justin bariso success: Why Digital Transformations Fail Tony Saldanha, 2019-07-23 Former Procter & Gamble Vice President for IT and Shared Services, Tony Saldanha gives you the keys to a successful digital transformation: a proven five-stage model and a disciplined process for executing it. Digital transformation is more important than ever now that we're in the Fourth Industrial Revolution, where the lines between the physical, digital, and biological worlds are becoming ever more blurred. But fully 70 percent of digital transformations fail. Why? Tony Saldanha, a globally awarded industry thought-leader who led operations around the world and major digital changes at Procter & Gamble, discovered it's not due to innovation or technological problems. Rather, the devil is in the details: a lack of clear goals and a disciplined process for achieving them. In this book, Saldanha lays out a five-stage process for moving from digitally automating processes here and

there to making digital technology the very backbone of your company. For each of these five stages, Saldanha describes two associated disciplines vital to the success of that stage and a checklist of questions to keep you on track. You want to disrupt before you are disrupted—be the next Netflix, not the next Blockbuster. Using dozens of case studies and his own considerable experience, Saldanha shows how digital transformation can be made routinely successful, and instead of representing an existential threat, it will become the opportunity of a lifetime.

In this fully revised and updated second edition of The Learning Leader, Douglas B. Reeves helps leadership teams go beyond excuses to capitalize on their strengths, reduce their weaknesses, and reset their mindset and priorities to achieve unprecedented success. A critical key is recognizing student achievement as more than just a set of test scores. Reeves asserts that when leaders focus exclusively on results, they fail to measure and understand the importance of their own actions. He offers an alternative—the Leadership for Learning Framework, which helps leaders identify and distinguish among four different types of educators and provide more effective, tailored support to - Lucky educators, who achieve high results but don't understand how their actions influence achievement. - Losing educators, who achieve low results yet keep doing the same thing, expecting different outcomes. - Learning educators, who have not yet achieved the desired results but are working their way toward excellence. - Leading educators, who achieve high results and understand how their actions influence their success. Reeves stresses that effective leadership is neither a unitary skill nor a solitary activity. The Learning Leader helps leaders reconceptualize their roles in the school improvement process and motivate themselves and their colleagues to keep working to better serve their students.
