Overview of Kent Hovind Seminars

Kent Hovind seminars are educational sessions primarily focused on presenting young Earth creationist views and challenging mainstream scientific theories such as evolution and the age of the Earth. Dr. Kent Hovind, a controversial figure in the creationist movement, is known for his background in ministry and education, combining theological insights with scientific discussions. These seminars have been offered for decades and are often hosted in churches, schools, and conferences across the United States and beyond. The goal is to equip attendees with arguments and evidence that align with a literal interpretation of the Bible, particularly the Genesis account of creation.

History and Background

The seminars began in the late 1980s and early 1990s as part of Kent Hovind's ministry outreach. His background includes a doctorate in Christian education, and he has produced numerous teaching materials and videotaped lectures. Over time, the seminars have evolved to include multimedia presentations, interactive Q&A sessions, and printed resources designed to engage a wide audience. Core Topics Covered in Kent Hovind Seminars

The content of Kent Hovind seminars covers a broad range of topics that challenge conventional scientific theories while promoting a literal interpretation of the Bible. These topics are presented with the intention of providing scientific and biblical evidence supporting young Earth creationism.

Creation vs. Evolution

A central theme of the seminars is the debate between creationism and evolutionary theory. Kent Hovind presents arguments against evolution, citing perceived gaps and inconsistencies in fossil records, radiometric dating methods, and natural selection. The seminars emphasize creation as a direct act of God, occurring within a six-day period as described in Genesis.

The Age of the Earth and Universe

Kent Hovind seminars assert that the Earth and universe are approximately 6,000 to 10,000 years old, contrary to the mainstream scientific consensus of billions of years. The sessions critique radiometric dating techniques and present alternative interpretations of geological and astronomical data consistent with a young Earth framework.

The Global Flood and Geological Evidence

The seminars extensively discuss the biblical account of a global flood during the time of Noah, explaining geological formations and fossil deposits as evidence supporting this event. The flood is presented as a key factor in shaping Earth's geology, challenging uniformitarian assumptions used by mainstream geology.

Scientific Critiques and Apologetics

Beyond origins, the seminars address broader scientific topics such as genetics, astronomy, and biology from a creationist perspective. The objective is to provide apologetic tools that equip attendees to engage in discussions and debates about science and faith effectively.

Structure and Format of the Seminars

Kent Hovind seminars are designed to be engaging, accessible, and informative. The format typically combines lecture-style presentations with multimedia aids and interactive components to facilitate learning and retention.

kent hovind seminars: The Sphere of Influence Edward Hendrie, 2019-07-07 This book is a sequel to *The Greatest Lie on Earth (Expanded Edition): Proof That Our World Is Not a Moving Globe*. It will primarily focus on the infiltration into the church of the superstitious myth of heliocentrism and how that infiltration has served to undermine the gospel. The gospel is the entire Holy Bible, not just some of it. Matthew 4:4. Christian belief is an all or nothing proposition. "All scripture is given by inspiration of God, and is profitable for doctrine, for reproof, for correction, for instruction in righteousness." 2 Timothy 3:16. God's account of his creation is part and parcel of the gospel. A person with genuine faith believes what Jesus said about both heavenly and earthly things. "If I have told you earthly things, and ye believe not, how shall ye believe, if I tell you of heavenly things?" John 3:12. Jesus is God. Jesus created all things in heaven and on earth. See Colossians 1:16-18. God has revealed himself through his creation. [T]hat which may be known of God is manifest in them; for God hath shewed it unto them. For the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made, even his eternal power and Godhead; so that they are without excuse. Romans 1:19-20. If men have a misunderstanding of God's creation, they will also have a misunderstanding of who God is. If people believe in a creation that does not exist, they consequently also believe in a creator that does not exist. It is essential, therefore, to have an accurate understanding of God's creation. God did not make a movable, spherical earth. If men believe in a heliocentric creation, they will necessarily believe in a heliocentric creator. A heliocentric creation does not exist. So also, a heliocentric creator does not exist. A heliocentric creator is a false god. We have been warned to avoid the preaching of a false gospel, which presents a false Jesus. For if he that cometh preacheth another Jesus, whom we have not preached, or if ye receive another spirit, which ye have not received, or another gospel, which ye have not accepted, ye might well bear with him. 2 Corinthians 11:4.

kent hovind seminars: *Delozier Family Hilarities* Christine Erman Delozier, 2025-01-13 Here's an example of the short stories in this book: Walkin' on water We had just finished our nightly routine of reading a Bible story, praying, and brushing teeth. I was nearing the end of yet another fulfilling day of being a mother grateful to be forgiven and in love with Jesus and people. All right, boys, I told Dave and Tim. It's time to go to bed. Anyone who knows toddlers knows that they don't just walk places--they have to experiment with every mode of travel they can dream up. So Timmy, in typical two-year-old fashion, began to slide on the linoleum with a broad, sweeping motion of his hands as he pushed off with his legs to move forward. As he did that, he imaginatively exclaimed with glee, Yook, Imma! I'm swimmin' to bed! As Davey looked down at his little brother, his imagination sparked with a picture right out of the Jesus movie he loves to watch. He lifted up his head and walked on with an air of maturity that belied his actual character, confidently saying, I'm walkin' on watah. ~ 55 ~

kent hovind seminars: **The Scientific Case Against Scientific Creationism** Jon P. Alston, 2003-09 Sociologist Jon P. Alston offers a unique and clear analysis of the weaknesses of scientific creationism and intelligent design by identifying what creationists say when they reject evidence for evolution. He demonstrates how scientific creationists accept non-scientific statements that contradict established scientific knowledge. Acceptance of anti-evolutionary knowledge also demands acceptance of a literal six-day creation and other statements contradicting scientific findings. Few persons have read so closely the writings of scientific creationists to illustrate how anti-scientific anti-evolutionists become when they criticize the fact of evolution. Creationists are forced to develop just-so stories to defend their literal interpretations of Biblical scripture. Alston finds creationists cannot defend their religious beliefs using established scientific methodologies and principles.

kent hovind seminars: Going Ape Brandon Haught, 2014-04-22 Before William Jennings Bryan successfully prosecuted John Scopes in the infamous "Scopes Monkey Trial," he was a prominent antievolution agitator in Florida. In *Going Ape*, Brandon Haught tells the riveting story of how the war over teaching evolution began and unfolded in Florida, one of the nation's bellwether states. It still simmers just below the surface, waiting for the right moment to engulf the state. The saga opens with the first shouts of religious persecution and child endangerment in 1923 Tallahassee and continues today with forced delays and extra public hearings in state-level textbook adoptions. These ceaseless battles feature some of the most colorful culture warriors imaginable: a real estate tycoon throwing his fortune into campaigns in Miami; lawmakers attempting to insert the mandatory teaching of creationism into bills; and pastors and school board members squabbling in front of the national media that descends into their small town. The majority of participants, however, have been, and still are, average people, and Haught expertly portrays these passionate citizens and the sense of moral duty that drives each of them. Given a social climate where the teaching of evolution continues to sharply divide neighbors and communities, *Going Ape* is a must-read for anyone concerned with the future of public education.
