internal security strategy ashok kumar: Theorizing Indian Foreign Policy Mischa Hansel, Raphaëlle Khan, MéliSSa Levaillant, 2017-04-21 Examined from a non-Western lens, the standard International Relations (IR) and Foreign Policy Analysis (FPA) approaches are ill-adapted because of some Eurocentric and conceptual biases. These biases partly stem from: first, the dearth of analyses focusing on non-Western cases; second, the primacy of Western-born concepts and method in the two disciplines. That is what this book seeks to redress. Theorizing Indian Foreign Policy draws together the study of contemporary Indian foreign policy and the methods and theories used by FPA and IR, while simultaneously contributing to a growing reflection on how to theorise a non-Western case. Its chapters offer a refreshing perspective by combining different sets of theories, empirical analyses, historical perspectives and insights from area studies. Empirically, chapters deal with different issues as well as varied bilateral relations and institutional settings. Conceptually, however, they ask similar questions about what is unique about Indian foreign policy and how to study it. The chapters also compel us to reconsider the meaning and boundary conditions of concepts (e.g. coalition government, strategic culture and sovereignty) in a non-Western context. This book will

appeal to both specialists and students of Indian foreign policy and International Relations Theory.

internal security strategy ashok kumar: Digital Media Mastery A Business Strategy of 21st Century Dr. Ashwani Kumar Yadav, Dr. Ashok Kumar, 2024-08-07 When your chief marketing officer (CMO) publishes his annual plan without any digital indicator, it may be time to take a look at the marketing strategy that the company has implemented and determine whether or not a marketing revolution is required. Any current business owner who is worth their salt would concur that the digital revolution is a subject of the utmost significance. The term Revolutionary Panic is used frequently, even in more traditional fields of endeavour. In the event that enterprises have not begun the process of digital transformation, they will collapse during the subsequent economic crisis. Digital marketing is growing like wildfire as a result of the huge changes that are taking place in the social environment at the present moment. With digitization permeating every aspect of modern society, such as molecules, digital marketing is becoming increasingly popular. Furthermore, it is a factor that even companies that operate in environments that are very technologically advanced are susceptible to. As a result of the eagerness of customers to enter the digital era, businesses that serve them are increasing their utilization of the Internet+ in order to get ready for the future of business (Figure 1.1). In the world of business, the era of real-time has arrived. Rather than being assessed in hours or days, the market's reaction to changes in the competitive landscape, the amount of time it takes customers to make decisions, and the amount of time it takes consumers to get a response are all increasingly measured in minutes and seconds. As of right now, the Instance+ Competitive Advantage is being considered a pair despite the fact that they appear to be incompatible with one another. In the event that businesses do not promptly respond to the requirements of their customers, they will lose clients and fall further behind the competition. As a result of the instant connectivity offered by mobile Internet, user scenarios have become more significant and have integrated people and machines into one.
