#### **how to develop emotional resilience: An Emotion of Success : Your Emotion....Your Life**

Dr. Shailendra K., 2025-04-23 Success is not just an achievement; it is an emotion that arises when one accomplishes a goal or fulfills a desire. This emotion can manifest as joy, pride, satisfaction, gratitude, and even relief. It brings a sense of accomplishment and confidence, fueling the desire to strive for more. However, just like any other emotion, success is fleeting. It comes and goes, making it a temporary feeling rather than a permanent state. Since success is an emotion, it is not exclusive to a select few—it is something everyone can experience. Whether big or small, every victory brings a surge of positive emotions, reinforcing our motivation to keep moving forward. However, success is not the only emotion that defines life. Just as joy is incomplete without sorrow, success is intertwined with failure. The highs and lows of life are all part of an emotional cycle that shapes our journey. The purpose of this book is to help people understand that success, failure, and every experience in life are emotions. Those who grasp this truth can free themselves from the fear of failure and the pressure of constant success. By embracing both triumphs and setbacks as transient emotions, one can live life to the fullest, without being overly attached to either. True fulfillment lies in understanding that emotions, including success, are meant to be felt and then released, allowing us to flow with life's ever-changing journey.
