HIS APPROACH COMBINED HANDS-ON INTERVENTION, COMMUNITY INVOLVEMENT, AND SCIENTIFIC RESEARCH, CREATING A HOLISTIC MODEL FOR CONSERVATION THAT

ADDRESSED BOTH THE ANIMALS' AND LOCAL PEOPLE'S NEEDS.

CHALLENGES FACING ELEPHANTS

ELEPHANTS FACE NUMEROUS CHALLENGES ACROSS AFRICA AND ASIA, INCLUDING ILLEGAL IVORY TRADE, SHRINKING NATURAL HABITATS, AND INCREASING ENCOUNTERS WITH HUMAN SETTLEMENTS. Lawrence Anthony's South African game reserve is home to many animals he has saved, from a remarkable herd of elephants to a badly behaved bushbaby called George. Described as the Indiana Jones of conservation, when one of his rhinos was brutally slaughtered for her horn, he didn't hesitate to lead an armed response against the poachers. lawrence anthony elephants: *Thirty-Three Ways of Looking at an Elephant* Dale Peterson, 2020-10-20 Elephants have captivated the human imagination for as long as they have roamed the earth, appearing in writings and cultures from thousands of years ago and still much discussed today. In *Thirty-Three Ways of Looking at an Elephant*, veteran scientific writer Dale Peterson has collected thirty-three essential writings about elephants from across history, with geographical perspectives ranging from Africa and Southeast Asia to Europe and the United States. An introductory headnote for each selection provides additional context and insights from Peterson's substantial knowledge of elephants and natural history. The first section of the anthology, "Cultural and Classical Elephants," explores the earliest mentions of elephants in African mythology, Hindu theology, and Aristotle and other ancient Greek texts. "Colonial and Industrial Elephants" finds elephants in the crosshairs of colonial exploitation in accounts pulled from memoirs commoditizing African elephants as a source of ivory, novel targets for bloodsport, and occasional export for circuses and zoos. "Working and Performing Elephants" gives firsthand accounts of the often cruel training methods and treatment inflicted on elephants to achieve submission and obedience. As elephants became an object of scientific curiosity in the mid-twentieth century, wildlife biologists explored elephant families and kinship, behaviors around sex and love, language and self-awareness, and enhanced communications with sound and smell. The pieces featured in "Scientific and Social Elephants" give readers a glimpse into major discoveries in elephant behaviors. "Endangered Elephants" points to the future of the elephant, whose numbers continue to be ravaged by ivory poachers. Peterson concludes with a section on fictional and literary elephants and ends on a hopeful note with the 1967 essay "Dear Elephant, Sir," which argues for the moral imperative to save elephants as an act of redemption for their systematic abuse and mistreatment at human hands. Essential to understanding the history and experience of this beloved and misunderstood creature, *Thirty-Three Ways of Looking at an Elephant* is a must for any elephant lover or armchair environmentalist.

lawrence anthony elephants: *Rewilding Africa* Grant Fowlds, Graham Spence, 2022-05-05 Conservationist Grant Fowlds lives to save and protect Africa's rhinos, elephants and other iconic wildlife, to preserve their habitats, to increase their range and bring back the animals where they have been decimated by decades of war, as in Angola, Mozambique and the Democratic Republic of the Congo. This vivid account of his work tells of a fellow conservationist tragically killed by the elephants he was seeking to save and a face-off with poachers, impoverished rural people exploited by rapacious local businessmen. Fowlds describes the impact of the Covid pandemic on conservation efforts, the vital wildlife tourism that sustains these and rural communities; and tells of conservationists' efforts to support people through the crisis. Lockdowns may have brought a welcome lull in rhino and other poaching, but also brought precious tourism to a standstill. He shows how the pandemic has highlighted the danger to the world of the illicit trade in endangered wildlife, some of it sold in 'wet markets', where pathogens incubate and spread. He describes a restoration project of apartheid-era, ex-South African soldiers seeking to make reparations in Angola, engulfed for many years in a profoundly damaging civil war, which drew in outside forces, from Cuba, Russia and South Africa, with a catastrophic impact on that country's wildlife. Those who fund conservation, whether in the US, Zambia or South Africa itself, are of vital importance to efforts to conserve and rewild: some supposed angel-investors turn out to be not what they had appeared, some are thwarted in their efforts, but others are open-hearted and generous in the extreme, which makes their sudden, unexpected death an even greater tragedy. A passionate desire to conserve nature has also brought conservationists previously active in far-off Venezuela to southern Africa. Fowlds describes fraught meetings to negotiate the coexistence of wildlife and rural communities. There are vivid accounts of the skilled and dangerous work of using helicopters to keep wildebeest, carrying disease, and cattle apart, and to keep elephants from damaging communal land and eating crops such as sugar cane. He tells of a project to restore Africa's previously vast herds of elephants, particularly the famed 'tuskers', with their unusually large tusks, once prized and hunted almost to extinction. The range expansion that this entails is key to enabling Africa's iconic wildlife to survive, to preserving its wilderness and, in turn, helping humankind to survive. There is a heartening look at conservation efforts in Mozambique, a country scarred by years of war, which are starting to bear fruit, though just as a new ISIS insurgency creates havoc in the north of the country. What will humanity's relationship with nature be post-pandemic? Will we have begun to learn that by conserving iconic wildlife and their habitats we help to preserve and restore precious pockets of wilderness, which are so vital not only the survival of wildlife, but to our own survival on our one precious planet.

lawrence anthony elephants: *Saving the Last Rhinos* Grant Fowlds, Graham Spence, 2020-05-05 The remarkable story of Grant Fowlds, who has dedicated his life to saving the imperiled rhinos, vividly told with Graham Spence, co-author of the bestselling *The Elephant Whisperer*. What would drive a man to 'smuggle' rhino horn back into Africa at great risk to himself? This is just one of the situations Fowlds has put himself in as part of his ongoing fight against poaching, in order to prove a link between southern Africa and the illicit, lucrative trade in rhino horn in Vietnam.

Shavings of rhino horn are sold as a snake-oil “cures,” but a rhino’s horn has no magical, medicinal properties whatsoever. Yet it is for this that rhinoceroses are being killed at an escalating rate that puts the survival of the species in jeopardy. This corrupt, illegal war on wildlife has brought an iconic animal to the brink of extinction. Growing up on a farm in the eastern Cape of South Africa, Grant developed a deep love of nature, turning his back on hunting to focus on saving wildlife of all kinds and the environment that sustains both them and us. He is a passionate conservationist who puts himself on the front line of protecting rhinos in the wild—right now, against armed poachers—and in the long term, through his work with schoolchildren, communities, and policymakers.
