comedic monologues from disney movies: *The Rise of Cable Programming in the United States* Megan Mullen, 2009-06-23 Winner, McGannon Communications Research Award, 2004 In 1971, the Sloan Commission on Cable Communications likened the ongoing developments in cable television to the first uses of movable type and the invention of the telephone. Cable's proponents in

the late 1960s and early 1970s hoped it would eventually remedy all the perceived ills of broadcast television, including lowest-common-denominator programming, inability to serve the needs of local audiences, and failure to recognize the needs of cultural minorities. Yet a quarter century after the blue sky era, cable television programming closely resembled, and indeed depended upon, broadcast television programming. Whatever happened to the Sloan Commission's revolution now in sight? In this book, Megan Mullen examines the first half-century of cable television to understand why cable never achieved its promise as a radically different means of communication. Using textual analysis and oral, archival, and regulatory history, she chronicles and analyzes cable programming developments in the United States during three critical stages of the medium's history: the early community antenna (CATV) years (1948-1967), the optimistic blue sky years (1968-1975), and the early satellite years (1976-1995). This history clearly reveals how cable's roots as a retransmitter of broadcast signals, the regulatory constraints that stymied innovation, and the economic success of cable as an outlet for broadcast or broadcast-type programs all combined to defeat most utopian visions for cable programming.

comedic monologues from disney movies: Girl Warriors Svenja Hohenstein, 2019-06-07 Quest narratives are as old as Western culture. In stories like *The Odyssey*, *The Lord of the Rings*, *Star Wars* and *Harry Potter*, men set out on journeys, fight battles and become heroes. Women traditionally feature in such stories as damsels in need of rescue or as the prizes at the end of heroic quests. These narratives perpetuate predominant gender roles by casting men as active and women as passive. Focusing on stories in which popular teenage heroines--Buffy Summers, Katniss Everdeen and Disney's Princess Merida--embark on daring journeys, this book explores what happens when traditional gender roles and narrative patterns are subverted. The author examines representations of these characters across various media--film, television, novels, posters, merchandise, fan fiction and fan art, and online memes--that model concepts of heroism and girlhood inspired by feminist ideas.
