

darwin awards facts

darwin awards facts reveal intriguing insights into human behavior, risk-taking, and the often unexpected consequences of ill-advised decisions. The Darwin Awards, named after Charles Darwin, humorously honor individuals who inadvertently contribute to the gene pool by removing themselves in spectacularly foolish ways. This article explores the origins, criteria, and notable examples of Darwin Awards, providing a comprehensive understanding of these unusual recognitions. By examining darwin awards facts, readers can gain perspective on common patterns in human error and the cultural impact of these stories. Additionally, the article delves into the ethics and controversies surrounding the awards. The following content is structured to guide readers through the most important aspects of Darwin Awards, enhancing both knowledge and awareness of this unique phenomenon.

- Origin and History of the Darwin Awards
- Criteria and Selection Process
- Notable Darwin Awards Cases
- Cultural Impact and Media Presence
- Ethical Considerations and Controversies

Origin and History of the Darwin Awards

The Darwin Awards were conceived in the mid-1990s as a way to highlight the ironic and often tragic consequences of reckless behavior. These awards are named after Charles Darwin, the father of evolutionary theory, as a tongue-in-cheek recognition of individuals who supposedly improve the human gene pool by removing themselves from it through fatal mistakes. The concept quickly gained popularity through internet forums and newsletters before becoming a widely recognized cultural phenomenon. Originating as an informal competition to share bizarre and fatal stories, the Darwin Awards have since been compiled into books and referenced in various media.

Early Development

The initial idea for the Darwin Awards was popularized by Wendy Northcutt, who began collecting stories of fatal blunders that were both tragic and absurd. Her work helped formalize the awards, setting guidelines for what constitutes a legitimate Darwin Award candidate. The awards emphasize humor and irony, celebrating the unintended consequences of poor judgment rather than mocking the individuals involved. Over time, the Darwin Awards became a symbol for cautionary tales about human error and risk-taking.

Evolution Over Time

Since their inception, the Darwin Awards have evolved from informal anecdotes to a curated collection of documented incidents. The rise of digital media and social networks has expanded the reach of Darwin Awards facts, allowing for a larger audience and increased submissions. This proliferation has also encouraged more rigorous verification processes to maintain credibility and authenticity.

Criteria and Selection Process

Understanding the criteria for Darwin Awards is essential for grasping how these recognitions are awarded. The selection process is deliberate, focusing on specific factors that qualify an incident as a legitimate Darwin Award case. The criteria emphasize fatal or near-fatal consequences resulting from exceptionally poor decisions or foolish behavior. This section outlines the primary requirements and the methodology used to evaluate candidates.

Essential Criteria

To qualify for a Darwin Award, an incident must meet several key conditions. These include:

- **Self-Selection:** The individual must cause their own demise or sterilization through their actions.
- **Verifiability:** The event must be supported by credible evidence or reliable reporting.
- **Unintentionality:** The act must be accidental, without intent to cause harm or death.
- **Foolishness:** The behavior must display a significant lack of common sense or judgment.
- **Exclusion of Victims:** No innocent bystanders should be harmed in the incident.

Verification and Documentation

Submissions for Darwin Awards undergo a verification process to confirm the authenticity of the story. This includes cross-referencing news reports, eyewitness accounts, and official records where available. The goal is to ensure that only genuine cases, free from exaggeration or fabrication, receive recognition. This vetting process maintains the awards' credibility and supports their educational and cautionary value.

Notable Darwin Awards Cases

Darwin Awards facts include a wide range of bizarre and often tragic incidents that illustrate human folly. Some cases have become iconic examples, showcasing the extremes of poor decision-making. Highlighting several notable examples helps demonstrate the diversity and severity of the behaviors that lead to these awards.

Famous Cases

Examples of well-documented Darwin Awards include:

- **The Rocket Car:** An individual strapped a rocket to a vehicle in an attempt to achieve extreme speeds, resulting in a fatal crash due to loss of control.
- **Self-Inflicted Explosion:** A person attempting to fix a gas leak with an open flame caused an explosion, leading to their demise.
- **Elevator Incident:** A man tried to jump between elevator cars and fell to his death, illustrating a dangerous overestimation of physical ability.
- **DIY Electrical Work:** An individual attempted unauthorized electrical repairs without proper safety precautions, resulting in fatal electrocution.

Patterns in Behavior

Analysis of Darwin Awards facts reveals common themes such as disregard for safety warnings, overconfidence, and ignorance of basic physical laws. Many incidents involve alcohol or drug impairment, contributing to poor judgment. Recognizing these patterns aids in understanding how such fatal mistakes occur and underscores the importance of caution and awareness in daily life.

Cultural Impact and Media Presence

The Darwin Awards have had a significant cultural impact, influencing public perception of risk and human error. Their presence in media, literature, and online communities reflects society's fascination with extraordinary yet avoidable incidents. This section explores how Darwin Awards facts have permeated popular culture and the ways they serve as both entertainment and educational tools.

Media and Publications

The Darwin Awards have been featured in books, television shows, and documentaries, often highlighting the most astonishing cases. These portrayals blend humor with cautionary messaging, attracting broad audiences. The awards have also inspired

numerous websites dedicated to sharing verified stories, contributing to an ongoing dialogue about safety and responsibility.

Societal Reflection

By spotlighting extreme examples of human error, Darwin Awards facts encourage reflection on decision-making and risk management. They serve as modern fables, warning against reckless behavior while reinforcing societal norms about safety. The popularity of these stories indicates a collective interest in understanding the limits of human judgment and the consequences of ignoring them.

Ethical Considerations and Controversies

Despite their widespread appeal, Darwin Awards facts also raise ethical questions regarding respect for the deceased and the potential for sensationalism. This section addresses the controversies surrounding the awards and the debates over their appropriateness as a form of public commentary.

Respect for Victims and Families

Critics argue that the humorous framing of fatal incidents can be insensitive to victims' families and friends. The balance between dark humor and respect is delicate, and the awards strive to avoid direct ridicule of individuals while focusing on the cautionary aspects of their stories. Ethical considerations emphasize sensitivity and discretion in sharing these accounts.

Accuracy and Verification Challenges

Ensuring the accuracy of Darwin Awards facts is challenging due to the nature of the stories, which can be prone to exaggeration or mythologizing. The awards' reliance on verified cases attempts to mitigate misinformation, but some skepticism remains. Maintaining rigorous standards is essential to uphold the integrity and educational value of the Darwin Awards.

Frequently Asked Questions

What are the Darwin Awards?

The Darwin Awards are a humorous honor recognizing individuals who have supposedly contributed to human evolution by removing themselves from the gene pool through their own foolish actions.

When were the Darwin Awards first introduced?

The Darwin Awards were first introduced in 1985 by Wendy Northcutt, who later published several books compiling stories of such incidents.

Are Darwin Awards real scientific awards?

No, Darwin Awards are not official scientific awards; they are a satirical concept highlighting extreme cases of human error leading to accidental death or sterilization.

What criteria must an incident meet to be considered for a Darwin Award?

To be considered, the incident generally must involve an individual eliminating themselves from the gene pool through an absurdly foolish action, be verified, and the act must be unintentional and result in death or inability to reproduce.

Can Darwin Awards be given posthumously?

Yes, since the Darwin Awards often involve fatal accidents, they are typically awarded posthumously to individuals who died due to their own reckless behavior.

Are Darwin Awards limited to any particular country or culture?

No, Darwin Awards stories come from all over the world, as human folly is a universal phenomenon, though most documented cases are from English-speaking countries due to the awards' origin.

Do Darwin Awards encourage dangerous behavior?

No, Darwin Awards are meant to be humorous and cautionary tales discouraging reckless behavior by highlighting the consequences of extreme foolishness.

Where can one find official Darwin Awards stories?

Official Darwin Awards stories can be found on the Darwin Awards website (darwinawards.com) and in books authored by Wendy Northcutt compiling verified incidents.

Additional Resources

1. The Darwin Awards: Evolution in Action

This book chronicles some of the most outrageous and bizarre cases where individuals have inadvertently removed themselves from the gene pool through their own foolish actions. It combines humor with cautionary tales, highlighting the importance of common sense and survival instincts. Readers will find a mix of true stories that range from the

absurd to the downright unbelievable.

2. *Darwin Awards 10: The Countdown*

As the tenth installment in the popular series, this book features a new collection of stories showcasing the ultimate examples of human error. Each tale is carefully researched and presented with wit and insight, emphasizing how sometimes evolution seems to take a step forward thanks to sheer stupidity. It's a compelling read for those fascinated by human behavior and the limits of logic.

3. *Darwin Awards: The Science of Stupidity*

This title delves into the psychological and scientific explanations behind why some people make catastrophic decisions. By examining Darwin Awards cases through the lens of behavioral science, the book offers readers a deeper understanding of cognitive biases, risk assessment failures, and the consequences of impulsive actions. It's both educational and entertaining.

4. *Darwin Awards: True Stories of Human Folly*

A collection of true stories highlighting the most infamous and shocking Darwin Awards recipients. The book presents each story with background context and explores the finer points of human error that led to their demise. It serves as a humorous yet sobering reminder of the importance of thinking before acting.

5. *The Darwin Awards Anthology: Legends of Evolution*

This anthology brings together the best and most memorable Darwin Awards stories from various authors and contributors. Spanning decades, it captures the essence of human folly across different cultures and time periods. Readers can enjoy a diverse range of narratives that celebrate the quirky side of natural selection.

6. *Darwin Awards and the Art of Survival*

Focusing on the lessons learned from Darwin Award incidents, this book blends storytelling with practical advice on safety and decision-making. It encourages readers to recognize risky behaviors and avoid the pitfalls that have claimed the lives of others. The narrative balances humor with valuable survival insights.

7. *Darwin Awards: Evolution's Hilarious Side*

This book highlights the comedic aspects of Darwin Award tales, making it a light-hearted read for those who appreciate dark humor. Each story is recounted with a witty tone, emphasizing the absurdity of the situations without downplaying their seriousness. It's perfect for readers who enjoy humor rooted in real-life events.

8. *Darwin Awards: Cautionary Tales of Common Sense Gone Wrong*

A compilation of stories that emphasize the consequences of neglecting basic common sense. This book aims to educate readers by showcasing how simple awareness and prudence could have prevented many of these fatal mistakes. It's an insightful resource that combines entertainment with practical lessons.

9. *The Darwin Awards Survival Guide*

Designed as a companion to the stories of Darwin Award recipients, this guide offers tips and strategies for avoiding dangerous decisions. It breaks down common themes found in the incidents and provides actionable advice to help readers stay safe in everyday situations. The book serves as both a humorous and informative manual for personal

safety.

darwin awards facts: The Darwin Awards Wendy Northcutt, 2002-04-30 The hilarious New York Times bestselling phenomenon and the perfect funny gift! The Darwin Awards shares the stories of those human beings who improve the gene pool by removing themselves from it in a sublimely idiotic fashion. Marvel at the thief who tries to steal live electrical wires. Gape at the lawnchair jockey who floats to a height of 16,000 feet suspended by helium balloons. And learn from the man who peers into a gasoline can using a cigarette lighter. All contend for Darwin Awards when their choices culminate in magnificent misadventures. These tales of trial and awe-inspiring error-verified by the author and endorsed by website readers-illustrate the ongoing saga of survival of the fittest in all its selective glory. The Darwin Awards vividly portrays the finest examples of evolution in action, and shows us just how uncommon common sense can be.

darwin awards facts: The Darwin Awards II Wendy Northcutt, 2001-12-01 The hilarious New York Times bestselling phenomenon and the perfect funny gift! The Darwin Awards II: Unnatural Selection brings together a fresh collection of the hapless, the heedless, and the just plain foolhardy among us. Salute the owner of an equipment training school who demonstrates the dangers of driving a forklift by failing to survive the filming of his own safety video. Gawk at the couple who go to sleep on a sloping roof. Witness the shepherd who leaves his rifle unsecured—only to be accidentally shot by one of his own flock. With over one hundred Darwin Award Winners, Honorable Mentions, and debunked Urban Legends, plus science and safety tips for avoiding the scythe of natural selection, The Darwin Awards II proves once again how uncommon common sense can be.

darwin awards facts: Attack of the Killer Facts! Eric Gryzymkowski, 2011-04-18 Factoid Attack: Inherent sadistic streak in dentists confirmed! The electric chair was invented by a dentist, Dr. Alfred Southwick. Not surprising, dentists have been perfecting torture devices for centuries. Factoid Attack: Galaxy at risk! Intelligent life in short supply! In 1961, Astronomer Frank Drake estimated the number of probable intelligent civilizations inhabiting our galaxy. Using conservative numbers, that estimate came to 10,000. Unfortunately, we are not included in that total. Factoid Attack: Colorblind bulls hate all matadors equally! The color of a matador's cape, or muleta, is traditionally red, which is widely believed to irritate the bull. In reality, bulls are colorblind, so it is irrelevant what color cape a matador uses to antagonize them. Shot in the dark, but maybe it's the being stabbed with swords bit that pisses them off. Forget Fringe, Warehouse 13, and The X-Files. In this book, you'll find more weird and wacko truths than in all those combined. From golden poison dart frogs with enough venom to kill ten grown humans to cockroaches that can survive radiation 15 times stronger than what kills people, scary and strange just got scarier—and stranger!

darwin awards facts: The Darwin Awards III Wendy Northcutt, 2004-09-28 The hilarious New York Times bestselling phenomenon and the perfect funny gift! Honoring those who improve our gene pool by inadvertently removing themselves from it, The Darwin Awards III includes more than one hundred brand new, hilariously macabre mishaps and misadventures. From a sheriff who inadvertently shot himself twice, to the insurance defrauder who amputated his leg with a chainsaw; from a farmer who avoided bee stings by sealing his head in a plastic bag to the man crushed by the branch he just trimmed, The Darwin Awards III proves again that when it comes to stupidity, no

species does it like we do. Featuring scientific and safety discussions and filled with illustrations depicting inspiring examples of evolution in action, *The Darwin Awards III* shows once more how uncommon common sense still is.

darwin awards facts: *The Darwin Awards 4* Wendy Northcutt, Christopher M. Kelly, 2007-10-30 The hilarious New York Times bestselling phenomenon and the perfect funny gift! The Darwin Awards series is the alpha chimp of humorous human mishaps. Despite being an international bestseller and inspiring the movie *The Darwin Awards*, these hilarious, cautionary chronicles have failed to stop another generation of Darwin Award winners from steering motorcycles with their feet, heating lava lamps on stoves, using liquid soap as brake fluid, and drowning themselves in the kitchen sink. Filled with more than 100 new tales of evolution in action, plus science essays and a parody research paper supporting Intelligent Design, *The Darwin Awards 4* shows that when it comes to common sense, natural selection still has a long, long way to go.

darwin awards facts: *The Darwin Awards Countdown to Extinction* Wendy Northcutt, 2010-10-28 The hilarious New York Times bestselling phenomenon and the perfect funny gift! The Darwin Awards are more than just a brand. They're a pop culture phenomenon. With six books and a website that draws in more than a million unique visitors every month, the Darwin Awards rivals *The Onion* and *The Simpsons* as one of the biggest humor franchises in the world. Fully illustrated and featuring all-new tales of the marvelously macabre, *The Darwin Awards Countdown to Extinction* chronicles the astonishing acts of individuals who have taken a swan dive into the shallow end of the gene pool. From attaching a five-horsepower engine to a barstool, to hammering a metal hook into an explosive device, to using a taser to treat a snake bite, these gloriously gruesome incidents prove that the countdown (to human extinction) is well under way. And we won't exit this mortal coil without one last laugh.

darwin awards facts: *The Darwin Awards Next Evolution* Wendy Northcutt, 2008 Features examples of people whose lack of common sense resulted in their demise, in a tribute to how the evolutionary process is improved when individuals of questionable intelligence accidentally remove themselves from the gene pool.

darwin awards facts: *Mind-Blowing Facts About the Planet's Strangest Animals* Kylie Marin Keen, 2023-11-21 The Animal Kingdom's Best-Kept Secrets You've heard of the blobfish—but what about the northern glass frog, which has skin so translucent you can see its heart? Or the common egg-eater snake, which has a specialized spine to crush eggs after swallowing them? Or even the sea potato, a round brown ball of a creature that creates elaborate tunnel systems under the ocean floor? Dive into a world of obscure, fantastic and downright- weird wildlife, with YouTuber and Animal Fact Files creator Kylie Keen as your guide. This captivating collection of unusual animal facts transports you across countries and continents to learn about the little-known creatures that call our planet home. You'll discover a plethora of animal behaviors, diets, habitats and more in this exciting collection of over 60 fuzzy, scaly and feathered friends. From deep insights about human-animal relationships to playful fun facts about the world's most peculiar fauna, Kylie's approachable, thorough profiles are exciting for kids and adults alike. Consider this a must-have in the library of anyone who wants to be wowed by the unexpected vastness and variety of the natural world.

darwin awards facts: *Human Interface and the Management of Information: Information, Design and Interaction* Sakae Yamamoto, 2016-07-04 The two-volume set LNCS 9734 and 9735 constitutes the refereed proceedings of the Human Interface and the Management of Information thematic track, held as part of the 18th International Conference on Human-Computer Interaction, HCII 2016, held in Toronto, Canada, in July 2016. HCII 2016 received a total of 4354 submissions of which 1287 papers were accepted for publication after a careful reviewing process. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas This volume contains papers addressing the

following major topics: information presentation; big data visualization; information analytics; discovery and exploration; interaction design, human-centered design; haptic, tactile and multimodal interaction.

darwin awards facts: Leading Wisely Manfred F. R. Kets de Vries, 2022-01-24 Discover true leadership with this actionable guide from a world renowned leadership expert, psychoanalyst, and executive coach In Leading Wisely: Becoming a Reflective Leader in Turbulent Times, renowned leadership expert, psychoanalyst and executive coach Manfred Kets De Vries delivers an insightful and unique exploration of what it means to lead with wisdom. The book demonstrates that exclusive reliance on knowledge, data, and information yields a superficial leadership style lacking in depth and discernment. What's more important in the wisdom equation is possessing humility, judgment, empathy, compassion, and night vision. With eleven chapters full of anecdotes and tales from a variety of spiritual and cultural traditions that enrich and lend a deeper significance to the choices we make as leaders and members of organizations, Leading Wisely provides readers with: A thorough exploration of dealing with negative—but entirely natural motivations, like envy and greed An emphasis on the Golden Rule—treating others as we like to be treated ourselves An opportunity to be courageous—to consciously and intentionally pick our battles, saving energy for what really matters Lessons on how to listen intently and actively, truly hearing what our colleagues, friends, family, and followers are saying before reacting Finding happiness within ourselves Leading Wisely: Becoming a Reflective Leader in Turbulent Times is a startlingly incisive book, filled with messages that make the book required reading for anyone in a position of leadership or power. It also belongs in the libraries of well-being and health practitioners who frequently deal with businesspeople as clients or patients.

darwin awards facts: Fact Hunt Larry Bundy Jr, 2020-02-06 A bumper collection of facts about video games from YouTuber extraordinaire, Larry Bundy Jr, this book will debunk myths and urban legends, delve into developers' biggest successes and failures, explore the odd characters behind the games and unearth the obscure, the forgotten, the cancelled and the abandoned aspects of the gaming world. For the past decade, Larry has painstakingly trawled through countless old magazines, routinely harassed developers, and blackmailed journalists to uncover these amazing tidbits and anecdotes that would have fallen by the wayside of history. Now he has compiled them into a fun, full-colour book with sections on botched game launches, pointless peripherals, unreleased video game movies, weird guest fighters and much, much more. Along the way, he has invited a few famous gaming guests, including Stuart Ashen and Did You Know Gaming?, to provide their favourite quips for your personal perusal. So whatever your level of knowledge about video games, you're guaranteed to learn a ton of entertaining new information.

darwin awards facts: The Darwin Awards 3 Wendy Northcutt, 2003 A satirical award celebrating the worst examples of human intelligence features stories about the man who used a cigarette lighter to check his gas level, the terrorist who opened his own letter bomb, and other stories of human idocy.

darwin awards facts: The Caine Prize for African Writing 2013 Caine Prize, 2013 Now in its fourteenth year, the Caine Prize for African Writing is Africa's leading literary prize for short stories.

NMM is a monthly magazine with interviews, reviews, and special features. Each magazine comes with a CD of 15-24 songs by well-established bands, unsigned bands and everything in between. It is published by CMJ Network, Inc.

darwin awards facts: Stupid Mistakes People Make Which Result in Bodily Harm and Suggestions as to How to Avoid Becoming One of the Statistics Dr. George L. Lucas, MD, 2021-12-20 Stupid Mistakes People Make Which Result in Bodily Harm and Suggestions as to How to Avoid Becoming One of the Statistics By: Dr. George L. Lucas, MD Dr. George L. Lucas, MD practiced orthopedic surgery for fifty years. During that time, he treated thousands of people who were injured in a variety of ways. Orthopedic surgeons treat patients with infections, arthritis,

congenital deformities, tumors, and developmental problems, but the bulk of an orthopedist's work involves caring for trauma patients, i.e., those who have been injured as a result of their own misadventures or those of others, such as a drunk driver. His two years as a navy surgeon during the Vietnam War brought another category of victims. Regardless of injury mechanics, one wonders how people could get into such a fix, and Dr. Lucas began to wonder about the statistics of being injured in various ways. This curiosity turned into a collection of accidents in various categories of injury and has resulted in a collection of sixteen chapters for different types of injury, auto accidents, falls, home, and industrial accidents etc. Statistics can be a bit dry, so each chapter is illustrated with an anecdote from Dr. Lucas's personal experience. He expresses his empathy for all his patients, regardless of what stupidity brought them to his door, and concludes each chapter with some suggestions as to how to avoid becoming one of the statistics themselves.

darwin awards facts: Education Deform James M. Kauffman, 2002 According to James M. Kauffman, too much of what is said today about educational reform is nonsense that shortchanges students, parents, and taxpayers. This deforms education rather than reforming it. The primary objective of this book is to help teachers, teacher educators, policy makers, and parents think more critically about current rhetoric about education. Reason and science in the enlightenment tradition are more helpful in reforming and improving education than political agendas. Reform should focus on instruction. Education must address the full range of learners, from those who are mentally retarded to those who are intellectually gifted. Special education, multicultural education, and standardized testing are among the controversial issues explored. Extremes of both left and right ideologies are rejected in favor of careful thinking and sound judgment.

darwin awards facts: Computing the Mind Shimon Edelman, 2008-09-08 In a culmination of humanity's millennia-long quest for self knowledge, the sciences of the mind are now in a position to offer concrete, empirically validated answers to the most fundamental questions about human nature. What does it mean to be a mind? How is the mind related to the brain? How are minds shaped by their embodiment and environment? What are the principles behind cognitive functions such as perception, memory, language, thought, and consciousness? By analyzing the tasks facing any sentient being that is subject to stimulation and a pressure to act, Shimon Edelman identifies computation as the common denominator in the emerging answers to all these questions. Any system composed of elements that exchange signals with each other and occasionally with the rest of the world can be said to be engaged in computation. A brain composed of neurons is one example of a system that computes, and the computations that the neurons collectively carry out constitute the brain's mind. Edelman presents a computational account of the entire spectrum of cognitive phenomena that constitutes the mind. He begins with sentience, and uses examples from visual perception to demonstrate that it must, at its very core, be a type of computation. Throughout his account, Edelman acknowledges the human mind's biological origins. Along the way, he also demystifies traits such as creativity, language, and individual and collective consciousness, and hints at how naturally evolved minds can transcend some of their limitations by moving to computational substrates other than brains. The account that Edelman gives in this book is accessible, yet unified and rigorous, and the big picture he presents is supported by evidence ranging from neurobiology to computer science. The book should be read by anyone seeking a comprehensive and current introduction to cognitive psychology.

darwin awards facts: History's Greatest Automotive Mysteries, Myths and Rumors Revealed Matt Stone, Preston Lerner, 2012-11-05 Chock-full of amusing car-related trivia and miscellany. —Detroit News Did you know that after James Dean's death behind the wheel of his Porsche 550 Spyder, parts of the car were sold off, and said parts then cursed their new owners? (Or did they?) Did you know Bonnie and Clyde stole Ford V-8s almost exclusively as getaway cars because they were the fastest cars of their day—and that Clyde wrote Henry Ford a thank-you note? Did you know that a monkey by the name of Jocko Flocko once won a Grand National race? (NASCAR Hall of Fame driver Tim Flock helped.) trunkful of trivia: What was the first car to break the sound barrier? Who won the first Indy 500? What kind of car was dancer Isadora Duncan in when she was killed? What car performed the most spectacular stunt in the James Bond movie oeuvre? In all of these cases, the answers may not be what you think. Entertaining stories of vehicular crime, racing, moviemaking and various mishaps and mayhem. —The New York Times

darwin awards facts: Short Films in Language Teaching Engelbert Thaler, 2017-07-17 The second volume in the new academic series SELT (Studies in English Language Teaching) is also divided into three parts: A. Theory - B. Methodology - C. Classroom. Part A highlights the topic from the perspectives of different academic disciplines, in this case from a TEFL as well as from a film-didactic and a cultural-literary viewpoint. In part B, methodological contributions on selected short films and suitable procedures are assembled. Part C is a collection of concrete sample lessons for teaching English with short films at various levels. These lesson plans have been designed at university, carried out and evaluated by 11 experienced teachers, and finally revised by the editor. Peer reviewing is guaranteed by an academic advisory council consisting of six well-known TEFL professors. The new series, above all, aims at bridging didactic research and classroom practice. Thus it is intended for foreign language lecturers, students, teacher trainers and teachers.

darwin awards facts: Painful Yarns G. Lorimer Moseley, 2007 This much anticipated collection of stories, written by Oxford University Fellow and Pain Scientist, Dr GL Moseley, provides an entertaining and informative way to understand modern pain biology. Described by critics as 'a gem' and by clinicians as 'entertaining and educative', Painful Yarns is a unique book. The stories, some of his travels in outback Australia, some of experiences growing up, are great yarns. At the end of each story, there is a section so what has this got to do with pain? in which Lorimer uses the story as a metaphor for some aspect of pain biology. The level of the pain education is appropriate for patients and health professionals. The entertainment is good for everyone. You don't have to be interested in pain to get something from this book and a laugh or two!
