laws of human nature review: *7 Laws of Human Nature* Conrad Spainhower, 2017-04-27 The Physics of Love Our goal in life should be to attain Enlightenment but at the same time we should never make Enlightenment our goal. It is through acts of love that we attain Enlightenment, it comes as a reward for living a life of love. It is through understanding love and demonstrations of love that brings Enlightenment, just as planting a seed and giving it sunlight and water brings forth flowers. This is the science of love and its just as exacting as any other science. The 7 Laws of Human Nature is a philosophy of life explaining how love works through laws, hypotheses and logic to reach a Theory of the Oneness of Universal Love. This philosophy gives an understanding of where we are going and the process of how we get there.

laws of human nature review: The laws of Human nature Unity of Universal love , 2023-12-22 Introduction A life of Healing, a life of Health, A life worth living is a life of Wealth. I have practiced over 25 years as a chiropractor and I have learned that most people come to me to

treat their pain. I'm sure that most doctors and therapists have the same experience, people want to receive a treatment that will cure their illness. As I treat my patients I'm also analyzing how their problem was created. I'm looking at various factors like diet, lack of exercise, injurious repetitive movements or anything else that could provoke the problem. I'm trying to get the patient to take responsibility for their problem and help me with their treatment. It appears that I'm treating their physical illness but over the years I have come to a new realization, that a person's emotional, mental and spiritual side can also affect their health. The reality of the situation is that we can't separate an illness into a physical, emotional, mental or spiritual ailment, because everything works together. I now understand that attitudes play an essential role in our health and wellbeing. Attitudes have characteristics that are physical, emotional, mental and spiritual. In psychology attitudes are labeled as behavioral (physical), affective (emotional) and cognitive (mental). In this book attitudes have a spiritual side as well, attitudes will have a positive spiritual value or a negative spiritual value. Attitudes that bring people together and unite them has an energy with a positive spiritual value and attitudes that are divisive and cause separation has a negative value. If we have attitudes with a negative spiritual energy then they will cause illness; physical illness, mental illness and emotional illness. We need to adopt attitudes with a positive spiritual energy if we want to stay healthy and grow spiritually. Spiritual growth is there for all of us but we have to make the effort, no one can make us grow spiritually. Looking for someone to cure our ills is a short-term proposition, the long term cure is when we discover what is causing us harm and create a healthy lifestyle. The 7 Laws of Human Nature is a scientific philosophical study into the human consciousness, the 7 chakras and the human aura. We use theories to make sense about what we are observing in life, to explain ideas and interpret facts. The 1st chapter is the Theory of the Oneness of Universal Love, which will present 7 hypotheses. These hypotheses will present facts and suppositions of facts, which will be followed up by a theory. This is all happening on four energy levels; physical, emotional, mental and spiritual. Life on Earth has to have a reason, our lives aren't an accident and this book presents a logical theory on the how and why of life. This is a book on love and how love works in our lives. laws of human nature review: *The Politics of Human Nature* Thomas Fleming, 1988-01-01 The effort to understand human nature in a political context is a daunting challenge that has been undertaken in a variety of ways and by a myriad of disciplines through the ages. From Plato to Hobbes and Burke, to Wallas and Oakeschott in our era, efforts have been made to provide some organic framework for the political study of mankind. What has added greatly to the complexity of the task is the increasing denial, even rejection, in the positivist and behaviorist traditions, of the very notion of a human nature. The work can be described as a series of interlocking propositions: the proverbial view of human nature can be explained by evolutionary theory. Biological differences between men and women are responsible for family, community and group life. Social evolution goes through stages which are recapitulated in the moral life of individuals. A well-defined federal system mirrors human development. And finally, for Fleming, most problems in social and political life stem from violations of this federalist system. Fleming's volume takes up a variety of issues: sex and gender differences, democracy and dictatorship, individual and familial patterns of association. He does so in the context of showing how forms of legitimate authority such as families, communities and nations establish such authority by appeals to human nature, and that these appeals, while presumably resting on empirical evidence, also confirm the existence of normative structures. Fleming's work is an effort of synthesis that is sure to arouse discussion and debate. It represents a serious addition to a literature retrieved from the historical dustbins to which it has been repeatedly consigned.
