Background and Historical Context

The story of the hidden figures unfolds during the height of the Cold War, a period marked by intense competition between the United States and the Soviet Union. The Space Race became a symbol of technological prowess and national pride. During this era, NASA heavily relied on human "computers" to perform complex calculations essential for space missions. African-American women, often relegated to segregated and marginalized roles, were employed as these human computers. Despite facing systemic racism and gender discrimination, these women made significant contributions to the success of NASA's missions. Understanding the social and political climate of the 1950s and 1960s is essential to fully grasp the importance of their achievements.

Segregation and Gender Discrimination

The hidden figures operated within a segregated society where African-Americans were denied equal access to education, employment, and public facilities. Women, especially women of color, encountered dual barriers due to both their race and gender. At NASA, this translated into separate restrooms, cafeterias, and work areas. Despite these challenges, these women pursued careers in science, technology, engineering, and mathematics (STEM) fields, demonstrating exceptional skill and perseverance.

NASA's Role in the Space Race

NASA's mission to send a man into space required precise calculations and engineering expertise. The agency employed a diverse workforce, including many African-American women mathematicians who were instrumental in verifying calculations for trajectories, launch windows, and re-entry paths. Their work was critical to the success of missions such as John Glenn's orbital flight, which marked a significant milestone for American space exploration.

Main Characters and Their Contributions

The hidden figures summary prominently features three pioneering women whose intellect and dedication were pivotal to NASA's achievements. Katherine Johnson, Dorothy Vaughan, and Mary Jackson each broke barriers and contributed uniquely to the agency's success.

Katherine Johnson

Katherine Johnson was a mathematician renowned for her accuracy in calculating flight trajectories. Her work ensured the safe launch and return of the first American astronauts. Johnson's ability to perform complex orbital mechanics calculations by hand gained the trust and respect of her colleagues and supervisors, making her an indispensable asset to NASA.

Dorothy Vaughan

Dorothy Vaughan was a mathematician and programmer who became NASA's first African-American supervisor. She led a team of human computers and adapted to technological advancements by learning computer programming languages such as FORTRAN. Vaughan's leadership helped transition NASA from manual calculations to automated computing, significantly enhancing the agency's capabilities.

Mary Jackson

Mary Jackson was an aerospace engineer who overcame legal and social obstacles to become NASA's first African-American female engineer. She worked on wind tunnel experiments and contributed to research that improved aircraft and spacecraft design. Jackson's advocacy for equal opportunities helped pave the way for future generations of women and minorities in engineering.

PREVIEW: Hidden Figures begins with a prologue recounting author Margot Lee Shetterly's childhood in Hampton, Virginia. Her father worked for National Aeronautics and Space Administration's (NASA) Langley Research Center, and Shetterly was surrounded by an upwardly mobile black community. Given her father's job as a climate scientist and the similarly successful lives of her extended family, Shetterly experienced a comfortable middle class upbringing removed from the palpable pain and strife that has engulfed so many other black communities in America. As she writes, Shetterly knew so many African Americans working in science, math, and engineering that I thought that's just what black folks did. As Shetterly grew up and left Hampton, she became fascinated by the people she had grown up with and the individuals her father had once mentioned in passing. The popular conception of NASA was that of an organization staffed almost uniformly by white men; so who were the people that Shetterly's father had worked with, and where were they now?
