I want to do work as a critic and journalist that helps increase the audience of work that deserves exposure and explain why it deserves exposure. And eventually I want to create artistic work of my own - in the form of fiction or essays - that, in its own way, does the same thing - work that illustrates connections, puts things in context and, ultimately, makes people realize that for all the insane bullshit that's going on out there (and has been going on out there since time immemorial), the world is really a pretty cool place. --AJ

friday night lights recap: Freaks, Gleeks, and Dawson's Creek Thea Glassman, 2023-06-27 The untold stories of seven revolutionary teen shows (*The Fresh Prince of Bel-Air*, *My So-Called Life*, *Dawson's Creek*, *Freaks and Geeks*, *The O.C.*, *Friday Night Lights*, and *Glee*) that shaped the course of modern television and our pop cultural landscape forever. The modern television landscape is defined by influential and ambitious shows for and about teenagers. Groundbreaking series like *Euphoria*, *Sex Education*, and *Pen15* dominate awards season and lead the way when it comes to progressive, diverse, and creative storytelling. So how did we get here from *Beverly Hills, 90210*? In *Freaks, Gleeks, and Dawson's Creek*, entertainment journalist Thea Glassman takes readers behind the scenes of seven of the most culturally significant series of the last three decades, drawing on dozens of new interviews with showrunners, cast, crewmembers, and more. These shows not only launched the careers of such superstars as Will Smith, Michael B. Jordan, Claire Danes, and Seth Rogen, but they also took young people seriously, proving that teen TV could be smart, revolutionary, and "important"—and stay firmly entrenched in pop culture long after it finished airing. And while many critics insist that prestige dramas like *The Sopranos* and *Mad Men* paved the way for television, some of the most groundbreaking work was actually happening inside the fictional hallways of high schools across America in teen shows whose impact remains visible on our screens today.

friday night lights recap: Legitimizing Television Michael Z Newman, Elana Levine, 2012-02-27 *Legitimizing Television: Media Convergence and Cultural Status* explores how and why television is gaining a new level of cultural respectability in the 21st century. Once looked down upon as a plug-in drug offering little redeeming social or artistic value, television is now said to be in a creative renaissance, with critics hailing the rise of Quality series such as *Mad Men* and *30 Rock*. Likewise, DVDs and DVRs, web video, HDTV, and mobile devices have shifted the longstanding conception of television as a household appliance toward a new understanding of TV as a sophisticated, high-tech gadget. Newman and Levine argue that television's growing prestige emerges alongside the convergence of media at technological, industrial, and experiential levels. Television is permitted to rise in respectability once it is connected to more highly valued media and audiences. Legitimation works by denigrating ordinary television associated with the past, distancing the television of the present from the feminized and mass audiences assumed to be inherent to the old TV. It is no coincidence that the most validated programming and technologies of the convergence era are associated with a more privileged viewership. The legitimization of television articulates the medium with the masculine over the feminine, the elite over the mass, reinforcing cultural hierarchies that have long perpetuated inequalities of gender and class. *Legitimizing Television* urges readers to move beyond the question of taste—whether TV is good or bad—and to focus instead on the cultural, political, and economic issues at stake in television's transformation in the digital age.

Embracing the familiar horror conventions of spooky settings, unnerving manifestations and terrifying monsters, series co-creators Ryan Murphy and Brad Falchuk combine shocking visual effects with an engaging anthology format to provide a modern take on the horror genre. This collection of new essays examines the series' contribution to television horror, focusing on how the show speaks to social concerns, its use of classic horror tropes and its reinvention of the tale of terror for the 21st century.

friday night lights recap: The Television Will be Revolutionized Amanda D. Lotz, 2007-11-01 Choice Outstanding Academic Title for 2008 After occupying a central space in American living rooms for the past fifty years, is television, as we've known it, dead? The capabilities and features of that simple box have been so radically redefined that it's now nearly unrecognizable. Today, viewers with digital video recorders such as TiVo may elect to circumvent scheduling constraints and commercials. Owners of iPods and other portable viewing devices are able to download the latest episodes of their favorite shows and watch them whenever and wherever they want. Still others rent television shows on DVD, or download them through legal and illegal sources online. But these changes have not been hastening the demise of the medium. They are revolutionizing it. The Television Will Be Revolutionized examines television at the turn of the twenty-first century —:what Amanda D. Lotz terms the "post-network" era. Television, both as a technology and a tool for cultural storytelling, remains as important today as ever, but it has changed in fundamental ways as the result of technological innovations, proliferating cable channels targeting ever more specific niche audiences, and evolving forms of advertising such as product placement and branded entertainment. Many of the conventional practices and even the industry's basic business model are proving unworkable in this new context, resulting in a crisis in norms and practices. Through interviews with those working in the industry, attendance of various industry summits and meetings, surveys of trade publications, and consideration of an extensive array of popular television shows, Lotz takes us behind the screen to explore what is changing, why it's changing, and why these changes matter.

friday night lights recap: Moral Issues Paul Goren, Christopher Chapp, 2024-12-13 A new perspective on how beliefs about abortion and gay rights reshaped American politics. Many believe that religious and partisan identities undergird American public opinion. However, when it comes to abortion and gay rights, the reverse may be closer to the truth. Drawing on wide-ranging evidence, Paul Goren and Christopher Chapp show that views on abortion and gay rights are just as durable and politically impactful—and often more so—than political and religious identities. Goren and Chapp locate the lasting strength of stances on abortion and gay rights in the automatic, visceral emotions that the media has primed since the late 1980s. Moral Issues examines how attitudes toward these moralized issues affect, and can sometimes even disrupt, religious and partisan identities. Indeed, over the last thirty years, these attitudes have accelerated the rise of the religious “nones,” who have no religious affiliation, and promoted moral sorting into the Democratic and Republican parties.
