john famularo latest news: *Baseball's Pivotal Era, 1945-1951* William Marshall, 2021-11-21 With personal interviews of players and owners and with over two decades of research in newspapers and archives, Bill Marshall tells of the players, the pennant races, and the officials who shaped one of the most memorable eras in sports and American history. At the end of World War II, soldiers returning from overseas hungered to resume their love affair with baseball. Spectators still identified with players, whose salaries and off-season employment as postmen, plumbers, farmers, and insurance salesmen resembled their own. It was a time when kids played baseball on sandlots and in pastures, fans followed the game on the radio, and tickets were affordable. The outstanding play of Joe DiMaggio, Stan Musial, Ted Williams, Bob Feller, Don Newcombe, Warren Spahn, and many others dominated the field. But perhaps no performance was more important than that of Jackie Robinson, whose entrance into the game broke the color barrier, won him the respect of millions of Americans, and helped set the stage for the civil rights movement. Baseball's Pivotal Era, 1945-1951 also records the attempt to organize the Pittsburgh Pirates and the Mexican League's

success in luring players south of the border that led to a series of lawsuits that almost undermined baseball's reserve clause and antitrust exemption. The result was spring training pay, uniform contracts, minimum salary levels, player representation, and a pension plan—the very issues that would divide players and owners almost fifty years later. During these years, the game was led by A.B. Happy Chandler, a hand-shaking, speech-making, singing Kentucky politician. Most owners thought he would be easily manipulated, unlike baseball's first commissioner, the autocratic Judge Kennesaw Mountain Landis. Instead, Chandler's style led one owner to complain that he was the player's commissioner, the fan's commissioner, the press and radio commissioner, everybody's commissioner but the men who pay him.

john famularo latest news: Xinjiang and the Chinese State Debasish Chaudhuri, 2017-08-18
This book focuses on the nature of ethno-national conflicts and impacts of ideological orientation of the Communist Party of China (CPC) towards the national question in the context of Han nationalism and political, economic and security policies towards Xinjiang. Violence in Xinjiang since the mid-1990s is projected as one of the major national security challenges for China, along with issues pertaining to Tibet and Taiwan. The author argues that the post-Mao reformist model may have been a beneficial economic and political innovation, but failed in dealing with regional conflicts and unrests arising out of the demands for independence, freedom, greater autonomy and assertion of democratic and civic rights. The book discusses Chinese nationalism and the construction of Uyghur national identity, consequences of economic modernisation in the region, ethnic conflicts and coercive measures, the security and social stability situation in Xinjiang, intensification of violence in Xinjiang under the new leadership, vision of the 'Chinese dream', key policies and programmes, post-riot fallouts and social contradictions manifest in discourses surrounding development, separatist violence, religious fundamentalism and international terrorism. With its in-depth, accessible and comprehensive analyses, this book will be a valuable addition to scholars and researchers of Chinese studies, politics and international relations, security and strategic studies, sociology, social anthropology and ethnic studies.

john famularo latest news: Wandering Games Melissa Kagen, 2022-10-11 A thought-provoking analysis of wandering within different game worlds, viewed through the lenses of work, colonialism, gender, and death—with examples from *The Last of Us Part II* and others. Wandering in games can be a theme, a formal mode, an aesthetic metaphor, or a player action. It can mean walking, escaping, traversing, meandering, or returning. In this book, game studies scholar Melissa Kagen introduces the concept of “wandering games,” exploring the uses of wandering in a variety of game worlds. She shows how the much-derided *Walking Simulator*—a term that began as an insult, a denigration of games that are less violent, less task-oriented, or less difficult to complete—semi-accidentally tapped into something brilliant: the vast heritage and intellectual history of the concept of walking in fiction, philosophy, pilgrimage, performance, and protest. Kagen examines wandering in a series of games that vary widely in terms of genre, mechanics, themes, player base, studio size, and funding, giving close readings to *Return of the Obra Dinn*, *Eastshade*, *Ritual of the Moon*, *80 Days*, *Heaven's Vault*, *Death Stranding*, and *The Last of Us Part II*. Exploring the connotations of wandering within these different game worlds, she considers how ideologies of work, gender, colonialism, and death inflect the ways we wander through digital spaces. Overlapping and intersecting, each provides a multifaceted lens through which to understand what wandering does, lacks, implies, and offers. Kagen's account will attune game designers, players, and scholars to the myriad possibilities of the wandering ludic body.

john famularo latest news: *Reimagining the Landscape of Religious Education* Zehavit Gross, 2023-03-13 This book brings together new thinking and research on religious education's complex and evolving role in the multicultural, diverse postmodern era. It facilitates new realism and understanding of the current situation from empirical and reflective accounts relating to a variety of countries and political contexts, as well as providing innovative methodological approaches to the study of education and religion. In different contexts around the world, at different levels of education, and from different theoretical lenses, religious education occupies a contested space. The ongoing, changing nature of the world due to increasing secularization, rapid technological change, mass immigration, globalization processes, conflict and challenging security issues, from inter to intra state levels, and with shifting geopolitical power balances, generates the need to reconceptualize where religious education is positioned. It claims that religious education on its own can be an agent of moral, social and spiritual transformation are disputed. There is significant controversy about whether special religious education, that is in-faith education, still has a role within the post-modern world.
