dave pelzer mother real life: Survivors Gregory K. Moffatt, 2010-03-23 Case studies show how various personal, social, and protective factors can override seemingly unbearable trauma. Rather than addressing what goes wrong when people are traumatized, *Survivors: What We Can Learn from How They Cope with Horrific Tragedy* takes a positivist approach. Filled with stories of people who overcame seemingly unbearable events, the book examines the details of their traumas to explain what combination of factors enabled them to thrive despite their experiences. *Survivors* studies men and women, adults and children, Americans and those from other lands. It encompasses victims of the Nazi Holocaust, survivors of spinal injury, victims of violent crime, adult victims of child abuse, and survivors of the Rwandan genocide. Author Gregory K. Moffatt, a psychologist and counselor, looks at all of these cases in the light of research regarding post-traumatic growth and clinical implications. He explains the combination of social context and protective and personal factors identified as prime agencies for resilience, drawing lessons that can prepare us, not only for extreme trauma, but to deal with the everyday traumas that affect us all.

dave pelzer mother real life: A Child Called "it" David J. Pelzer, 1995 This book chronicles the unforgettable account of one of the most severe child abuse cases in California history. It is the story of Dave Pelzer, who was brutally beaten and starved by his emotionally unstable, alcoholic mother: a mother who played tortuous, unpredictable games--games that left him nearly dead. He had to learn how to play his mother's games in order to survive because she no longer considered him a son, but a slave; and no longer a boy, but an it.

dave pelzer mother real life: The Story of Childhood Libby Brooks, 2014-08-10 *Childhood*. We've all known it, but do we remember what it was like? Can we as adults relate to children or do we misunderstand them? Do we hanker after an unrealistic ideal of innocence that probably never was? To what extent has childhood become an adult-imagined universe? There is so much social anxiety surrounding their behaviour, nutrition, sexuality, consumerism and educational achievement that children may well have become the victims of inappropriate adult perceptions. In today's ASBO-afflicted Britain, Libby Brooks suggests that there is much we don't understand about contemporary childhood. *The Story of Childhood* explores this idea as Libby Brooks talks to nine very different children between the ages of four and sixteen growing up in Britain today. The public schoolboy, the young offender, the teenage mum, the country lad, for example, talk amusingly, frankly, and sometimes shockingly about their own lives conveying a sense of immediate experience that is thought-provoking and illuminating. Enriched by insights from literature, sociology, history and psychology, this is a remarkable piece of writing. Anyone who cares about the welfare of children should read this important book.

dave pelzer mother real life: The Lost Child in Literature and Culture Mark Froud, 2017-10-18 This book is an extensive study of the figure of the lost child in English-speaking and European literature and culture. It argues that the lost child figure is of profound importance for our society, a symptom as well as a cause of deep trauma. This trauma, or void, is a fundamental disruption of the structures that define us: self, history, and even language. This puts the figure of the child in context

with previous research that the modern conception of 'a child' was formed alongside modern conceptions of memory. The book analyses the representation of the lost child, through fairy tales, historical oppression and in recent novels and films. The book then studies the connection of the lost child figure with the uncanny and its centrality to language. The book considers the lost child figure as an archetype on a metaphysical and philosophical level as well as cultural.

dave pelzer mother real life: Transition of the Mind Tony Cloud, PhD, 2013-12 Author Tony Cloud grew up in Wheaton, Maryland, when the metropolitan area of Washington, DC, earned the title "Crime Capital of the World." He knows firsthand the ugliness that crime perpetuates. In *Transition of the Mind*, he shows how drugs and violence have affected the hearts of the entire world and discusses how action must be taken before it's too late. This study journeys into the hearts of deprived, devalued, and distressed inner-city children. Based on real lives and true events in the ghetto and suburban areas, it answers many questions that have been asked by parents and grandparents around the nation: • Why are so many young people joining gangs, and how do we get them out? • What kinds of laws or rules are necessary for inner-city survival? • How has poverty cheapened the value of life? • Besides abortion, how are children murdered without a weapon? • What is the power of a gangsta in underprivileged areas? • Is racism truly alive, and does it exist on every level of life? Heartfelt and raw, *Transition of the Mind* provides insight into the challenges of street life for many young people in inner-city settings. It shows that through discipline and faith in God and themselves, they can overcome the challenges and become righteous people.

dave pelzer mother real life: BROKEN TO REDEEMED MANHOOD RESTORED Edward Nurge, 2024-11-13 *Broken to Redeemed Manhood, Restored* is meant for anyone who's asked questions like, how do I deal with my emotions or relationships in healthy ways? Okay, I know I'm not in the best place because of fear, pain, or shame, but how do I move forward? Why does my past keep holding me back? What's the benefit of counseling or support groups? Are they enough? I'm ready to give up on church (or a relationship with Mom or Dad or a friend); what can I do? Nothing is held back in poetry as I wrestle with God, with my feelings and thoughts, and with my desires to heal and become whole. It includes insights from other authors, too, in living as a single adult, along with the difference between facade and persona. It should be encouraging for anyone who is healing or knows someone who is healing from life's setbacks.

dave pelzer mother real life: The Atrocity Paradigm Claudia Card, 2005 What distinguishes evils from ordinary wrongs? Is hatred a necessarily evil? Are some evils unforgivable? Are there evils we should tolerate? What can make evils hard to recognize? Are evils inevitable? How can we best respond to and live with evils? Claudia Card offers a secular theory of evil that responds to these questions and more. Evils, according to her theory, have two fundamental components. One component is reasonably foreseeable intolerable harm -- harm that makes a life indecent and impossible or that makes a death indecent. The other component is culpable wrongdoing. Atrocities, such as genocides, slavery, war rape, torture, and severe child abuse, are Card's paradigms because in them these key elements are writ large. Atrocities deserve more attention than secular philosophers have so far paid them. They are distinguished from ordinary wrongs not by the psychological states of evildoers but by the seriousness of the harm that is done. Evildoers need not be sadistic: they may simply be negligent or unscrupulous in pursuing their goals. Card's theory represents a compromise between classic utilitarian and stoic alternatives (including Kant's theory of radical evil). Utilitarians tend to reduce evils to their harms; Stoics tend to reduce evils to the wickedness of perpetrators: Card accepts neither reduction. She also responds to Nietzsche's challenges about the worth of the concept of evil, and she uses her theory to argue that evils are more important than merely unjust inequalities. She applies the theory in explorations of war rape and violence against intimates. She also takes up what Primo Levi called the gray zone, where victims become complicit in perpetrating on others evils that threaten to engulf themselves. While most past accounts of evil have focused on perpetrators, Card begins instead from the position of the victims, but then considers more generally how to respond to -- and live with -- evils, as victims, as perpetrators, and as those who have become both.
