investment banking entry level jobs: 50 Jobs in 50 States Daniel Seddiqui, 2011-03-07 Like lots of college grads, Daniel Seddiqui was having a hard time finding a job. But despite more than forty rejections, he knew there were opportunities out there. So he set out on an extraordinary quest: fifty jobs in fifty states in fifty weeks. And not just any jobs. His goal was as much to explore America as to explore different careers, so he chose jobs that reflected the culture and economy of each state. Working as everything from a cheesemaker in Wisconsin, a border patrol agent in Arizona and a meatpacker in Kansas to a lobsterman in Maine, a surfing instructor in Hawaii and a football coach in Alabama, Daniel chronicles how he adapted to the wildly differing people, cultures, and environments. From one week to the next he had no idea what he'd be doing, where he'd be sleeping, what he'd be eating, or how he'd be received. He even became a roving news item, appearing on CNN, Fox News, World News Tonight, MSNBC and the Today Show—which was good preparation for his stint as a TV weatherman. Tackling challenge after challenge—overcoming anxiety about working four miles underground in a West Virginia coalmine, learning to walk on six-foot stilts (in a full Egyptian king costume) at an Florida amusement park, racing the clock as a pit-crew member at an Indiana racetrack —Daniel completed his journey a changed man. In this book he shares stories about the people he met, the lessons he learned and explains the five principles that kept him going.

investment banking entry level jobs: Pedigree Lauren A. Rivera, 2016-03-22 How social class determines who lands the best jobs Americans are taught to believe that upward mobility is possible for anyone who is willing to work hard, regardless of their social status, yet it is often those from affluent backgrounds who land the best jobs. Pedigree takes readers behind the closed doors of top-tier investment banks, consulting firms, and law firms to reveal the truth about who really gets hired for the nation's highest-paying entry-level jobs, who doesn't, and why. Drawing on scores of in-depth interviews as well as firsthand observation of hiring practices at some of America's most prestigious firms, Lauren Rivera shows how, at every step of the hiring process, the ways that employers define and evaluate merit are strongly skewed to favor job applicants from economically privileged backgrounds. She reveals how decision makers draw from ideas about talent—what it is, what best signals it, and who does (and does not) have it—that are deeply rooted in social class. Displaying the right stuff that elite employers are looking for entails considerable amounts of economic, social, and cultural resources on the part of the applicants and their parents. Challenging our most cherished beliefs about college as a great equalizer and the job market as a level playing field, Pedigree exposes the class biases built into American notions about the best and the brightest, and shows how social status plays a significant role in determining who reaches the top of the economic ladder.

investment banking entry level jobs: The Third Wave Alison Thompson, 2011-07-12 Alison Thompson, a filmmaker living in New York City, was enjoying Christmas with her boyfriend in 2004 when she saw the news reports online: a 9.3 magnitude earthquake had struck the sea near Indonesia, triggering a massive tsunami that hit much of southern Asia. As she watched the death toll climb, Thompson had one thought: She had to go help. A few years earlier, she had spent eight months volunteering at Ground Zero after 9/11. She'd learned then that when disaster strikes, it's not just the firemen and Red Cross who are needed—every single person can make a difference. With \$300 in cash, some basic medical supplies, and a vague idea that she'd go wherever she was needed, Thompson headed to Sri Lanka. Along with a small team of volunteers, she settled in a coastal town that had been hit especially hard and began tending to people's injuries, giving out food and water, playing games with the children, collecting dead bodies, and helping rebuild the local school and homes that had been destroyed. Thompson had intended to stay for two weeks; she ended up staying for fourteen months. She and her team helped start new businesses and set up the first tsunami early-warning center in Sri Lanka, which continues to save lives today. The Third Wave tells the inspiring story of how volunteering changed Thompson's life. It begins with her first real introduction to disaster relief after 9/11 and ends with her more recent efforts in Haiti, where she has helped create and run, with Sean Penn, an internally-displaced-person camp and field hospital for more than 65,000 Haitians who lost their homes in the 2010 earthquake. In The Third Wave, Thompson provides an invaluable inside glimpse into what really happens on the ground after a disaster—and a road map for what anyone can do to help. As Alison Thompson shows, with some resilience, a healthy sense of humor, and the desire to make a difference, we all have what it takes to change the world for the better.
