relationships between the police, policing and boundaries, and can potentially be used for future case study research. Drawing on a wealth of research, this book examines how social and territorial boundaries strongly influenced police practices and behaviour in South Africa, and how social delineations amplify and distort existing police prejudices against those communities on the other side of the boundary. Focusing on cases of high-density police operations, public-order policing and the recent policing of the COVID-19 lockdown, this book argues that poor economic conditions combined with an increased militarisation of the SAPS and a decline in public trust in the police will result in boundaries continuing to fundamentally inform police work in South Africa. This book will be of interest to scholars and students interested in policing in post-colonial societies characterised by high levels of violence, as well as police work and police militarization.

cape and pistol society london: Power and Resistance in an African Society Les Switzer, 1993
Imagine a history of the United States written from the perspective of the African-American community. Imagine that the story of this community is told not only from the viewpoint of its leaders--the middle-class elites--but also from the viewpoint of sharecroppers, industrial workers and others living on the margins of American culture. And finally, imagine that this is not only about

political and economic relations but also about race, class, gender, and religious relations, about the lived experiences of one community that both reflect and represent fundamental issues of power and resistance in an entire society. This is what Les Switzer has tried to do with his book *Power and Resistance in an African Society*. Scholars who have read it suggest that this is the first attempt to write a history of South Africa from the perspective of one subordinate community in South Africa. The result is a transformed history from below. The names, dates, events, and issues of conventional textbook history lose their meaning in the process of reconstructing a history that seeks to free the African from the domain of South Africa's ruling culture. The book also offers a unique contribution to African studies in sub-Saharan Africa, because it explores the material and symbolic manifestations of power and resistance in a pre-colonial, colonial, and post-colonial setting. The Ciskei region in the eastern Cape was selected as the case study. This was the historic zone of conflict between European and Bantu-speaking African in southern Africa--the Cape-Xhosa wars in this region lasting a century. The contemporary African nationalist movement in South Africa first emerged in a variety of organizational forms in the Ciskei during the 1870s and 1880s. The strategy of petitionary protest probably persisted longer here than anywhere else in South Africa in the post-colonial period, but popular resistance found a variety of windows outside organized African politics. The Ciskei, for example, was a focal point of rural resistance in the 1920s and early 1930s and again between the early 1940s and early 1960s. The gap between rural and urban dissidents in South Africa, moreover, was first bridged in the Ciskei and its environs during the 1952 Defiance Campaign. Finally, the Ciskei's segregated African reserve, where economic conditions were judged to be most serious, emerged as a primary site of struggle on South Africa's periphery during the 1970s and 1980s. The focus of this study is on the Xhosa-speaking peoples who lived in the Ciskei region in the first century after conquest. To highlight the linkages between regional and national issues, the Xhosa in the Ciskei are examined in the context of unfolding events in the Cape Colony and in the unified settler state of South Africa after 1910. A distinct plurality of voices would be formed in the complex interplay between color, consciousness, and class, as this community sought space for itself within the domain of South Africa's ruling culture.

cape and pistol society london: A Short History of South Africa Gail Nattrass, 2017-11-16 South Africa is popularly perceived as the most influential nation in Africa - a gateway to an entire continent for finance, trade and politics, and a crucial mediator in its neighbours' affairs. On the other hand, post-Apartheid dreams of progress and reform have, in part, collapsed into a morass of corruption, unemployment and criminal violence. *A Short History of South Africa* is a brief, general account of the history of this most complicated and fascinating country - from the first evidence of hominid existence to the wars of the 18th, 19th and 20th centuries that led to the establishment of modern South Africa, the horrors of Apartheid and the optimism following its collapse, as well as the prospects and challenges for the future. This readable and thorough account, illustrated with maps and photographs, is the culmination of a lifetime of researching and teaching the broad spectrum of South African history. Nattrass's passion for her subject shines through, whether she is elucidating the reader on early humans in the cradle of humankind, or describing the tumultuous twentieth-century processes that shaped the democracy that is South Africa today.

cape and pistol society london: Representing Scotland in Literature, Popular Culture and Iconography A. Riach, 2004-12-10 This fascinating new study is about cultural change and continuities. At the core of the book are discrete literary studies of Scotland and Shakespeare, Walter Scott, R.L. Stevenson, Arthur Conan Doyle, the modern Scottish Renaissance of the 1920s and more recent cultural and literary phenomena. The central theme of literature and popular 'representation' recontextualises literary analysis in a broader, multi-faceted picture involving all the arts and the changing sense of what 'the popular' might be in a modern nation. New technologies

alter forms of cultural production and the book charts a way through these forms, from oral poetry and song to the novel, and includes studies of paintings, classical music, socialist drama, TV, film and comic books. The international context for mass media cultural production is examined as the story of the intrinsic curiosity of the imagination and the intensely local aspect of Scotland's cultural self-representation unfolds.
