connections answers 22 october 2024: *2024 The Campaign Chronicles* JD Foster, 2025-01-30 "How strange it is that the past is so little understood and so quickly forgotten. We live in the most thoughtless of ages. Every day headlines and short views. I have tried to drag history up a little nearer to our own times in case it should be helpful as a guide in present difficulties." - Winston Churchill, 1929 The 2016 presidential campaign concluded with the impossible - the election of billionaire non-politician Donald J. Trump. The 2020 campaign saw Trump lose to former Vice-President Joe Biden because of Trump's chaos and the COVID pandemic. The 2024 campaign revealed another seemingly impossible outcome - the return of Trump by defeating Vice-President Kamala Harris. How did Trump do that? This book chronicles the 2024 presidential election, written contemporaneously with events to capture the moment, praising and criticizing all concerned as even-handedly as humanly possible. As a chronicle, no attempt is made to correct the record in light of later revealed truths. That is a task for later historians. But later-revealed truths cannot explain how voters and the media felt in the moment, which often determines what follows. Anyone seeking to understand the course of events leading to Donald Trump's re-election will find the reading interesting, infuriating, sometimes humorous, and hopefully illuminating. This book does not explain

fully how Trump won again, but it is an important start to answering that question.

connections answers 22 october 2024: A World of Wounds Nancy J. Manring, 2025-11-04 At the end of the Reagan administration, American public opinion polls showed there were no discernible differences based on political party in response to the question, Do you consider yourself an environmentalist? However, in the early 1990s, a partisan gulf between conservatives and liberals emerged around environmental issues. Today, half as many Republicans self-identify as environmentalists when compared to Democrats. Political stagnation on climate action, in turn, has led to a growing number of Americans of all ages who experience ecological grief (known as solastalgia) and eco-anxiety (a chronic fear of environmental doom). These emotions emerged in response to the existential distress associated with living in a world of relentless environmental damage and irreversible ecological losses: a world of wounds. This book offers an antidote to political frustration and hopelessness. Nancy J. Manring provides an indispensable analysis of the multi-decade, conservative war against American environmentalism and maps out realistic strategies for rebuilding a bipartisan environmental movement. Nurturing authentic hope, in contrast to blind optimism or false promises, begins with an unflinching look at both planetary and political realities. Choosing authentic hope is an ongoing process that requires emotional honesty, courage, and action. This forceful book serves as both a tool for change and a spirited scholarly intervention.

connections answers 22 october 2024: Start Making Sense Steven J. Heine, 2025-01-28 A beautiful, deep, thoughtful (Angela Duckworth, New York Times-best-selling author of *Grit*) investigation into the science of why we crave meaning—and how we can pursue it in this age of anxiety. These days everyone feels on edge, panicked by climate change, political polarization, and artificial intelligence. In *Start Making Sense*, psychologist Steven J. Heine shows how to overcome our angst and live life with purpose. Heine's field, existential psychology, uses the tools of science to study the kinds of questions famously asked by existential philosophers such as Albert Camus, Jean-Paul Sartre, and Simone de Beauvoir. Who are we? Why do we seek meaning? How do we connect with one another? Drawing on decades of research, Heine provides scientifically grounded answers to these mysteries. He shows that humans evolved to seek meaning: our survival depends on our ability to make sense of an absurd world. Every day, we deploy an arsenal of psychological tactics to make and maintain meaning in our lives, from rationalizing our choices, to waxing nostalgic about the past, to defending our cultural worldviews. By understanding why and how we seek to make sense, we can live authentic lives in times that don't seem to make sense at all. This illuminating book transforms the way we understand our search for meaning and provides a blueprint for building a better life.
