jane goodall parents: *Becoming Good Parents* Mufid James Hannush, 2012-02-01 *Becoming Good Parents* goes beyond a psychological understanding of parenting to include a deeper explication of the philosophical (moral) and existential (spiritual) dimensions of parenting. It counters the contemporary notion that parents can be satisfied with simply being good enough in their parenting practices, which encourages a sense of complacency. Through everyday examples, illustrative use of Harper Lee's moral novel *To Kill a Mockingbird*, and a reinterpretation of the theoretical viewpoints of psychologists Erik Erikson, Heinz Kohut, and Rollo May, along with philosophers Iris Murdoch and Michael Gelven, the author argues that the struggle toward perfection (goodness) is a natural human impulse. Parenting provides an optimal context for the practice of character refinement, which can potentially contribute to the psychological and spiritual growth of both parents and children. Ultimately, the book demonstrates that by becoming good parents, we become good persons.

jane goodall parents: *Pearls of Jewish Wisdom on Living with Kindness* Shmuly Yanklowitz, 2023-06-29 In this book, we will share forty lessons, each with its own unique theme. The common thread to the series is living with deeper kindness. How can the Jewish tradition inspire us to live with deeper love and compassion? How can Jewish pearls of wisdom inform how we care for one another? The book contains five sections: Kindness Toward Specific Individuals; Kindness Toward All Individuals; Kindness Through Restraint; Care for Our Environment; and Self-Improvement as a Catalyst for Kindness to Others. The first two sections address proactive kindness towards our fellow humans; the third addresses kindness by avoiding hurting others; the fourth, kindness towards all of God's creations, including animals and nature, as kindness cannot be only people-directed; the fifth serves as a starting point and catalyst for all of the above, for without first being kind to ourselves and improving our general character we cannot be truly kind towards others. The argument is not only that God wants us to live with kindness and that Torah necessitates it, but that kindness has the greatest chance of bringing happiness and meaning to our lives.
