in the know quizzes: Call TV quiz shows Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee, 2007-01-25 Call TV quiz shows are an example of television programmes provided by commercial broadcasters in order to increase their revenue. The viewer watches the live broadcast, then sends a text message or makes a premium rate telephone call in order to take part, with the broadcaster keeping a proportion of the call revenue. The Culture Committee has decided to examine this development, and whether some form of regulation is required since the programmes seem to be another means of gambling, with some members of the public complaining about them. This report therefore has set out a number of recommendations as to how broadcasters and regulators should address this. The Committee states that there seems to be a lack of fairness and transparency throughout the process. For example, players are generally not told that it is a matter of luck whether a call is connected to the studio and that the chances of getting through are very slim. Also the cost of calling is not always made as clear as it might be, or the amount players might have to spend to win a prize. Primary responsibility for maintaining confidence in the Call TV quiz show format rests with the operating companies and the broadcasters. The Committee believes that the guidance drawn up by the two main regulators, Ofcom and ICSTIS does not go far enough; the Committee also states that Call TV quiz shows should constitute gaming under the Gambling Act 2005, and the Culture Department and the Gambling Commission should consider this as a matter of urgency; operators should have voluntarily introduced practices intended to help viewers who make repeated premium rate calls appreciate how much they are spending; also some assessment of the addiction to participation in such shows should be undertaken; viewers should be made aware that puzzles on Call TV quiz shows have a cryptic element, and that Ofcom should make it obligatory to have games verified with a third party and solutions lodged with them to prevent underhand changes being made while the show is on air; Ofcom should also publish periodic reports on its monitoring of Call TV quiz programmes; any practice of misleading viewers about call volumes or of blocking of calls would be unfair and fraudulent and should be punished under criminal law; the Committee recommends that broadcasters should be required to display some recent historical information about volume of incoming calls, and the odds of being connected to the studio; also that a single body, Ofcom, take responsibility for registering all complaints.

in the know quizzes: *Sexual Violence Policies and Sexual Consent Education at Canadian Post-Secondary Institutions* D. Scharie Tavcer, Vicky Dobkins, 2023-01-18 This book is the culmination of three years of research into sexual violence policies and sexual consent education at post-secondary institutions across Canada. The prevalence of sexual violence has not changed in more than 30 years, and its reporting to police or school authorities has only waxed and waned over those years. In response, this book asks what can be done differently to reduce the number of victims and potential perpetrators? The book provides an environmental scan of over 120 post-secondary institutions (PSIs) across Canada as well as a deeper analysis of 7 PSIs that also include student and staff experiences and opinions. The three-year research project employed various phases to capture over 160 student voices and over 20 sexual violence staff and subject experts. Subject experts and students were also involved in reviewing the draft iterations of the proposed sexual consent education module. This book delivers readers with a broad-brush approach to understanding the landscape of sexual violence prevention and education services at PSIs across Canada. It provides a narrowed focus on 7 PSIs where student and staff survey responses and interviews provide positionality in response to the available literature. The book concludes with a proposed sexual consent education module, including its strengths and limitations, as a point of discussion for PSIs to include into their sexual violence prevention education repertoire. This book is intended for post-secondary audiences in Canada, North America, and elsewhere – for undergraduate and graduate students and faculty, staff, and administrators – where it is crucial to consider ways to address its prevalence and the ways we can incorporate prevention education into our campus communities.

in the know quizzes: Teaching Science to Every Child John Settlage, Sherry A. Southerland, Lara K. Smetana, Pamela S. Lottero-Perdue, 2017-07-31 Ambitious and encouraging, this text for prospective and practicing elementary and middle school science teachers, grounded in contemporary science education reform, is a valuable resource that supplies concrete approaches to support the science and science-integrated engineering learning of each and every student. At its core, it is based in the view that science is its own culture, consisting of unique thought processes, specialized communication traditions, and distinctive methods and tools. Using culture as a starting point and connecting it to effective instructional approaches, the authors describe how a teacher can make science accessible to students who are typically pushed to the fringe—especially students of color and English language learners. Written in a conversational style, the authors capture the tone they use when they teach their own students. The readers are recognized as professional partners in the shared efforts to increase access, reduce inequities, and give all students the opportunities to participate in science. Changes in the Third Edition: Features an entirely new chapter on engineering and its integration with science in K-8 settings. Provides fresh attention to the Framework and Next Generation Science Standards while distancing previous attention to process skills and inquiry teaching. Incorporates the latest research about science practices, classroom discussions, and culturally responsive strategies. Retains an accessible writing style that encourages teachers to engage in the challenges of providing equitable and excellent science experiences to all children.
