dave pelzer mother story: The Story of Childhood Libby Brooks, 2014-08-10 *Childhood*. We've all known it, but do we remember what it was like? Can we as adults relate to children or do we misunderstand them? Do we hanker after an unrealistic ideal of innocence that probably never was? To what extent has childhood become an adult-imagined universe? There is so much social anxiety surrounding their behaviour, nutrition, sexuality, consumerism and educational achievement that children may well have become the victims of inappropriate adult perceptions. In today's ASBO-afflicted Britain, Libby Brooks suggests that there is much we don't understand about contemporary childhood. *The Story of Childhood* explores this idea as Libby Brooks talks to nine very different children between the ages of four and sixteen growing up in Britain today. The public schoolboy, the young offender, the teenage mum, the country lad, for example, talk amusingly, frankly, and sometimes shockingly about their own lives conveying a sense of immediate experience that is thought-provoking and illuminating. Enriched by insights from literature, sociology, history and psychology, this is a remarkable piece of writing. Anyone who cares about the welfare of children should read this important book.

dave pelzer mother story: *The Lost Child in Literature and Culture* Mark Froud, 2017-10-18 This book is an extensive study of the figure of the lost child in English-speaking and European literature and culture. It argues that the lost child figure is of profound importance for our society, a symptom as well as a cause of deep trauma. This trauma, or void, is a fundamental disruption of the structures that define us: self, history, and even language. This puts the figure of the child in context with previous research that the modern conception of 'a child' was formed alongside modern conceptions of memory. The book analyses the representation of the lost child, through fairy tales, historical oppression and in recent novels and films. The book then studies the

connection of the lost child figure with the uncanny and its centrality to language. The book considers the lost child figure as an archetype on a metaphysical and philosophical level as well as cultural.

dave pelzer mother story: *Thinking Themselves Free* Cynthia Miller Coffel, 2011 *Thinking Themselves Free* presents humane, tender portraits of a small group of teen mothers trying to finish high school, and describes the ways in which reading, writing, and schooling shaped these young women's lives. The book suggests ways in which deeply held ideas about class, appropriate gender roles, and the expression of emotion in school affect educators' relationships with students who are different from the middle-class norm. Teachers of teen mothers describe with poignancy the young women's struggles to balance motherhood, work, and school, and suggest how schools could change to become more open to the diversity of life choice these women express. Because this book addresses the problems of struggling readers, working class students, and the teachers who serve them, its greatest audience will be among pre-service and in-service teachers and teacher educators interested in literacy education, qualitative research, education reform, gender equity, social justice, and the teaching of young adult literature.
