This book approaches the new golden age of television dramas by examining the programs that define the first 15 years of the new century through their complex narratives, high production value, star power, popularity, and enthusiastic fan culture. After an introduction that sets the stage for the book's content, thematic sections present concise chapters that explore key connections between television dramas and elements of 21st-century culture. The authors explore *Downton Abbey* as a distraction from contemporary class struggles, patriarchy and the past in *Game of Thrones* and *Mad Men*, and portrayals of the dark hero protagonist in *The Sopranos*, *Dexter*, and *Breaking Bad*, as a few examples of the book's coverage. With its multidisciplinary perspectives on a variety of themes—terrorism, race/class/gender, family dynamics, and sociopolitical and socioeconomic topics—this book will be relevant across the social sciences and cultural and media studies courses.
