Historical Context of Jewish Entrepreneurship

The history of Jewish entrepreneurship spans thousands of years and is deeply intertwined with the social, religious, and economic conditions experienced by Jewish communities worldwide. From ancient times, Jewish traders and merchants operated across diverse regions, often serving as vital links in international trade networks. During the Middle Ages, restrictions on land ownership and participation in certain professions led many Jews to specialize in commerce, finance, and money lending, areas that were pivotal for economic development in Europe and the Middle East.

Medieval Trade and Finance

In medieval Europe, Jewish entrepreneurs established themselves as essential players in commerce and finance despite facing legal and social restrictions. Their expertise in money management and credit systems allowed them to serve as financiers for monarchs and nobles, facilitating economic growth. These activities required a high degree of trust, literacy, and numeracy, skills

that were cultivated through strong communal education.

jewish entrepreneurship: Jewish Immigrant Entrepreneurship in New York and London 1880-1914 A. Godley, 2001-07-18 How successful were the East European Jewish immigrants in London compared with the vast majority that went to New York? This critical question - one that lies at the heart of debates on Jewish modernity, ethnic and racial assimilation, and the impact of culture on entrepreneurship - is assessed systematically for the first time in this volume. Using new evidence of Jewish immigration, mobility and assimilation, Andrew Godley shows that despite similar backgrounds and opportunities, the Jews in London were far less entrepreneurial and those in New York. As the Jewish immigrants assimilated either American or British cultural values, those in New York moved en masse into self-employment, while those in London opted to remain as workers.

Godley then reinterprets the broad thrust of British twentieth century economic history, emphasising how these long-standing anti-entrepreneurial and highly conservative craft cultural values among the English working classes acted as a drag on innovation, hampering industrial relations, investment and growth.

jewish entrepreneurship: *Entrepreneurship* Wojciech W. Gasparski, Stefan Kwiatkowski, Leo V. Ryan, CSV, 2011-12-31 Entrepreneurship is the capability to be an entrepreneur. Beyond that idea is an ideology that a person's business actions result in industrial growth or technical advances, making that person a leader in the economic world. The contributors to this latest volume in the Praxiology Series, now available in paperback, are united in claiming that resourcefulness is a characteristic of people who take effective action, and that effectiveness is dependent on good, ethical purposes. The wide-angle definition of entrepreneurship presented in this volume demands that people and organizations engage in more than simple self-interest, but also display awareness of the prospects for wider growth and advances resulting from their decisions. In a period of financial crisis caused by irresponsible behavior by eminent would-be entrepreneurs the significance of this perspective should be evident. The editors claim that growth, not stagnation, advantage, not decline, are irreversible traits of business activity. This is why the very concept of entrepreneurship calls for values and responsibility—even more than in the past. The contributors develop the idea of entrepreneurship from both theoretical approaches religious and practical, or applied perspectives. This inter- and multidisciplinary approach offers readers a chance to rebuild trust in entrepreneurship.

jewish entrepreneurship: Doing Business in Minority Markets Robert Mark Silverman, 2021-12-12 First Published in 2000. The invisible hand of the market cannot conceal color. This study contends that the economy is an extension of society's system of racial and ethnic stratification. The central argument of this study is that the internal colonial paradigm should be used as a guiding principle in the analysis of minority business development in minority markets. Through the use of this paradigm, the institutional constraints of doing business in a minority market can be identified. The ethnic beauty aids industry was selected as the subject of this case study because it is embedded in the context of minority markets, which entail high concentrations of minority entrepreneurs and consumers. Minority entrepreneurs enter minority markets to avoid racial barriers they perceive in the mainstream economy, and minority consumers find minority markets more accessible and responsive to their consumption needs.

jewish entrepreneurship: Diaspora Business Maria Elo, Liesl Riddle, 2019-07-22 This volume was first published by Inter-Disciplinary Press in 2016. *Diaspora Business* is a unique book taking an overarching view to diaspora and business on a global scale. The book is structured in four parts; the first one concentrates on diaspora business, investment and trade, the second one on diaspora entrepreneurship and internationalization, the third one on diaspora networks, roles and social capital, and the fourth part focuses on diaspora frameworks, institutions and policy making.

jewish entrepreneurship: World Market Transformation Robrecht Declercq, 2017-05-25 To the surprise of many, regionally embedded clusters of small to medium sized businesses have continued to exist in spite of industrialisation and mass production. While scholars have discovered that the advantages of embeddedness in terms of industrialisation were situated in interfirm cooperation and conflict resolving mechanisms, it is far less clear how changing historical circumstances on the world market, i.e. globalisation, affected such systems. Taking a look inside Leipzig, a capital of the

global fur industry between 1870 and 1939 with its numerous highly specialised businesses, both in production as well as trade, *World Market Transformation* examines the robustness of district firms within the highly volatile international fur business. This book examines how firm embeddedness not only served to overcome challenges related to industrialisation, but also strengthened the abilities of cluster firms to deal with changing world market circumstances. *World Market Transformation* integrates the interior-biased research tradition on local business systems and industrial districts into the exterior fields of global and transnational history. It is demonstrated that the local business district not only emerged because of the expansion of international trade, but that district processes of interfirm cooperation also gave shape to the spatial distribution, conventions and structures of the very same world market. The analysis of embedded communities thus offers an important instrument to examine phenomena of economic globalisation, but also how such macro-economic developments have been shaped and actively constructed by local actors.

jewish entrepreneurship: Essential Outsiders Daniel Chirot, Anthony Reid, 2011-10-01
Ethnic Chinese in Southeast Asia, like Jews in Central Europe until the Holocaust, have been remarkably successful as an entrepreneurial and professional minority. Whole regimes have sometimes relied on the financial underpinnings of Chinese business to maintain themselves in power, and recently Chinese businesses have led the drive to economic modernization in Southeast Asia. But at the same time, they remain, as the Jews were, the quintessential “outsiders.” In some Southeast Asian countries they are targets of majority nationalist prejudices and suffer from discrimination, even when they are formally integrated into the nation. The essays in this book explore the reasons why the Jews in Central Europe and the Chinese in Southeast Asia have been both successful and stigmatized. Their careful scholarship and measured tone contribute to a balanced view of the subject and introduce a historical depth and comparative perspective that have generally been lacking in past discussions. Those who want to understand contemporary Southeast Asian and the legacy of the Jewish experience in Central Europe will gain new insights from the book.

jewish entrepreneurship: Case Studies in Jewish Business Ethics Aaron Levine, 2000
Many people think of business as a game of strategy, and argue that whatever works for business success is acceptable, even if it involves cheating, deceptions, and other improprieties. Jewish business law rejects this approach. Using specific case studies, this book analyzes the strategies that are impermissible, discussing deceptive advertising, negative advertising, pressure tactics in sales, insider trading, price matching, worker evaluations, termination policy, and many others. An excellent adult education volume.

jewish entrepreneurship: Cotton Capitalists Michael R Cohen, 2017-12-05 “Effectively argues that ethnic networks were important to...Jewish businesses as they participated in the cotton economy.” —Choice In the nineteenth century, Jewish merchants created a thriving niche economy in the United States’ most important industry—cotton. *Cotton Capitalists* argues that Jewish merchants’ status as a minority fueled their success by fostering ethnic networks of trust. Trust in the nineteenth century was the cornerstone of economic transactions, and this trust was largely fostered by ethnicity. Much as money flowed along ethnic lines between Anglo-American banks, Jewish merchants in the Gulf South used their own ethnic ties with other Jewish-owned firms in New York, as well as Jewish investors across the globe, to capitalize their businesses. They relied on these family connections to direct Northern credit and goods to the war-torn South, avoiding the constraints of the anti-Jewish prejudices which had previously denied them access to credit, allowing them to survive economic downturns. These American Jewish merchants reveal that ethnicity matters in the development of global capitalism. The story of Jews in the American cotton trade is far more than the story of American Jewish success and integration—it is the story of the role of ethnicity in the development of global capitalism. “This eloquent study reminds us that we cannot fully understand the Souths economic revival in the age of reconstruction without looking at the critical role played by immigrant Jewish merchants.” —Rebecca Kobrin, Knapp Associate Professor of American Jewish History, Columbia University “Michael R Cohens...well-written book, reveals

how...Jews played a key role in building the cotton economy of the South.” —The Jewish Chronicle

jewish entrepreneurship: Jews in Business and Their Representation in German Literature, 1827-1934 John Ward, 2010 The emancipation of Jews that commenced in Germany in the early 19th century pushed many Jews into urban commerce, industries, and intellectual professions. The ongoing modernization and the Jewish prominence in business brought about an anti-Jewish reaction. Jews were seen as the incarnation of the new materialistic Zeitgeist, dishonest merchants pursuing non-German business practices, and usurpers of economic power. The Jews represented an alien, unwanted economic system. The backlash against the Jewish businessman was reflected in contemporary literature, from Wilhelm Hauff's *Jud Süß* (1827) to the Nazi novel *Shylock unter Bauern* by Felix Nabor (1934). Examines the representation of the Jewish businessman in German literature, in both antisemitic works and apologetic ones. Two schools of thought can be discerned in these writings: that the Jews, including the businessmen, can be corrected and assimilated into the German nation (e.g. in Freytag's *Soll und Haben*, 1855); and the racist and eliminationist conception of the Jews as unassimilable and inherently detrimental aliens who have to be removed from the body of the nation (as in Wilhelm von Polenz's *Der Büttnerbauer*, 1895), with Heinrich Mann's anti-Jewish writings somewhere in between. Discusses also the ambivalent stance of Theodor Fontane. Dwells on two cautionary tales written by Jewish authors and addressed to the Jews: the novel *Jud Süß* by Feuchtwanger (1925) and the play *Jud Süß* by Paul Kornfeld (1929), as well as responses to antisemitism addressed to a general audience: *Der neue Ahasver* by Fritz Mauthner (1881), *René Richter* by Lothar Brieger-Wasservogel (1906), and Hermann Bahr's *Die Rotte Korahs* (1919), a philosemitic non-Jewish response.

jewish entrepreneurship: Frontiers of Ottoman Studies: Volume I Colin Imber, Rhoads Murphey, Keiko Kiyotaki, 2004-11-26 *Frontiers of Ottoman Studies* provides a comprehensive overview of the surge in research into Ottoman history and culture over the past two decades. The first volume reflects the growing interest in the provinces, communities and cultures outside the imperial capital of Istanbul and covers four major areas: politics and Islam; economy and taxation; development of Ottoman towns and Arab and Jewish communities. Chapters on Ottoman legal and fiscal institutions provide a fascinating insight into the Ottoman government's interaction with the Empire's subjects, while reviews of Egypt and the Arab provinces emphasise the stirrings of Arab nationalism in the late nineteenth and twentieth centuries that ultimately contributed to the demise of the Empire.

jewish entrepreneurship: *Jews in the German Economy* Werner Eugen Mosse, 1987 This study of German-Jewish bankers, merchants and industrialists, and their activities, assesses the nature of their contribution to German economic development.

jewish entrepreneurship: The Spirit of Conscious Capitalism Michel Dion, Moses Pava, 2022-10-20 This book provides a constructive criticism of the emerging practice of conscious capitalism from the perspective of world religions and spiritualities. Conscious capitalism, to many of its adherents, represents an evolutionary step forward beyond the dominant neo-liberal paradigm, where it often appears that just about everything is for sale. Is conscious capitalism consistent with the values inherent in religious and spiritual world-views and does it provide a better fit for bringing out the best that business has to offer? This book answers these questions and many more. An appealing read for researchers in business ethics as well as any reader critical of the excrescences of capitalism.

jewish entrepreneurship: Cotton Capitalists Michael Ralph Cohen, 2017

jewish entrepreneurship: Family, Family Firm, and Strategy Doreen Arnoldus, 2002 This study analyses the entrepreneurial strategies of six Dutch family firms in the period from 1880 to 1970. The case studies reconstruct the succession strategies and strategies in the capital and labour markets, as well as strategies regarding marketing and the supply of raw materials.

jewish entrepreneurship: Jews and Muslims in the Russian Empire and the Soviet Union Franziska Davies, Martin Schulze Wessel, Michael Brenner, 2015-11-18 The Russian Empire and the

Soviet Union were multiethnic and multireligious empires, which ruled over a large number of Jews and Muslims. In many ways these two non-Christian minorities presented similar challenges to the imperial order. Which policies did the state pursue toward Jews and Muslims? How did Jews and Muslims attempt to advance their interests in the political sphere? Which role did they play in the imperial army? What did the Jewish and Muslim Enlightenment movements have in common? In which respects were the experiences of Jews and Muslims fundamentally different? This book brings together specialists in Russian-Jewish and Russian-Muslim history and offers perspectives for a comparative approach to the history of Jews and Muslims in Russia.
