joyce flint: Angels in the Sky: How a Band of Volunteer Airmen Saved the New State of Israel Robert Gandt, 2017-10-03 "Reads like a World War II thriller, only better because every word is true.... One of the great untold stories of history. Robert Gandt has brought it vividly, unforgettably to life." —Steven Pressfield, best-selling author of *Gates of Fire* In 1948, when the newly founded nation of Israel came under siege from a coalition of Arab states, a band of volunteer airmen from the United States, Canada, Britain, France, and South Africa arrived to help. They were a small group, fewer than 150. Many were World War II veterans; most of them knowingly violated their nations' embargoes on the shipment of arms and aircraft to Israel. The airmen risked everything—their careers, citizenship, and lives—to fight for Israel. The saga of the volunteer airmen in Israel's war of independence stands as one of the most stirring—and little-known—war stories of the past century.

joyce flint: The Prisoner King John Matusiak, 2017-09-28 Much has been written about Charles I's reign, about the brutal civil war into which his pursuit of unfettered power plunged the realm, and about the Commonwealth regime that followed his defeat and execution. His reign is one that shaped the future of the British monarchy, and his legacy still remains with us today. The Prisoner King provides an examination of the crucial period encompassing Charles I's captivity after his surrender to the Scots at Newark in May 1646. Not only were the subsequent months before his trial a time when the human dimension of the king's predicament assumed intensity, they were also a critical watershed when the entire nation stood at the most fateful of crossroads. For Charles himself – as subterfuge, espionage and assassination rumours escalated on all fronts, escape attempts foundered, and tensions with his absent wife mounted agonisingly – the test was supreme. Yet, in a painful passage involving both stubborn impenitence and uncommon fortitude in the face of 'barbarous usage' by his captors, the 'Man of Blood' would ultimately come to merit his unique place in history as England's 'martyr king'.

joyce flint: Hopkinton Dale J. Burnett, 2008-05 Hopkinton, NY is a quiet little town in the northeast part of the state, settled by New Englanders and built in the New England style with a village green, white wood frame churches, and large Victorian houses. Life here has generally moved at a leisurely pace; yet Hopkinton's people have had their dramas - both comedy and tragic - and their stories have been remembered. In 1903, Carlton Sanford had a book published documenting the settling of the town from a wilderness in 1802 through its first hundred years of development and tracing the descendants of the first settlers. Now Dale Burnett has written a folk history of the second hundred years, chronicling the events in the lives of Hopkinton's people and the town itself through the 20th century. Mr. Burnett has researched each separate district of the township and spoken with at least one person from each area to get its history from someone who lived there. In addition to the facts one would expect - businesses, history of the fire department, town officers - he has taken almost every house along each road in the town and listed the residents through the years, along with any tales that may have been told about them. Based mainly on interviews with older Hopkinton folk, some of whom were alive when Sanford's book came out, the stories handed down have been preserved as the old people told them. Facts are supported by newspaper articles, deeds and other documents. Included are tales of Hopkinton's characters, its three or four murders, and its one kidnapping case with still unanswered questions. And, following Mr. Sanford's example, at the end of *The Second Hundred Years* are genealogies submitted by Hopkinton families, many of whom can still trace their ancestry to those early settlers.

joyce flint: Jeffrey Dahmer Jacopo Pezzan, Giacomo Brunoro, 2013-06-06 L'hanno

soprannominato “il mostro”, “il cannibale”, ma questi termini possono descrivere soltanto parzialmente le azioni di Jeffrey Dahmer. Dopo il suo arresto, in quella che è stata subito ribattezzata “la casa dell’orrore”, vengono ritrovati quattro busti umani, due teste all’interno del freezer, altre due nel frigorifero, sette teschi e una decina di peni all’interno di una pentola, più una botte piena di ossa e carne umana in dissolvimento. Tra il 1978 e il 1991 Jeffrey Dahmer ha violentato, ucciso, smembrato e in parte mangiato 17 persone. E fino al giorno dell’arresto non c’era nemmeno un’indagine in corso su di lui, nessuno sospettava minimamente che a Milwaukee circolasse indisturbato un assassino seriale. L’epopea del serial killer più bestiale della storia americana è una miscela esplosiva di fatti e sensazioni che turbano nel profondo e che ci pongono di fronte a inquietanti interrogativi: com’è potuto accadere tutto ciò? Dove può arrivare l’abisso della mente umana? Ma, soprattutto, c’era un modo di evitare questa tragedia?

joyce flint: Serial Killer Jacopo Pezzan, Giacomo Brunoro, 2014-05-01 Jack lo Squartatore, Charles Manson, Ted Bundy, Jeffrey Dahmer, Zodiac, Andrej Chikatilo, Gianfranco Stevanin, Ludwig, il Mostro di Firenze. Un libro che racconta, analizza e confronta nove storie agghiaccianti, nove casi che dimostrano come non ci sia limite alla follia della mente umana. Com’è possibile arrivare a compiere azioni tanto bestiali? Quali oscuri fantasmi albergano nell’animo di questi uomini? Ricostruzioni precise, foto, interviste e documenti dell’epoca accompagnano il lettore in un viaggio nell’incubo, per non dimenticare. Il libro contiene anche un’analisi dettagliata dei due più celebri “cold case” della criminologia mondiale, quello dei delitti del Mostro di Firenze e quello di Zodiac, il crudele serial killer californiano.

joyce flint: The Mind of a Murderer Katherine Ramsland, 2011-02-02 This unique history of the last 100 years of criminal psychology shares insights about infamous murderers from the psychiatrists and other trained psychological professionals who analyzed and treated them. The Mind of a Murderer: Privileged Access to the Demons That Drive Extreme Violence presents a series of cases in which a psychiatrist, psychologist, or counselor gained privileged access to a mass or serial murderer, going beyond the typical mental assessment to learn more about criminal behavior. Through their work, readers are granted a unique view of criminology and a better understanding of the criminal mind. The book opens with the earliest professional observations of criminals in the late 19th century and goes on to explore the rudimentary behavioral profiling and case analysis of the early 20th century. It shows how, by the 1960s and 1970s, behavioral professionals recognized the need for intense study of extreme offenders and got close to the likes of Richard Speck, John Wayne Gacy, and Ted Bundy to gain a fuller picture of their psychological development. Finally, readers learn how today's behavioral professionals rely on neurobiological correlates to assess predatory, impulsive, and addictive behavior.

joyce flint: Queer Race Ian Barnard, 2004 One of the first extended and theoretically informed investigations of queer theory's racial inscription, Queer Race understands race as inextricably sexualized, as sexuality is always racially marked. The book critically and playfully explores intellectual and political deployments of the term «queer», gay pornographic videos about South Africa, contemporary literary representations of interracial gay desire, the writings of Gloria Anzaldúa, and Jeffrey Dahmer's criminal trial. Through these explorations, Queer Race charts a framework for understanding the «race» of queer theory that both tests queer theory's limits and suggests its future inter-relations with anti-racist work.

joyce flint: How to Catch a Killer Katherine Ramsland, 2021-07-13 There are two parts to every crime story: how they did it and why they got caught. This book is about the second part, and how it changes the way we catch serial killers. No two stories about the capture of a serial killer are the same. Sometimes, the killers make crucial mistakes; other times, investigators get lucky. And the process of profiling, hunting, and apprehending these predators has changed radically over time, particularly in the field of criminal forensics, which has exploded in the last ten to 15 years. Laser ablation, video spectral analysis, cyber-sleuthing, and even DNA-based genetic genealogy are now crucial tools in solving murders, including the recent capture of the so-called Golden State Killer. This book in the new Profiles in Crime series tells the history of forensics through the “capture

stories” of some of the most notorious serial killers, going back almost a century. The killers include: Rodney Alcala, a serial rapist and murderer sometimes called “Dating Game killer” for his appearance on that TV show. No one knows the exact number of his victims. Takahiro Shiraishi, the suicide killer from Zama, Japan, who dismembered nine victims and stored their bodies in his refrigerator. Aileen Wuornos, one of the rare female serial killers. She shot seven men in Florida and was turned in by an accomplice. Jeffrey Dahmer, the “Milwaukee Cannibal,” and Bobby Joe Long, both identified by survivors Ted Bundy and David Berkowitz (“Son of Sam”), who both made mistakes Ludwig Tesson, who killed several children in Germany, and was caught through new methods in forensic investigation that could distinguish human from animal blood

joyce flint: The Serial Killer Files Paul Simpson, 2017-05-18 There are many myths about serial killers: that they are all dysfunctional loners; all white males; only motivated by sex; that they all travel and operate across a wide area; cannot stop killing; are all insane, or evil geniuses; and that they all want to get caught. Of course, there are some serial killers who fit into these categories, but the married Green River Killer was not a dysfunctional loner; there are plenty of female and non-Caucasian serial killers; Dr Harold Shipman was certainly not motivated by sex; many serial killings (such as the Ipswich prostitute murders carried out by Steve Wright) happen within a confined area; the 'BTK Killer', Dennis Rader, stopped killing in 1991, but wasn't caught until fourteen years later. Many serial killers may have a low animal cunning, or be 'street smart', but few of them are Mensa-level geniuses. Each of the thirty cases covered here is unusual in some respect, perhaps in the way in which the killer carried out their crimes, the choice of victims, the way in which they were apprehended, or the method of their execution. The cases are presented alphabetically by country - from Australia via Colombia, Great Britain, Indonesia, Iran, South Africa and elsewhere to the United States - and then chronologically. They come from across history and from all over the world. The author has gone back as far as possible to contemporary source material - newspaper accounts, trial evidence, interviews with perpetrators or survivors - rather than rely on the increasingly blurred truth to be found online and in far too many collections.
