kang shin il dramas: The Changing Face of Korean Cinema Brian Yecies, Aegyung Shim, 2015-12-22 The rapid development of Korean cinema during the decades of the 1960s and 2000s reveals a dynamic cinematic history which runs parallel to the nation's political, social, economic

and cultural transformation during these formative periods. This book examines the ways in which South Korean cinema has undergone a transformation from an antiquated local industry in the 1960s into a thriving international cinema in the 21st century. It investigates the circumstances that allowed these two eras to emerge as creative watersheds, and demonstrates the forces behind Korea's positioning of itself as an important contributor to regional and global culture, and especially its interplay with Japan, Greater China, and the United States. Beginning with an explanation of the understudied operations of the film industry during its 1960s take-off, it then offers insight into the challenges that producers, directors, and policy makers faced in the 1970s and 1980s during the most volatile part of Park Chung-hee's authoritarian rule and the subsequent Chun Doo-hwan military government. It moves on to explore the film industry's professionalization in the 1990s and subsequent international expansion in the 2000s. In doing so, it explores the nexus and tensions between film policy, producing, directing, genre, and the internationalization of Korean cinema over half a century. By highlighting the recent transnational turn in national cinemas, this book underscores the impact of developments pioneered by Korean cinema on the transformation of 'Planet Hallyuwood'. It will be of particular interest to students and scholars of Korean Studies and Film Studies.

kang shin il dramas: **Dancing with the Dragon** Dennis Hickey, Baogang Guo, 2010-04-30 For the past several decades, China has been transforming itself from an isolated and backward agrarian society into an economic superpower with global interests and responsibilities. Over 300 million Chinese have been lifted out of poverty and China now enjoys the fastest growing and third largest economy on earth. Not surprisingly, numerous changes in China's foreign relations have accompanied the astounding transformations in the country's domestic politics and society. Perhaps most surprising to some observers is Beijing's aggressive foray into the so-called developing world. This co-edited book focuses on China's increasing engagement with many of the less developed countries-particularly those in Africa, Latin America, Southeast Asia, Central Asia and the Middle East-and explores the current and future trends in Beijing's foreign relations. The old and hackneyed call for revolutionary struggle and world revolution has been consigned to the dustbin of history. In its place is a concrete pledge to construct a 'win-win' relationship with any country willing to deepen ties with Beijing. Dancing with the Dragon will help readers gain a greater understanding of China's foreign relations in this critical part of the global community.

Taking a variety of communication studies perspectives, this book first addresses why North Korea matters for the general audience, academic audience, and communication scholars in particular, and how communication studies can benefit from studying North Korea. Drawing on insights from history and international relations, this book shows how the Cold War and Old-World Order shape media and communications in places like North Korea, as well as how the desire for people to communicate and to be understood can surpass such a regime's tight control. This multifaceted look at communication within this fascinating and under-studied nation will appeal to scholars, researchers, and upper-level students of communication studies, media studies, journalism, new and digital media, and political communication.
