kode orange tv: The Mysteries of Haditha M. C. Armstrong, 2020-09 M. C. Armstrong secured his embed as a journalist with the Navy SEALs in 2008. Shortly before he left for Iraq his father asked him to tell the story no one else seemed to be telling, the story of the people sometimes constructed as our friends and other times our enemies: the Iraqis. "But what about them?" he asked. "Who's their good guy? Who's their George Washington? That's the story you want to find. Talk to them." Armstrong's searing memories about his relationship with his father, his fiancé, and his SEAL team companion take the reader on a nosedive ride from a historically Black college in the American South straight into Baghdad, the burn pits, and the desert beyond the mysterious Haditha dam. Culminating in the disclosure of a devastating secret, *The Mysteries of Haditha* explores the lengths Armstrong was willing to go to prove himself and to witness a truth he couldn't have prepared himself to receive. At once daring, dark, and hilarious, this memoir of Armstrong's journey pulls no punches and lifts the veil on the lies we tell each other and the ones we tell ourselves. *The Mysteries of Haditha* is a coming-of-age story and an unprecedented glimpse into the heart of the war on terror.

kode orange tv: *If You Didn't Bring Jerky, What Did I Just Eat?* Bill Heavey, 2008-10-07 A hilarious collection of essays dedicated to life in the great outdoors from *Field & Stream's* acclaimed Sportsman's Life columnist. For nearly a decade, Bill Heavey, an outdoorsman marooned in suburbia, has written the Sportsman's Life column on the back page of *Field & Stream*, where he does for hunting and fishing what David Feherty does for golf and Lewis Grizzard did for the South. *If You Didn't Bring Jerky, What Did I Just Eat?* is the first collection of Heavey's sidesplitting observations on life as a hardcore (but often hapless) outdoorsman. Whether he's hunting cougars in the desert, scheming to make his five-year-old daughter love fishing, or chronicling his father's life through a succession of canine companions, Heavey brings his trademark wit to a wide-range of outdoor enthusiasms, running the gamut from elite expeditions to ordinary occupations. In turns hysterical and poignant, entertaining and educational, this is an irresistible addition to the collection

of any avid outdoorsman—or any suburbanite intrigued by the call of the wild.

kode orange tv: Pandemic Daniel Kalla, 2007-04-01 Genesis of a Plague Right now, in a remote corner of rural China, a farmer and his family are sharing their water supply with their livestock: chickens, ducks, pigs, sheep. They share the same waste-disposal system, too. Bird viruses meet their human counterparts in the bloodstreams of the swine, where they mix and mutate before spreading back into the human population. And a new flu is born.... Dr. Noah Haldane, of the World Health Organization, knows that humanity is overdue for a new killer flu, like the great influenza pandemic of 1919 that killed more than twenty million people in less than four months. So when a mysterious new strain of flu is reported in the Gansu Province of mainland China, WHO immediately sends a team to investigate. Haldane and his colleagues soon discover that the new disease, dubbed Acute Respiratory Collapse Syndrome, is far more deadly than SARS, killing one in four victims, regardless of their age or health. But even as WHO struggles to contain the outbreak, ARCS is already spreading to Hong Kong, London, and even America. In an age when every single person in the world is connected by three commercial flights or fewer, a killer bug can travel much faster than the flu of 1919. Especially when someone is spreading the virus on purpose... At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

kode orange tv: Early Linoleum Brenda Iijima, 2015-03-11 In a neural rush, Early Linoleum engages the propulsive flow of contemporaneous valences—psycho-geography meets in the force-field of biopolitical conditions. Poet activists congregate on the steps of the New York Public Library, there's art beneath the dirt, rock outcroppings communicate with Jacques Derrida and the transactions that make war and love collide. In this textual sensorium, connections between climate ecology and political ecology are reckoned with somatically and lyrically, locally and globally. The thinking through charged spaces within and between human animal structures, especially during states of perpetual strife, as in global climate change and war—the dissonance, air, wind flow, coagulated ideas, affective registers—frequencies diffuse or mutate, streaming from urban sites to the rural and wild. This work is a revelatory and bold response for our times.
