hidden figures cast questions: The 1960s on Film Jim Willis, Mark Miller, 2021-10-11 The 1960s on Film tells the narrative of the 1960s through the lens of the movie camera, analyzing 10 films that focus on the people, events, and issues of the decade. Films create both an impression of and - at times for younger audiences - a primary definition of events, people, and issues of an era. The 1960s on Film examines the 1960s as the decade was presented in ten films that focused on that decade. This book analyzes both what the films have to say about the era and how close they come to accurately depicting it. For example, films such as Mississippi Burning and Selma tell the story of racial conflict and hope for reconciliation in the 1960s. Other films such as The Right Stuff and Hidden Figures show the deep fascination America had at that time with the burgeoning space program and NASA, while Easy Rider analyzes the role of rock music and drugs among young people of the decade. The Deer Hunter studies the controversies surrounding the war in Vietnam.

hidden figures cast questions: Race and Utopian Desire in American Literature and Society

Patricia Ventura, Edward K. Chan, 2019-10-12 Bringing together a variety of scholarly voices, this book argues for the necessity of understanding the important role literature plays in crystallizing the ideologies of the oppressed, while exploring the necessarily racialized character of utopian thought in American culture and society. Utopia in everyday usage designates an idealized fantasy place, but within the interdisciplinary field of utopian studies, the term often describes the worldviews of non-dominant groups when they challenge the ruling order. In a time when white supremacy is reasserting itself in the US and around the world, there is a growing need to understand the vital relationship between race and utopia as a resource for resistance. Utopian literature opens up that relationship by envisioning and negotiating the prospect of a better future while acknowledging the brutal past. The collection fills a critical gap in both literary studies, which has largely ignored the issue of race and utopia, and utopian studies, which has said too little about race.

hidden figures cast questions: The Kelvin Timeline of Star Trek Matthew Wilhelm Kapell, Ace G. Pilkington, 2019-02-28 In an era of reboots, restarts and retreads, J.J. Abrams' Star Trek trilogy--featuring new, prequel adventures of Kirk, Spock and the rest of the original series characters, aboard the USS Enterprise--has brought the franchise to a new generation and perfected a process that is increasingly central to entertainment media: reinvigorating the beloved classic. This collection of new essays offers the first in-depth analysis of the new trilogy and the vision of the next generation of Star Trek film-makers. Issues of gender, race, politics, economics, technology and morality--always key themes of the franchise--are explored in the 21st century context of The Kelvin Timeline.

hidden figures cast questions: *Finding Caspicara* Susan Verdi Webster, 2024 Caspicara was the most renowned sculptor of the eighteenth-century Andean world. Yet many works that are attributed to this Indigenous artist cannot be firmly documented as he is nearly absent in traditional archival records. Susan Webster seeks to analyze not only the visual imagery and material culture of his many works, but she also seeks to lay the foundation for understanding how scholars can revive the life and records of artists and other historical figures--many of whom were Indigenous in this period--with different methodologies. By cultivating artistic theory, popular religious devotion, and specific styles of sculpture, Webster's examination of the labor and workshop practices of this period contextualize the extensive commercial networks that existed within Quito and emanated beyond it. Webster explores the reason why authors constructed an almost completely fictional life story and canon for this artist that continued for two centuries, how this story fueled the agendas and goals of these authors in melding the colonial past with a newly independent country that could measure itself against western European culture, and as a potent story for tourists. She then considers the ways in which Caspicara's work was at the center of debates of sculpture versus painting in Quito. These debates and their development in the city also add context to notions of authorship, and how it was documented (or not). By exploring the professional world where he worked, Webster's analysis of Indigenous sculptors and their family networks of labor and apprenticeship in the arts allow us to understand the changing workforce and materials for sculptures. This analysis also reveals what day-to-day life may have been for Caspicara, and how this routine informed the artistic choices available to him. Archival materials indirectly offer glimpses into how patrons regarded Caspicara and his work, and how the work of others later embellished or altered his original vision. Throughout the chapters, visuality, materials, and reception challenge the typical obsession of art historians, museum curators, and auction houses in their hunger to attribute authorship in ways that increase the value, both for prestige and monetary reasons, and in ways that end up obscuring authorship and intent--

hidden figures cast questions: *Understanding Language Testing* Dan Douglas, 2014-03-18 *Understanding Language Testing* presents an introduction to language tests and the process of test development that starts at the very beginning. Assuming no knowledge of the field, the book promotes a practical understanding of language testing using examples from a variety of languages. While grounded on solid theoretical principles, the book focuses on fostering a true understanding of the various uses of language tests and the process of test development, scoring test performance,

analyzing and interpreting test results, and above all, using tests as ethically and fairly as possible so that test takers are given every opportunity to do their best, to learn as much as possible, and feel positive about their language learning. Each chapter includes a summary, suggestions for further reading, and exercises. As such this is the ideal book for both beginning students of linguistics and language education, or anyone in a related discipline looking for a first introduction to language testing.

hidden figures cast questions: *On the Muslim Question* Anne Norton, 2013-02-24 In this fearless, original book, Anne Norton demolishes the notion that there is a clash of civilizations between the West and Islam. What is really in question, she argues, is the West's commitment to its own ideals: to democracy and the Enlightenment trinity of liberty, equality, and fraternity. In the most fundamental sense, the Muslim question is about the values not of Islamic, but of Western, civilization--

hidden figures cast questions: *Technofeminist Storiographies* Kristine L. Blair, 2018-12-20 *Technofeminist Storiographies: Women, Information Technology, and Cultural Representation* analyzes both historical and contemporary accounts of women's lived experiences of technology, from Ada Lovelace and Hedy Lamarr to women working across the tech industry today, and juxtaposes them with larger cultural representations of women and technology. The book explores both the relationship between gender and technology and the cultural contexts that enable and constrain that relationship, questions that call for opportunities for women to share their lived experiences and to have such experiences represented across media genres. Despite the rich, complex stories and histories women have with technology—as programmers, inventors, and workers—media throughout history, including film, television, games, toys, children's books, and biographies, often inadequately and inaccurately represent them. Throughout the book, Kristine Blair chronicles the portrayal of the relationship between women and information technology across these media genres. Inevitably, the societal conditions that surround technology use—including portrayal through popular media—impact the extent to which women and girls gain and maintain access within those cultural contexts. This book calls for a more visible history of women's technological achievements in which their stories are heard for generations to come, rather than be forgotten and unknown.

hidden figures cast questions: *Screen Deep* Ellen E. Jones, 2024-01-30 *Screen Deep* is a book about the immense potential of screen storytelling to defeat an evil both historic and urgently topical: racism. Everyone watches TV and movies. Everyone has an interest in building a more just and equitable world. *Screen Deep* goes beyond the many film books and anti-racist manuals by demonstrating the connection between these two aspects of modern life. In *Screen Deep* Ellen E. Jones combines her personal experience as a mixed-race woman who cares about racism with her professional expertise as a film and TV journalist of twenty years standing, to ask - and answer - several questions: Is there such a thing as an Indigenous western? Is race comedy 'cancelled'? Where are all the films for white people? And most importantly: Can you still fight the good fight with a mouthful of popcorn?
