Thirteen Years in Charge 13 years as chancellor, Angela Merkel Decides Not to Run for Chancellor1 in 2021
FREDERIK PLEITGEN, CNN CORRESPONDENT It was the announcement that spelled the beginning of the end for the German chancellor. ANGELA MERKEL, CHANCELLOR OF GERMANY (VIA INTERPRETER) This fourth term is my last term as Chancellor of the Federal Republic of Germany. In the next Bundestag election in 2021, I will not run again as chancellor. I will not run for the German Bundestag anymore, and I will not take any other political positions. FREDERIK PLEITGEN, CNN CORRESPONDENT After 13 years as chancellor, Angela Merkel [is] saying she wants to begin a new chapter. Her decision [is] a sign of a weakened position in her party—a party that suffered poor results in a regional election this weekend. Despite recent struggles, over her long career, Angela Merkel became, arguably, the world's most powerful woman. She adopted several nicknames along the way, including “Mutti”, or “Mama” Merkel. No matter what she has been called, though, Angela Merkel has proven to be a force to be reckoned with. She grew up in East Germany under its Communist regime, studying to be a scientist. But after the Berlin Wall fell in 1989, she threw herself into the world of politics, working to reunify Germany after the Cold War. She had a knack for toppling those who underestimated her. Her mentor, the formidable Chancellor Helmut Kohl, used to tease her for her provincial manners. And yet, within a decade, she was calling for his resignation as he faced allegations of corruption. By 2005, she'd become the country's first female chancellor. Known for being pragmatic and understated, though some found her indecisive—early on, she was criticized for being slow to act and reticent to speak out. Merkel showed her resolve in 2015 when she allowed more than a million refugees—most fleeing from Syria's civil war—to cross into Germany. It was initially applauded by many Germans, but later heavily criticized by those who believed Germany was overburdened. Merkel's answer to her critics was “wir schaffen das”—we can manage. It was a decision that has come to define her political career. Merkel is one of the longest-serving leaders in Europe. She's worked alongside three U.S. presidents, four British prime ministers and four French presidents. Under her leadership, the country has grown prosperous and powerful, but Angela Merkel has also challenged Germany to open up and shoulder more responsibility for global problems. As she prepares to step down in 2021, Germany will need to decide if its new leader should continue down that path. CNN Mutti

cnn 10 today: *Middle School Today* Holly Henderson Pinter, Kim K. Winter, Kayleigh Kassel, 2025-02-18 *Middle School Today* is clustered into major themes: adolescent development and identity, the adolescent learner, curriculum and instruction, and the contemporary middle school. The book describes the components related to adolescent development starting with simple principles from psychology regarding the physical, cognitive, and social development of adolescents. The book then explores current trends in research regarding contemporary topics such as trauma informed practices, social emotional learning, and social justice. A large section of the book is devoted to curriculum and instruction. This section will reach both broadly and deeply to the ins and outs of designing instruction, implementing instruction, and assessment across all content areas. Readers will have access to resources for teacher candidates and teacher educators to utilize in practice. Finally, the book explores the historical grounding of middle level education, relying on foundational principles from the Association of Middle Level Education (AMLE) and address how teachers can connect best practices to school settings where implementing best practice may be

absent.

the Spotlight — K. M. Wright 7/4 British actor Tom Holland has swung into
the spotlight for his portrayal of a teenage Spider-Man. While many people know 23-year-old
Holland only for this role, there's so much more to the up-and-coming star. With a father who is a
comedian and author, and a mother who is a photographer, Holland was bound to be drawn to the
arts, which was first evidenced by his taking dance lessons as a child. Despite being bullied for
dancing, he never gave up on his passion, later saying, "You couldn't hit me hard enough to stop me
from doing it." His perseverance paid off because at just 10 years old, he was discovered by a
choreographer for Billy Elliot the Musical. After intense training in dance and gymnastics, he took
the lead in the show. Holland's first film came in 2012 when he starred in The Impossible, a movie
about a family caught in Thailand's 2004 tsunami. His moving performance as a brave but terrified
young boy won him praise and several awards, including the National Board of Review Award for
Breakthrough Performance. Following this impressive start, Holland went on to act in a variety of
films until he got his big break—being chosen to play Spider-Man in the Marvel Cinematic Universe.
O
7/5 Landing the role of Spider-Man
was a dream come true for Holland, who was so obsessed with the superhero that he ran around in
at least 30 different Spider-Man suits during his childhood. It wasn't just his love of the character
that won him the part, though. The young actor says he can relate to Peter Parker because neither of
them was ever "the cool kid at school." On top of that, the acrobatic skills he continues to develop
allow him to execute some of his own stunts. Holland was widely applauded for his energetic
performance in Spider-Man: Homecoming in 2017, even receiving a BAFTA Rising Star Award. His
success launched him into stardom, but he's made sure not to let it go to his head because he knows
that "the terrible thing about being famous is you start to believe it." This self-awareness, along with
reminders from his dad, has helped him stay grounded. This month, Holland is back again in
Spider-Man: Far From Home, in which the teenage superhero faces off against villains during a
school trip to Europe. With several other movies lined up for the promising young actor, our Spidey
sense tells us that this is just the start of a brilliant career.

cnn 10 today: The Great Gatsby meets Alain Badiou Ursula Vooght, 2023-12-21 The subject
of this book is a consideration of the usefulness of the concept of fidelity put forward by the

philosopher Alain Badiou in the discussion of film adaptation. Fidelity or faithfulness is primarily a consideration that emerges in relation to so-called canonical texts in adaptation: Fitzgerald's *The Great Gatsby* occupies a position of global recognisability and, within the United States, cultural mythology that has triggered strong reactions to the four Hollywood adaptations. The various adaptations allow for the differing approaches to the adaptation of this novel to be meaningfully explored. The film adaptations' paratextual elements will be discussed in order to show how these acted as limiting lenses. The strategies of the films for handling elements of Fitzgerald's prose and themes will be compared across the adaptations. This will culminate in an assertion of the worth of a larger application of a Badiouian fidelity within the field.

cnn 10 today: Smart Techniques for a Smarter Planet Manoj Kumar Mishra, Bhabani Shankar Prasad Mishra, Yashwant Singh Patel, Rajiv Misra, 2019-01-29 This book is intended to provide a systematic overview of so-called smart techniques, such as nature-inspired algorithms, machine learning and metaheuristics. Despite their ubiquitous presence and widespread application to different scientific problems, such as searching, optimization and /or classification, a systematic study is missing in the current literature. Here, the editors collected a set of chapters on key topics, paying attention to provide an equal balance of theory and practice, and to outline similarities between the different techniques and applications. All in all, the book provides an unified view on the field on intelligent methods, with their current perspective and future challenges.

cnn 10 today: The Eleventh Day Anthony Summers, Robbyn Swan, 2012-08-14 FINALIST FOR THE PULITZER PRIZE For most living Americans, September 11, 2001, is the darkest date in the nation's history. But what exactly happened on 9/11? Could it have been prevented? And what remains unresolved? Here is the first panoramic, authoritative account of that tragic day—from the first brutal actions of the hijackers to our government's flawed response; from the untruths told afterward by U.S. officials to the "elephant in the room" of the 9/11 Commission's report—the clues that point to foreign involvement. New York Times bestselling authors Anthony Summers and Robbyn Swan write with access to thousands of recently released official documents, raw transcripts, fresh interviews, and the perspective that can come only from a decade of research and evaluation. Riveting, revelatory, and thoroughly sourced, *The Eleventh Day* is updated for this edition—with new reporting on a development that the former cochairman of Congress's 9/11 probe calls the most important in years. This is the essential one-volume work, required reading for us all. "Essential."—*The Wall Street Journal* "Meticulous, comprehensive . . . an extraordinary synthesis."—John Farmer, 9/11 Commission senior counsel "This wide-angle look . . . examines the personalities behind the terror plot, U.S. intelligence blunders, the toxic environmental impact on first responders, the march to war, [and] gray areas in the 9/11 Commission Report."—*The Washington Post* "The best available general account of 9/11—soberly written, judiciously weighed, meticulously sourced."—*The Sunday Times*

cnn 10 today: Fires in Our Lives Kathleen Cushman, Kristien Zenkov, Meagan Call-Cummings, 2020-12-01 A sequel to the classic *Fires in the Bathroom* that illuminates what adolescents most need from teachers in today's upsetting times The context in which adolescents are learning has shifted radically since students first offered blunt advice to high school teachers in the groundbreaking *Fires in the Bathroom*, a perennial bestseller. Now their world is changing at warp speed, and classrooms too are seething with anxiety. This sequel raises the voices of diverse youth

around the nation as they live through the mind-bending quandaries of this era and ask their teachers to notice. In *Fires in Our Lives*, Kathleen Cushman and her co-authors Kristien Zenkov and Meagan Call-Cummings (both leaders in bringing student voices to teacher education) present new first-person testimony on how today's youth experience the risks and challenges of high school. The students who speak here need their teachers more than ever as they navigate cultural, social, and political borders in their communities. Reinforced by classroom examples and supplemented with helpful takeaways, *Fires in Our Lives* offers a compelling dialogue about students' emotions, ideas, and developing agency. In a world that sorely needs the thoughtful participation of its rising generation, this new staple belongs on every high school teacher's bookshelf.

cnn 10 today: *The Tweets of President Donald J. Trump* Forefront Books, 2020-07-28 Love them or hate them, the tweets of President Donald J. Trump rule the Twitterverse. Until our last presidential campaign, television, particularly campaign ads, dominated the political landscape. But with the rise of Donald J. Trump came a new political tool: the internet. Trump used this to communicate instantly and very effectively with the American people. And it worked. Establishing his political positions by tweeting numerous times a day, Trump pulled a major upset by defeating Hillary Rodham Clinton to become the 45th president of the United States. Once in office, Trump did not abandon his penchant for using Twitter as his populist platform. Instead, he doubled down on it, making it his primary means of communicating with the American people. Knowing how effective a tweet can be, Trump once wrote, "Boom. I press it and within two seconds we have breaking news." With a massive Twitter following of 78 million by the spring of 2020, Trump's direct impact upon Americans cannot be dismissed, nor can the value of his tweets as an essential part of the historical record be denied. To put the enormous impact of his tweets into perspective, Trump won the White House with 63 million votes—a number significantly lower than his massive Twitter following. Now you can read the collected tweets from President Donald J. Trump, from his inauguration through February 2020 in this historically significant collection.

cnn 10 today: *Third International Conference on Image Processing and Capsule Networks* Joy Long-Zong Chen, João Manuel R. S. Tavares, Fuqian Shi, 2022-07-28 This book provides a collection of the state-of-the-art research attempts to tackle the challenges in image and signal processing from various novel and potential research perspectives. The book investigates feature extraction techniques, image enhancement methods, reconstruction models, object detection methods, recommendation models, deep and temporal feature analysis, intelligent decision support systems, and autonomous image detection models. In addition to this, the book also looks into the potential opportunities to monitor and control the global pandemic situations. Image processing technology has progressed significantly in recent years, and it has been commercialized worldwide to provide superior performance with enhanced computer/machine vision, video processing, and pattern recognition capabilities. Meanwhile, machine learning systems like CNN and CapsNet get popular to provide better model hierarchical relationships and attempts to more closely mimic biological neural organization. As machine learning systems prosper, image processing and machine learning techniques will be tightly intertwined and continuously promote each other in real-world settings. Adopting this trend, however, the image processing researchers are faced with few image reconstruction, analysis, and segmentation challenges. On the application side, the orientation of the image features and noise removal has become a huge burden.

cnn 10 today: *Speak Not* James Griffiths, 2021-10-21 A New Yorker Best Book of 2022 A Globe & Mail Book of the Year A stimulating work on the politics of language. LA Review of Books As globalisation continues languages are disappearing faster than ever, leaving our planet's linguistic

diversity leaping towards extinction. The science of how languages are acquired is becoming more advanced and the internet is bringing us new ways of teaching the next generation, however it is increasingly challenging for minority languages to survive in the face of a handful of hegemonic 'super-tongues'. In *Speak Not*, James Griffiths reports from the frontlines of the battle to preserve minority languages, from his native Wales, Hawaii and indigenous American nations, to southern China and Hong Kong. He explores the revival of the Welsh language as a blueprint for how to ensure new generations are not robbed of their linguistic heritage, outlines how loss of indigenous languages is the direct result of colonialism and globalisation and examines how technology is both hindering and aiding the fight to prevent linguistic extinction. Introducing readers to compelling characters and examining how indigenous communities are fighting for their languages, Griffiths ultimately explores how languages hang on, what happens when they don't, and how indigenous tongues can be preserved and brought back from the brink.

cnn 10 today: Transnational Commercial Disputes in an Age of Anti-Globalism and Pandemic Sundaresh Menon, Anselmo Reyes, 2023-01-12 In this book, senior judges and academics at the forefront of transnational commercial law in Asia, Australia, Europe, the US, and elsewhere, reflect on the implications of anti-globalism and the COVID-19 pandemic on international commercial dispute resolution (ICDR). The chapters consider: (1) What types of cross-border commercial disputes will arise in the future and what resources will be needed to respond to them in a cost-effective, time-efficient, and equitable manner? (2) Is there still merit in a multilateral approach to transnational commercial law and ICDR, despite the closing of borders, the rise of protectionism, and the disruption of global supply chains? (3) What reforms and innovations should courts, arbitrators, and mediators contemplate when navigating the post-pandemic landscape? (4) Can the accelerated use of remote technology in ICDR (as prompted by the pandemic) be leveraged to enhance access to justice for all? With a focus on the current crisis in globalism, as well as the associated problems of ensuring justice and fairness in the resolution of cross-border commercial and investment-state disputes along the Belt-and-Road and elsewhere, the book will be an invaluable resource for academics, judges and practitioners alike.

cnn 10 today: *Environmental Communication for Children* Erin Hawley, 2022-09-05 This book explores the nexus between children, media, and nature during a time of planetary crisis marked by climate change, biodiversity loss, and environmental degradation. In this time of planetary emergency, children have become an increasingly visible part of conversations about the human/nature relationship – they have also become an important market for environmentally-themed media content. Indeed, recent years have seen a proliferation of environmental texts, products, and narratives for young people: children are recognised and addressed as audiences for environmental content across a range of media including news, films, television programs, magazines, videogames, and transmedia franchises. Through analysis of a range of case studies, this book examines the construction of children as green audiences, the intersection between media and environmental literacies, and the mainstreaming of children's voices in environmental communication. The book will appeal to readers with an interest in children's media and the industry imperatives that shape

the production of children's culture as well as to students, scholars, and practitioners in the field of environmental communication.
