Hazardous materials are substances that pose risks to health, safety, or the environment due to their chemical, physical, or biological properties. Within Walmart, these materials include cleaning agents, aerosols, batteries, and certain chemicals used in store maintenance and product inventory. Understanding what qualifies as hazardous is fundamental to managing these substances responsibly and aligning with federal and state regulations.

Types of Hazardous Materials Found in Retail

Settings

Retail environments like Walmart deal with a variety of hazardous materials, each requiring specific handling and storage protocols. Common categories include:

- Flammable liquids and gases (e.g., propane tanks, solvents)
- Corrosive substances (e.g., acids, alkalis in cleaning products)
- Toxic chemicals (e.g., pesticides, certain battery components)
- Compressed gases (e.g., refrigerants used in store refrigeration units)
- Waste materials classified as hazardous (e.g., used batteries, electronics)

Regulatory Definitions and Classifications

Walmart aligns its hazardous materials management with agencies such as the Environmental Protection Agency (EPA), Occupational Safety and Health Administration (OSHA), and the Department of Transportation (DOT). These agencies provide frameworks for classifying hazardous materials based on their properties and potential hazards, guiding Walmart's policies and operational procedures.
