Gameplay Mechanics and Features

Controls and Interface

Players typically use keyboard arrow keys or mouse movements to steer their shape left or right within the tunnel. The intuitive control scheme allows players to react quickly to incoming obstacles. The interface is clean, with no distracting elements, emphasizing the tunnel and obstacles. Speed indicators and score counters provide essential gameplay feedback without cluttering the screen.

Obstacles and Difficulty Progression

Tunnel Rush features a variety of obstacles, including walls, spikes, rotating bars, and narrow gaps.
