erik larsen: *Cultural Analysis* Hans Gullestrup, 2006 With internationalization, the world is becoming smaller and the opportunity to meet people from other countries and cultures is becoming more common, providing the need for cooperation, shared knowledge, and cross-border trade. Individual cultures tend to understand themselves best and base their understanding of the world and its peoples on ideas they each have come to believe irrespective of reality, and thus make it difficult to reach a proper understanding of other cultures. This book considers intercultural understanding and co-action, partly by means of general insights into the concept of culture and the

dimensions which bring about cultural differences, and partly as a methodology to analyze a certain culture - whether one's own or others'. This leads towards an understanding of cultural complexity and cultural differences among people. The book provides a discussion of a number of ethical issues, which almost invariably will arise when people meet and co-act across cultural boundaries. Cultural Analysis offers a theoretical/abstract proposal for cultural understanding, intercultural plurality, and complexity.

erik larsen: Picturing Pity Marianne Gullestad, 2007-11-01 Picturing Pity is the first full length monograph on missionary photography. Empirically, it is based on an in-depth analysis of the published photographs taken by Norwegian evangelical missionaries in Northern Cameroon from the early nineteen twenties, at the beginning of their activities in this region, and until today. Being part of a large international movement, Norway sent out more missionaries per capita than any other country in Europe. Marianne Gullestad's main contention is that the need to continuously justify their activities to donors in Europe has led to the creation and maintenance of specific ways of portraying Africans. The missionary visual rhetoric is both based on earlier visualizations and has over time established its own conventions which can now also be traced within secular fields of activity such as international development agencies, foreign policy, human relief organizations and the mass media. Picturing Pity takes part in the present pictorial turn in academic teaching and research, constituting visual images as an exciting site of conversation across disciplinary lines.

erik larsen: Robert Kirkman Terrence R. Wandtke, 2021-07-29 Robert Kirkman (b. 1978) is probably best known as the creator of The Walking Dead. The comic book and its television adaptation have reinvented the zombie horror story, transforming it from cult curiosity and parody

to mainstream popularity and critical acclaim. In some ways, this would be enough to justify this career-spanning collection of interviews. Yet Kirkman represents much more than this single comic book title. Kirkman's story is a fanboy's dream that begins with him financing his irreverent, independent comic book *Battle Pope* with credit cards. After writing major titles with Marvel comics (*Spider-Man*, *Captain America*, and *X-Men*), Kirkman rejected companies like DC and Marvel and publicly advocated for creator ownership as the future of the comics industry. As a partner at Image, Kirkman wrote not only *The Walking Dead* but also *Invincible*, a radical reinvention of the superhero genre. *Robert Kirkman: Conversations* gives insight to his journey and explores technique, creativity, collaboration, and the business of comics as a multimedia phenomenon. For instance, while continuing to write genre-based comics in titles like *Outcast* and *Oblivion Song*, Kirkman explains his writerly bias for complex characters over traditional plot development. As a fan-turned-creator, Kirkman reveals a creator's complex relationship with fans in a comic-con era that breaks down the consumer/producer dichotomy. And after rejecting company-ownership practices, Kirkman articulates a vision of the creator-ownership model and his goal of organic creativity at Skybound, his multimedia company. While Stan Lee was the most prominent comic book everyman of the previous era of comics production, Kirkman is the most prominent comic book everyman of this dynamic, evolving new era.
