History and Origins of CIA Remote Viewing Training

The origins of cia remote viewing training trace back to the Cold War era when the U.S. government sought unconventional methods to gain intelligence advantages. The program emerged from interest in psychic phenomena and claims that the Soviet Union was investing in similar psychic espionage efforts. Initial research was conducted under various military and intelligence agencies before the CIA formalized remote viewing training within its intelligence framework. The program's early stages involved experimental sessions to validate remote viewing as a reliable intelligence tool.

Background and Early Research

Remote viewing research began in the early 1970s, influenced by academic parapsychology studies and anecdotal reports of psychic abilities. The Defense Intelligence Agency (DIA) and the Stanford Research Institute (SRI) were instrumental in early investigations. These efforts aimed to determine if trained individuals could perceive hidden details about distant locations or objects, which could be of strategic value.

Development of Formal Training Programs

Based on promising initial results, the CIA initiated structured remote viewing training programs. These programs sought to standardize techniques, develop protocols, and select suitable candidates for operational use. Training incorporated controlled environments with feedback mechanisms to enhance accuracy and reliability in remote viewing sessions.

Core Techniques and Methodologies

CIA remote viewing training employs a range of techniques designed to facilitate the perception of remote or obscured targets. These methodologies focus on mental discipline, sensory reduction, and systematic data collection. The training emphasizes a step-by-step approach to minimize bias and maximize the clarity of impressions received during remote viewing exercises.

Controlled Remote Viewing (CRV)

Controlled Remote Viewing is a structured technique developed during CIA remote viewing training to guide viewers through a series of stages. Each stage refines the data collected, moving from broad sensory perceptions to more detailed and specific information. CRV protocols include blind targets, where the viewer has no prior knowledge of the target, ensuring objective data collection.

Coordinate Remote Viewing (CRV) and Other Variants

Coordinate Remote Viewing utilizes specific target coordinates or reference points to focus the viewer's perception. Variations such as Extended Remote Viewing (ERV) and Associative Remote Viewing (ARV) expand on traditional methodologies to include altered states of consciousness and predictive applications.

Training Components

- Mental relaxation and focus exercises
- Use of target coordinates or cues
- Data recording and session documentation
- Feedback and accuracy evaluation
- Incremental complexity in target presentation

Applications and Operational Use

CIA remote viewing training was primarily intended to support intelligence gathering by providing information inaccessible through conventional reconnaissance methods. The trained remote viewers contributed to various classified operations, aiming to locate enemy installations, recover missing personnel, or identify strategic assets.

Military and Intelligence Missions

Remote viewing was applied in missions requiring insight into locations behind enemy lines or unknown circumstances. Reportedly, some successful operations involved locating hostages or identifying technological developments. The intelligence derived from remote viewing sessions supplemented other sources, although it was rarely used as the sole basis for critical decisions.

Civilian and Research Applications

Beyond government use, CIA remote viewing training inspired civilian interest and research into psychic phenomena. Some organizations adapted the training protocols for personal development, problem-solving, and forecasting future events. The techniques influenced various fields, including psychology, parapsychology, and alternative intelligence gathering.

Key Figures and Contributors

Several notable individuals played pivotal roles in the development and execution of CIA remote viewing training. These experts contributed both to the theoretical framework and practical application of remote viewing within intelligence communities.

Ingo Swann

Ingo Swann is widely regarded as one of the founding figures in remote viewing research. His involvement with the Stanford Research Institute helped establish fundamental protocols and validate the feasibility of remote viewing under controlled conditions.

Russell Targ and Harold Puthoff

Physicists Russell Targ and Harold Puthoff were instrumental in conducting early experiments and developing training methodologies. Their scientific approach sought to quantify and replicate remote viewing phenomena systematically.

Other CIA and Military Personnel

Various intelligence officers and military personnel contributed to refining the training and operational deployment of remote viewing. Their efforts ensured the integration of psychic research into

actionable intelligence processes.

Scientific Evaluation and Criticisms

CIA remote viewing training has been subject to extensive scientific scrutiny and skepticism. While some experimental results suggested statistically significant findings, many critics argue that remote viewing lacks replicable evidence and fails to meet rigorous scientific standards.

Research Findings and Debates

Several studies demonstrated instances of above-chance accuracy in remote viewing sessions. However, methodological flaws, small sample sizes, and potential biases raised questions about the validity of these findings. The debate continues over whether remote viewing constitutes a genuine psychic phenomenon or results from chance and psychological factors.

Government Disclosure and Declassification

In the 1990s, the CIA declassified many documents related to remote viewing programs, including Project Stargate. These disclosures provided greater transparency but also fueled public skepticism and controversy regarding the program's effectiveness and scientific merit.

Legacy and Influence on Contemporary Practices

CIA remote viewing training has left a lasting impact on both intelligence practices and the broader field of psychic research. Despite the program's official termination, its methodologies continue to influence various domains interested in intuitive perception and mental training.

Continued Interest and Adaptations

Remote viewing principles are applied in modern psychic workshops, personal development programs, and investigative research. The legacy of CIA remote viewing training persists in the exploration of human consciousness and non-traditional information gathering techniques.

Integration with Modern Technologies

Contemporary approaches sometimes combine remote viewing techniques with advanced technologies such as neurofeedback, meditation apps, and virtual reality to enhance mental focus and perception. This integration reflects the evolving nature of remote viewing as a multidisciplinary practice.

Hocking, 2016-06-28 The fine internal structure of the atomic nucleus and elementary particles may never be discovered by instrumental methods. This paper describes detailed observations of their structures by "remote viewing". This is a mind-based faculty for magnifying objects, requiring specialized meditation training. This paper reconciles these observations with modern physics.

Remote viewing has been verified by experiments published in Nature by Targ & Puthoff in 1974, with a possibility of only 1 in a million that it could have occurred by chance.

cia remote viewing training: Spooky Technology: A reflection on the invisible and otherworldly qualities in everyday technologies Daragh Byrne, Dan Lockton, Matthew Cruz, Christi Danner, Karen Escarcha, Katherine Giesa, Meijie Hu, Yiwei Huang, Miranda Luong, Anuprita Ranade, Gordon Robertson, Elizabeth Wang, Lisa (Yip Yan) Yeung, Catherine Yochum, 2021-08-31 Spooky Technology explores our understanding of the invisible technologies in our everyday lives, from objects with 'intelligence' to systems in our homes that talk to us (and each other). The book is an inventory of spooky technologies, compiled by Carnegie Mellon students reviewing work across art, design, HCI, psychology, human factors research, and other fields, that has been done in this field, or adjacent to it, both historically and more recently, with commentary, essays, and interviews with creators and artists. We often hear that the technologies in our everyday lives would appear to be 'magic' and potentially terrifying to people in the past—instantaneous communication with people all over the world, access to a vast, ever-growing resource of human knowledge right there in the palm of our hand, objects with 'intelligence' that can sense and talk to us (and each other). But rarely are these 'otherworldly' dimensions of technologies explored in more detail. There is an often unspoken presumption that the march of progress will inevitably mean we all adopt new practices, and incorporate new products and new ways of doing things into our lives—all cities will become smart cities; all homes will become smart homes. But these systems have become omnipresent without our necessarily understanding them. They are not just black boxes, but invisible: entities in our homes and everyday lives which work through hidden flows of data, unknown agendas, imaginary clouds, mysterious sets of rules which we perhaps dismiss as 'algorithms' or even 'AI' without really understanding what that means. On some level, the superstitions and sense of wonder, and ways of relating to the unknown and the supernatural (deities, spirits, ghosts) which humanity has felt in every culture throughout history have not gone away, but started to become transferred and transmuted into new forms.

cia remote viewing training: Exploring the Sub-conscious using New Technology Michael Gwyn Hocking, 2016-02-28 A rapid drug-free method for visual imagery, while wide awake, for those who can get no imagery with closed eyes, requiring easily-constructed low-cost circuitry. The simple device captures the user's attention due to its entertaining display of flashing lights, so no advanced ability of mind control techniques is required.

cia remote viewing training: The Purpose of Life, Why are we Here M.G. Hocking, Professor of Materials Chemistry, University of London, 2016-02-19 There is much evidence that we have lived before, and our purpose is to progress to a more advanced state. The evidence also indicates that a 'God' must exist to cause such re-births – on other continents and hundreds of years later. The consequences of bad deeds done in previous lives explains present suffering, which seems otherwise unjust. Future lives lie before us and from available evidence these will be strongly influenced by our actions in our present life.

cia remote viewing training: Remote Viewing Kaia Stonebrook, AI, 2025-03-04 Remote Viewing explores the declassified history of government-sponsored research into psychic abilities, specifically whether these abilities could be used for national security. The book examines programs within the CIA and Department of Defense, analyzing experimental protocols and statistical analyses used to test remote viewing capabilities. It avoids sensationalism, instead focusing on a fact-based

analysis of the intersection of science and politics. One intriguing aspect explored is how the Cold War drove the need for unconventional intelligence gathering methods. The book's central argument is that while statistically significant results were achieved, the practical applicability of remote viewing for intelligence remains questionable. It presents declassified documents and experimental data to support this claim, highlighting the challenges in conducting rigorous scientific research on subjective experiences. Beginning with key concepts and historical context, the book progresses through case studies and statistical analysis, ultimately offering a balanced perspective on the potential and limitations of remote viewing for intelligence gathering.

cia remote viewing training: *The Star Gate Archives* Edwin C. May, Sonali Bhatt Marwaha, 2018-10-23 Star Gate is the largest funded program in the history of psi research receiving about \$19.933 million in funding from 1972 to 1995. Researchers from SRI International, and later at Science Applications International Corporation, in association with various U.S. intelligence agencies participated in this program. Using the remote viewing method, research focused on understanding the applicability and nature of psi in general but mostly upon informational psi. Volume 1: Remote Viewing (1972-1984) and Volume 2: Remote Viewing (1985-1995) include all aspects of RV including laboratory trials and several operational results. Volume 3 focuses on laboratory investigations on psychokinesis. Volume 4: Operational Remote Viewing: Government Memorandums and Reports includes an analysis of the applied remote viewing program and a selection of documents that provide a narrative on the behind the scenes activities of Star Gate. In a total of 504 separate missions from 1972 to 1995, remote viewing produced actionable intelligence prompting 89% of the customers to return with additional missions. The Star Gate data indicate that informational psi is a scientifically valid phenomenon. These data have led to the development of a physics and neuroscience based testable model for the underlying mechanism, which considers informational psi as a normal, albeit atypical, phenomenon. The Star Gate data found insufficient evidence to support the causal psi (psychokinesis) hypothesis.

In the annals of military and espionage history there have been many strange tales to be told, but none can match the saga of psychic espionage: the history of the Military-Occult Complex. With the flavor of fiction, but the foundation of fact, *The Psychic Battlefield* is the complete history of the use of man's extrasensory powers in search of the information needed to win wars--hot and cold. The *Psychic Battlefield* spans the five thousand-year history of espionage, from the attempted overthrow of the Pharaoh Rameses by magic to the CIA use of military-trained psychics during the Cold War. It is a story as true as it is incredible. This book reveals the story of the sacred Templar skull; the Angelic communications of John Dee, intelligence agent of Queen Elizabeth I; the psychic stranglehold of Rasputin on the Romanovs; and the occult endeavors of the Nazis and the Soviets. The *Psychic Battlefield* contains the names and rites of the old demons of war, contacted by military strategists in search of supernatural support. It explains and discusses different methods of divination used by armies throughout history, and reveals the various ways of making a soldier into a superman. The cast of characters includes such noteworthy names as sorcerer-poet Aleister Crowley, author Ian Fleming, spoon-bending General Stubblebine, and Psychic Warrior David Morehouse.
