cnn 10 worksheet: *Foreign Aid's Effects on Development and Human Security in Kenya* John Bosco Ngendakurio, 2024-12-20 More than \$1 trillion has been transferred to Africa from rich countries in development-related aid in the last 50 years. Despite this, poverty levels continue to

surge. Using Kenya as a case study, *Foreign Aid's Effects on Development and Human Security in Kenya* by John Bosco Ngendakurio demonstrates the effects and limitations of foreign aid on development and human security in poor countries. Kenya, a sub-Saharan African country and recipient of large-scale foreign aid, is a microcosm of what is happening in Africa and a good place to start to address the following question: How does foreign aid affect human security? Through archival research and interviews, Ngendakurio identifies that the key challenges to foreign aid effectiveness in Kenya are the complexities of Kenyan human security issues, the legacies of colonialism and neo-colonial practices as well as foreign aid's controversies, including corruption, bureaucracy, donor fatigue, and international actors' hidden agendas. Providing a geopolitical analysis of the long-term effects of colonialism in Kenya, this book investigates foreign aid schemes to contribute further knowledge and firsthand accounts to reshape the processes for the benefit of both the donors and the intended beneficiaries.

cnn 10 worksheet: New Towns for the Twenty-First Century Richard Peiser, Ann Forsyth, 2021-01-01 New towns—large, comprehensively planned developments on newly urbanized land—boast a mix of spaces that, in their ideal form, provide opportunities for all of the activities of daily life. From garden cities to science cities, new capitals to large military facilities, hundreds were built in the twentieth century and their approaches to planning and development were influential far beyond the new towns themselves. Although new towns are notoriously difficult to execute and their popularity has waxed and waned, major new town initiatives are increasing around the globe, notably in East Asia, South Asia, and Africa. New Towns for the Twenty-First Century considers the ideals behind new-town development, the practice of building them, and their outcomes. A roster of international and interdisciplinary contributors examines their design, planning, finances, management, governance, quality of life, and sustainability. Case studies provide histories of new towns in the United States, Asia, Africa, and Europe and impart lessons learned from practitioners. The volume identifies opportunities afforded by new towns for confronting future challenges related to climate change, urban population growth, affordable housing, economic development, and quality of life. Featuring inventories of classic new towns, twentieth-century new towns with populations over 30,000, and twenty-first-century new towns, the volume is a valuable resource for governments, policy makers, and real estate developers as well as planners, designers, and educators.
