charlene mcdaniels: It Was Over Before It Started Gary J. Nash, 2023-09-27 Life starts out as a plan in becoming someone or somebody. But plans can be interrupted, broken, or changed when making bad decisions due to some of our choices as youth and the situations that we allow ourselves to be put in. Most of the time, things are not turning out the way they should. This is the real meaning behind the title of my book, It Was Over Before It Started. I would just like to help and inspire those with depression, drug addiction, and learning disabilities to not give up just because they have problems or are not smart or the best athletes. At the end, there is a place for them. We as human beings will fall short of our goals and dreams. If not, then job well done.

charlene mcdaniels: Death Underground Robert E Hartley, David Kenney, 2006-07-24 Death Underground: The Centralia and West Frankfort Mine Disasters examines two of the most devastating coal mine disasters in United States history since 1928. In two southern Illinois towns only forty miles apart, explosions killed 111 men at the Centralia No. 5 mine in 1947 and 119 men at the New Orient No. 2 mine in West Frankfort in 1951. Robert E. Hartley and David Kenney explain the causes of the accidents, identify who was to blame, and detail the emotional impact the disasters had on the survivors, their families, and their communities. Politics at the highest level of Illinois government played a critical role in the conditions that led to the accidents. Hartley and Kenney address how safety was compromised when inspection reports were widely ignored by state mining officials and mine company supervisors. Highlighted is the role of Driscoll Scanlan, a state inspector at Centralia, who warned of an impending disaster but whose political enemies shifted the blame to him, ruining his career. Hartley and Kenney also detail the New Orient No. 2 mine explosion, the attempts at rescue, and the resulting political spin circulated by labor, management, and the state bureaucracy. They outline the investigation, the subsequent hearings, and the efforts in Congress to legislate greater mine safety. Hartley and Kenney include interviews with the survivors, a summary of the investigative records, and an analysis of the causes of both mine accidents. They place responsibility for the disasters on individual mine owners, labor unions, and state officials, providing new interpretations not previously presented in the literature. Augmented by twenty-nine illustrations, the volume also covers the history, culture, and ethnic pluralism of coal mining in

Illinois and the United States.

charlene mcdaniels: *Crime, Inequality and Power* Eileen B. Leonard, 2015-04-10 Crime, Inequality and Power challenges the dominant definitions of crime and the criminal through its uniquely comparative approach. In this book Eileen Leonard analyzes multiple forms of criminal behavior in the United States, including violence, sexual assault, theft, and drug law violations, whilst also asking readers to consider the parallels between crimes that are rarely thought comparable. Leonard's juxtaposition of familiar street crimes, such as car theft, alongside large-scale corporate theft, vividly exposes profound inequalities in the way crime is defined, and the treatment it receives within the criminal justice system. Leonard's analysis also reveals the underlying inequalities of race, class, and gender which enable the perpetuation of such crimes, as well as calling into question the reality of fundamental American ideals of fairness and equal justice. Moreover, the book questions whether current policies that punish street crime excessively while minimizing the crimes of the powerful, fail to keep the public safe. A broader consideration of crime, and the inequalities that underlie it, offers a fresh opportunity to rethink public policies and enduring issues of crime and criminal justice. Challenging the many persistent inequalities in the perception of and response to crime, this critique of American crime and punishment will be of interest to undergraduate and postgraduate students, as well as scholars, in the fields of criminology, sociology and law.

charlene mcdaniels: **Cross-Cultural Journalism** Maria Len-Rios, Earnest Perry, 2015-12-22 Built on the hands-on reporting style and curriculum pioneered by the University of Missouri, this introductory textbook teaches students how to write about and communicate with people of backgrounds that may be different from their own, offering real-world examples of how to practice excellent journalism and strategic communication that take culture into account. Specifically, the book addresses how to: engage with and talk across difference; identify the ways bias can creep into our communications, and how to mitigate our tendencies toward bias; use the concept of fault lines and approach sources and audiences with humility and respect; communicate with audiences about the complexity inherent in issues of crime, immigration, sports, health inequalities, among other topics; interpret census data categories and work with census data to craft stories or create strategic campaign strategies; reconsider common cultural assumptions about race, class, gender, identity, sexual orientation, immigration status, religion, disability, and age, and recognize their evolving and constructed meaning and our role as professional communicators in shaping national discussions of these issues. In addition to its common sense, practical approach, the book's chapters are written by national experts and leading scholars on the subject. Interviews with award-winning journalists, discussion questions, suggested activities, and additional readings round out this timely and important new textbook. Supplemented by additional case studies and examples of best practice, Cross-Cultural Journalism offers journalists and other communication professionals the conceptual framework and practical know-how they need to report and communicate effectively about difference.
