genocide examples: International Crimes and Other Gross Human Rights Violations

genocide examples: The Genocide Convention Harmen van der Wilt, Jeroen Vervliet, Göran Sluiter, Johannes Houwink ten Cate, 2012-05-16 Genocide is widely acknowledged as 'the crime of crimes'. Such universal condemnation understandably triggers both loose talk (calling each and every massacre 'genocide') and utter reluctance in political circles to use the 'G-word'. The social construction of genocide reflects the deeper question whether the rigid legal concept of genocide – as it emerges in the Genocide Convention and has been maintained ever since – still corresponds with the historical and social perception of the phenomenon. This book is the product of an intellectual encounter between scholars of historical and legal disciplines which have joined forces to address this question. The authors are strongly inspired by the idea that the multi-disciplinary research of and education on genocide may contribute to a more appropriate reaction and prevention of genocide.

genocide examples: The Diversity of Darkness and Shameful Behaviors Tim Delaney, 2022-05-06 The premise of *The Diversity of Darkness and Shameful Behaviors* is to emphasize the need for enlightened, rational thinking as a paradigm of thought as the culture of shamelessness continues to grow and cast its repulsive dark shadow over those who embrace enlightened reason and basic human rights for all. *Diversity of Darkness* is an innovative work and represents the third book of a trilogy written by the author that underscores the reality that there are many shamefully hateful and deadly behavioral threats that have jeopardized the very notions of civility, decency and justice around the world. This unique book utilizes evidence-based approaches in the examination of human behaviors in society that have become increasingly shameful and tolerated among a growing number of enablers. Key features include a combination of academic analyses that draw on numerous and specific examples of the diversity of darkness that encompasses the world along with a balanced practical, everyday-life approach to the study of the socio-political world we live in through the use of contemporary culture references and featured popular culture boxes. Social scientists, social thinkers and the general audience alike will be intrigued by the diversity of topics covered, including anti-civil rights movements; the rise of supremacist groups; hate crimes; mass shootings and active shootings; terrorism, war and genocide; an increase in shameful behaviors and attempts to shame others; and attacks on science, reason and rationality. We should realize that humanity has the intellect to accomplish great feats but heed the growing culture of shamelessness, irrationality and the diversity of darkness.

genocide examples: *The Armenian Massacres of 1915-1916 a Hundred Years Later* Flavia Lattanzi, Emanuela Pistoia, 2018-05-30 This peer-reviewed book features essays on the Armenian massacres of 1915-1916. It aims to cast light upon the various questions of international law raised by the matter. The answers may help improve international relations in the region. In 1915-1916, roughly a million and a half Armenians were murdered in the territory of the Ottoman Empire, which had been home to them for centuries. Ever since, a dispute between Armenians and Turkey has been ongoing over the qualification of the massacres. The contributors to this volume examine the legal nature and consequences of this event. Their investigation strives to be completely neutral and technical. The essays also look at the broader issue of denial. For instance, in Turkey, public speech on the matter can still trigger criminal prosecution whereas in other European States denial of genocide, war crimes and crimes against humanity is criminalized. However, the European Court of Human Rights views criminal prosecution of denial of the Armenian massacres as unlawful. In addition, one essay considers a state's obligation to remember by looking at lessons learnt from the Inter-American Court of Human Rights. Another contributor looks at a collective right to remember and some ideas to move forward towards a solution. Moreover, the book explores the way the Armenian massacres have affected the relationship between Turkey and the European Union.

genocide examples: *The Monumental Challenge of Preservation* Michele Valerie Cloonan, 2023-08-15 The enormous task of preserving the world's heritage in the face of war, natural disaster, vandalism, neglect, and technical obsolescence. The monuments—movable, immovable, tangible, and intangible—of the world's shared cultural heritage are at risk. War, terrorism, natural disaster, vandalism, and neglect make the work of preservation a greater challenge than it has been since World War II. In *The Monumental Challenge of Preservation* Michèle Cloonan makes the case that, at this critical juncture, we must consider preservation in the broadest possible contexts. Preservation requires the efforts of an increasing number of stakeholders. In order to explore the cultural, political, technological, economic, and ethical dimensions of preservation, Cloonan examines particular monuments and their preservation dilemmas. The massive Bamiyan Buddhas, blown up by the Taliban in 2001, are still the subject of debates over how, or whether, to preserve what remains, and the U. S. National Park Service has undertaken the complex task of preserving the symbolic and often ephemeral objects that visitors leave at the Vietnam Veterans Memorial—to take just two of the many examples described in the book. Cloonan also considers the ongoing genocide and cultural genocide in Syria; the challenges of preserving our digital heritage; the dynamic between original and copy; efforts to preserve the papers and architectural fragments of the architect Louis Sullivan; and the possibility of sustainable preservation. In the end, Cloonan suggests, we are what we preserve—and don't preserve. Every day we make preservation decisions, individually and collectively, that have longer-term ramifications than we might expect.

genocide examples: *Pursuing Justice* Ralph A. Weisheit, Frank Morn, 2014-07-07 *Pursuing Justice*, Second Edition, examines the issue of justice by considering the origins of the idea, formal

systems of justice, current global issues of justice, and ways in which justice might be achieved by individuals, organizations, and the global community. Part 1 demonstrates how the idea of justice has emerged over time, starting with religion and philosophy, then moving to the justice as a concern of the state, and finally to the concept of social justice. Part 3 focuses on four contemporary issues of justice: war, genocide, slavery, and the environment. Finally, Part 4 shows how individuals and organizations can go about pursuing justice, and describes the rise of global justice. This updated timely book helps students understand the complexities and nuances of a society's pursuit of justice. genocide examples: Individual Criminal Responsibility in International Law Elies van Sliedregt, 2012-03-01 This book examines the concept of individual criminal responsibility for serious violations of international law, i.e. aggression, genocide, crimes against humanity and war crimes. Such crimes are rarely committed by single individuals. Rather, international crimes generally connote a plurality of offenders, particularly in the execution of the crimes, which are often orchestrated and masterminded by individuals behind the scene of the crimes who can be termed 'intellectual perpetrators'. For a determination of individual guilt and responsibility, a fair assessment of the mutual relationships between those persons is indispensable. By setting out how

to understand and apply concepts such as joint criminal enterprise, superior responsibility, duress, and the defence of superior orders, this work provides a framework for that assessment. It does so by bringing to light the roots of these concepts, which lie not merely in earlier phases of development of international criminal law but also in domestic law and legal doctrine. The book also critically reflects on how criminal responsibility has been developed in the case law of international criminal tribunals and courts. It thus illuminates and analyses the rules on individual responsibility in international law.

genocide examples: Race, Ethnicity, and Crime Dianne Williams, 2012 In addition to information on crime and incarceration rates, White-collar crime and the typical criminal, the discussion of minorities and public perceptions is set within a broader context including the issues of terrorism and human trafficking, where race and ethnicity are also vital to public perceptions. The manual is designed for junior colleges and four year colleges, including those offering distance-learning courses. It is a thought-provoking combination of facts and questions. The pedagogical focus is on collaborative, problem-based learning, with foundational support for the development of critical thinking and analytical skills. Each chapter includes vignettes featuring the opinions of experts in the field relative to the chapter being covered. They are classic pedagogical tools that link theory with practice a good balance between theory and the real world. The simple, straightforward approach allows instructors to personalize their coverage of the material, and the text uses extremely effective pedagogical approaches. The Case Study/Critical Thinking issues-and-questions approach at the beginning of each chapter is another important feature that focuses on developing students soft skills. The objectives are clearly listed at the beginning of each chapter. Chapter resources and key terms are listed at the end of each chapter. The Controversy sections included in each chapter target analytical and critical skill development in students, not to mention application of a current issue, as does the In the news section which, while making reference and applying theory to current issues, forces students to apply theory and critically analyze issues. The author attempts, as much as possible, to rely on facts and figures here (deductive logic) rather than on sentiment. Since the ultimate goal is to encourage students to critique, analyze and formulate their own opinions, as much effort as was feasible possible was put into presenting both sides of each argument.
