cool math games to play: *Voices and Visions from Ethnoculturally Diverse Young People with Disabilities* Amanda Ajodhia-Andrew, 2015-12-22 Many Canadian children from minority status groups experience long-term academic complexities, influencing their sense of school belonging and engagement. Research demonstrates children with intersecting differences of race,

ethnicity, language, and disability, and those in their middle years (10–13 years old), undergo heightened academic challenges. Yet, what are children with disabilities' personal schooling experiences, and how may these insights support inclusive learning, teaching, and sense of belonging? Within Toronto, one of the most diverse Canadian cities, this book explores the stories and experiences of six middle years children with intersecting differences of race, ethnicity, language, and disabilities (particularly autism). Through narrative and critical discourse analysis research methods the children's views were accessed via a mosaic multi-method data collection approach, including their own photography, drawings, journal writings, imaginative story games, and interview texts. The children's narratives illustrate their understandings of differences, learning, and inclusion. This book presents innovative insights highlighting the voices of children with disabilities as they navigate through complex issues of diversity and share how these impact their understandings and experiences of school inclusion and exclusion. The author advocates inviting the voices of children with intersecting differences into educational conversations and research processes, as they may adeptly advance areas of inclusion and diversity.

Whether they're going to the Zoo; hosting a video game party; deciding which music video to watch first; visiting Papa at work; trying to cross a muddy path in the Nature Walk; reading a popular series of books; posting pictures on social media websites; dancing a Zumba workout; or making a Fathers Day card, the activities and mishaps recounted in this book may help you to better appreciate the joy, wonder, and beauty of young people and reinforce your belief in the ultimate and indispensable value of FAMILY.
