hmh us history textbook: Contested Curriculum Don Romesburg, 2025-04-15 Today, many states have proposed so-called "Don't Say Gay" bills that prohibit public school teachers from mentioning LGBTQ topics in the classroom. But a few states, like California, have taken decisive steps in the other direction. They mandate inclusive education that treats LGBTQ history as essential to the curriculum. At once a history of an evolving movement and an activist handbook, *Contested Curriculum* navigates the rocky path to LGBTQ-inclusive K-12 history education in the United States and recounts the fight for a curriculum that recognizes the value of queer and trans lives. What began in fits and starts in activism and educational materials across the late twentieth century led to the passage of California's landmark FAIR Education Act in 2011, ensuring that LGBTQ history has a place in the K-12 classroom. Historian Don Romesburg, the lead scholar who worked with advocacy organizations to pass the act, recounts the decades-long struggle to integrate LGBTQ content into history education policy, textbooks, and classrooms. Looking at California and states that followed its lead, he assesses the challenges and opportunities presented by this new way of teaching history. Romesburg's powerful case for LGBTQ-inclusive education is all the more urgent in this era of anti-gay book bans, regressive legislation, and attempts to diminish the vital role that inclusive and honest history education should play in a democratic nation.

hnh us history textbook: *Local History and War Memories in Hokkaido* Philip A. Seaton, 2015-07-24 Hokkaido, the northernmost island of Japan, barely features in most histories of the Second World War. However, the combination of distinctive war experiences, a vibrant set of local historian groups, and powerful media organizations disseminating local war history, has generated an identifiable set of local collective memories. Hokkaido's status as an early colonial acquisition also makes the island an important vantage point from which to reassess the course and nature of the Japanese Empire. This book argues that Hokkaido's experiences of war and its militarized post-war constitutes a local case study with a much greater national and international significance on both theoretical and empirical grounds than first impressions might suggest. Using Japanese-language sources presented for the first time in English and a number of detailed local history case studies, it offers a fascinating and hitherto little-known perspective on the Second World War. It also combines a comprehensive theory of how war memories operate at the local level within a broad historical context that explains Hokkaido's pivotal role within Japanese imperial history. Demonstrating that understanding local history and memories is essential for a nuanced understanding of national history and memories, the book will be highly valuable to students and scholars of Japanese history, Second World War history, and Asian history.

To his parents, newly settled in small-town Ontario, he is the exalted only son in a sea of daughters, the one who will finally fulfill his immigrant father's dreams of Western masculinity. Peter and his sisters grow up in an airless house of order and obligation, though secrets and half-truths simmer beneath the surface. Though his father crowned him "powerful king," Peter knows otherwise. He knows he is really a girl. hnh us history textbook: *Negotiating Ethnic Diversity and National Identity in History Education* Helen Mu Hung Ting, Luigi Cajani, 2023-05-26 This edited book explores the problems and challenges of negotiating the representation of ethnic minorities within history education. It investigates how states balance the (non-)acknowledgement of the reality of cultural or religious diversity, and the promotion of a point of convergence in history education to foster national identity. Shifting our attention away from the intractable challenges posed by post-conflict countries for reconciliation, the contributors draw attention to the need to explore ways to prevent or pre-empt conflicts and exclusion through history education, which could contribute to developing a more sustainable culture of peace. Drawing on a wide range of contexts and sources, this book asks how history education could contribute to forming critical, historically informed, and committed young citizens. The book will be of interest to students and academics working on themes such as nationalism, citizenship, ethnicity, history education, multicultural education, peace studies and area studies, as well as practitioners in the fields of history, social studies, civic or citizenship.
