kristen bach archives: *Monkey to Man* Gowan Dawson, 2024-02-27 The first book to examine the iconic depiction of evolution, the "march of progress," and its role in shaping our understanding of how humans evolved We are all familiar with the "march of progress," the representation of evolution that depicts a series of apelike creatures becoming progressively taller and more erect before finally reaching the upright human form. Its emphasis on linear progress has had a decisive

impact on public understanding of evolution, yet the image contradicts modern scientific conceptions of evolution as complex and branching. This book is the first to examine the origins and history of this ubiquitous and hugely consequential illustration. In a story spanning more than a century, from Victorian Britain to America in the Space Age, Gowan Dawson traces the interconnected histories of the two most important versions of the image: the frontispiece to Thomas Henry Huxley's *Evidence as to Man's Place in Nature* (1863) and "The Road to Homo Sapiens," a fold-out illustration in the best-selling book *Early Man* (1965). Dawson explores how the recurring appearances of this image pointed to shifting scientific and public perspectives on human evolution, as well as indicated novel artistic approaches and advancements in technology.

kristen bach archives: 1978 David Krell, 2025-04 Americans struggled to find their footing in the late 1970s. The Vietnam War ended with more than fifty-eight thousand American soldiers' deaths; the public's trust in politicians plummeted amid the Watergate scandal. As deadly blizzards ripped through the Midwest and Northeast in early 1978 and caused hundreds of millions of dollars in damages, Americans turned to baseball for the welcome distraction and promise of a new season. From spring training to the World Series, 1978 gave baseball fans one of the sport's greatest seasons, full of legendary moments like the battle between the New York Yankees and the Boston Red Sox for the American League East pennant, Gaylord Perry's three thousandth strikeout, Tom Seaver's only career no-hitter, Willie McCovey's five hundredth home run, and Pete Rose's marathon forty-four-game hitting streak. The 1978 season played out against a backdrop of disco music, bell-bottom pants, and gas-guzzling cars, while Hollywood answered a desperate longing for a simpler time with nostalgic offerings such as *Grease*, *The Buddy Holly Story*, *American Hot Wax*, *Animal House*, and *Superman*. Robin Williams became a household name with a guest appearance on the popular TV show *Happy Days*, Atlantic City debuted its first casino, and Jill Clayburgh symbolized the emerging independence of women in *An Unmarried Woman*. In a memorable end to the baseball season, Reggie Jackson and Bucky Dent led the Yankees to their second consecutive World Series over the Dodgers after losing the first two games, then winning four in a row. With a month-by-month approach, David Krell breaks down major events in both baseball and American culture at large in 1978, chronicling in novelistic detail the notable achievements of some of the greatest players of the era, along with some of the national pastime's quirkiest moments, to capture an extraordinary year in baseball.

kristen bach archives: Knocking on the Door Christopher Bonastia, 2010-11-16 *Knocking on the Door* is the first book-length work to analyze federal involvement in residential segregation from Reconstruction to the present. Providing a particularly detailed analysis of the period 1968 to 1973, the book examines how the U.S. Department of Housing and Urban Development (HUD) attempted to forge elementary changes in segregated residential patterns by opening up the suburbs to groups historically excluded for racial or economic reasons. The door did not shut completely on this possibility until President Richard Nixon took the drastic step of freezing all federal housing funds in January 1973. *Knocking on the Door* assesses this near-miss in political history, exploring how HUD came surprisingly close to implementing rigorous antidiscrimination policies, and why the agency's efforts were derailed by Nixon. Christopher Bonastia shows how the Nixon years were ripe for federal action to foster residential desegregation. The period was marked by new legislative protections against housing discrimination, unprecedented federal involvement in housing construction, and frequent judicial backing for the actions of civil rights agencies. By comparing housing desegregation policies to civil rights enforcement in employment and education, Bonastia offers an unrivaled account of why civil rights policies diverge so sharply in their ambition and effectiveness.

kristen bach archives: Race and Gender in the Western Music History Survey Horace J. Maxile, Jr., Kristen M. Turner, 2022-06-22 *Race and Gender in the Western Music History Survey: A Teacher's Guide* provides concrete information and approaches that will help instructors include women and people of color in the typical music history survey course and the foundational music theory classes. This book provides a reconceptualization of the principles that shape the decisions

instructors should make when crafting the syllabus. It offers new perspectives on canonical composers and pieces that take into account musical, cultural, and social contexts where women and people of color are present. Secondly, it suggests new topics of study and pieces by composers whose work fits into a more inclusive narrative of music history. A thematic approach parallels the traditional chronological sequencing in Western music history classes. Three themes include people and communities that suffer from various kinds of exclusion: Locales & Locations; Forms & Factions; Responses & Reception. Each theme is designed to uncover a different cultural facet that is often minimized in traditional music history classrooms but which, if explored, lead to topics in which other perspectives and people can be included organically in the curriculum, while not excluding canonical composers.

kristen bach archives: Drawn to the Stacks Carrye Kay Syma,, Robert G. Weiner, Donell Callender, 2025-03-11 This is the first academic volume to examine the librarian and archival professional through the lens of sequential art. The portrayal of libraries/librarians in sequential art has a long history from the Golden Age to the present day. Libraries and archives in comics historically are seen as places of important knowledge and information. Diving deep into a multitude of sources, these new essays show how librarians/archivists and libraries/archives are used within the comic medium to address multiculturalism, LGBTQ issues, archival practice, and even the concept of librarians as baddies or stewards of information unwilling to share with others. The wide breadth of material examined here includes Miyazaki's Nausicaa, Spiegelman's Maus, Bechdel's Queer Dykes to Watch Out For, Marvel's Black Panther, Nono's Yoake No Toshokan, DC's Batgirl and Buffy the Vampire Slayer comics, Gaiman's The Sandman, webcomics, Marvel's America Chavez character, Schultz's Xenozoic Tales and much more.

kristen bach archives: Ida B. Wells-Barnett Naomi E. Jones, 2019-07-15 Ida B. Wells-Barnett began her career at sixteen as a teacher and went on to become a lecturer, investigative journalist, and advocate for social justice. As the first journalist to research and document lynching, she battled racial injustice through her writing and public speaking. She was also a women's rights activist who helped organize women's clubs to work toward suffrage and urban reform. Through historical photographs, educational sidebars, and compelling writing, this biography discusses Wells-Barnett's most significant works and her contributions to civil rights and women's suffrage, along with the major events in her life that shaped her work.

kristen bach archives: *Global Traffic* B. Sebek, S. Deng, 2016-01-23 This remarkable collection investigates the relations between literature and the economy in the context of the unprecedented expansion of early modern England's long distance trade. Studying a range of genres and writers, both familiar and lesser known, the essays offer a new history of globalization as a complex of unevenly developing cultural, discursive, and economic phenomena. While focusing on how long distance trade contributed to England's economic growth and cultural transformation, the collection taps into scholarly interest in race, gender, travel and exploration, domesticity, mapping, the state and emergent nationalism, and proto-colonialism in the early modern period.

kristen bach archives: Early Modern Performance Beyond the Public Stage Amrita Sen, Jennifer Linhart Wood, 2025-09-18 The first major work to explore and analyse the popular 'extra-theatrical' performances in late medieval and Renaissance England. This wider heterogeneous category of early modern performance included puppetry, fireworks shows, rope dancing, minstrelsy, performing animals, games, civic drama, court masques, university drama, morris dances, and ceremonial rituals, all taking place in a variety of venues. The volume reveals how these extra-theatrical productions shaped urban and rural life and conveyed a sense of spectacular excess, of exceeding traditional genres, conventional modes of performance and the typical bounds of theatrical space. The spaces where medieval and early modern drama flourished include pageant carts, convents, private homes, universities, waterways, and the streets of both urban and rural communities. Much like public theatres, these performance spaces also played a pivotal role in articulating individual, communal, and national aspirations. Spanning the medieval period to the late 17th century, this volume engages with questions of spatiality, gender, religion, transcontinental exchanges, and colonialism, presenting the latest research from scholars across the globe.

kristen bach archives: Singing Like Germans Kira Thurman, 2021-10-15 In *Singing Like Germans*, Kira Thurman tells the sweeping story of Black musicians in German-speaking Europe over more than a century. Thurman brings to life the incredible musical interactions and transnational collaborations among people of African descent and white Germans and Austrians. Through this compelling history, she explores how people reinforced or challenged racial identities in the concert hall. Throughout the nineteenth and twentieth centuries, audiences assumed the categories of Blackness and Germanness were mutually exclusive. Yet on attending a performance of German music by a Black musician, many listeners were surprised to discover that German identity is not a biological marker but something that could be learned, performed, and mastered. While Germans and Austrians located their national identity in music, championing composers such as Bach, Beethoven, and Brahms as national heroes, the performance of their works by Black musicians complicated the public's understanding of who had the right to play them. Audiences wavered between seeing these musicians as the rightful heirs of Austro-German musical culture and dangerous outsiders to it. Thurman explores the tension between the supposedly transcendental powers of classical music and the global conversations that developed about who could perform it. An interdisciplinary and transatlantic history, *Singing Like Germans* suggests that listening to music is not a passive experience, but an active process where racial and gendered categories are constantly made and unmade.

kristen bach archives: Utopia's Ghost Reinhold Martin, 2010-04-15 Written at the intersection of culture, politics & the city, particularly in the context of corporate globalization, 'Utopia's Ghost' challenges dominant theoretical paradigms & opens new avenues for architectural scholarship & cultural analysis.

kristen bach archives: The Roots of Educational Inequality Erika M. Kitzmiller, 2021-12-03 The *Roots of Educational Inequality* chronicles the transformation of one American high school over the course of the twentieth century to explore the larger political, economic, and social factors that have contributed to the escalation of educational inequality in modern America. In 1914, when Germantown High School officially opened, Martin G. Brumbaugh, the superintendent of the School District of Philadelphia, told residents that they had one of the finest high schools in the nation. Located in a suburban neighborhood in Philadelphia's northwest corner, the school provided Germantown youth with a first-rate education and the necessary credentials to secure a prosperous future. In 2013, almost a century later, William Hite, the city's superintendent, announced that Germantown High was one of thirty-seven schools slated for closure due to low academic achievement. How is it that the school, like so many others that serve low-income students of color, transformed in this way? Erika M. Kitzmiller links the saga of a single high school to the history of its local community, its city, and the nation. Through a fresh, longitudinal examination that combines deep archival research and spatial analysis, Kitzmiller challenges conventional declension narratives

that suggest American high schools have moved steadily from pillars of success to institutions of failures. Instead, this work demonstrates that educational inequality has been embedded in our nation's urban high schools since their founding. The book argues that urban schools were never funded adequately. Since the beginning of the twentieth century, urban school districts lacked the tax revenues needed to operate their schools. Rather than raising taxes, these school districts relied on private philanthropy from families and communities to subsidize a lack of government aid. Over time, this philanthropy disappeared leaving urban schools with inadequate funds and exacerbating the level of educational inequality.
