Overview of Nietzsche's Philosophy

Friedrich Nietzsche's philosophy is foundational to modern thought, challenging traditional morality, metaphysics, and epistemology. Nietzsche's critique of religion, morality, and the concept of truth reshaped philosophical discourse. Central to his philosophy are ideas such as the will to power, the death of God, eternal recurrence, and the revaluation of values. Nietzsche questioned the objective basis of morals and emphasized the creative power of individuals to assert their existence and values. His work laid the groundwork for existentialist and postmodernist thought, influencing a broad range of disciplines beyond philosophy. Understanding Nietzsche's philosophy is essential for grasping how Deleuze engages with and reinterprets these ideas.

Will to Power

The will to power is a pivotal Nietzschean concept denoting an intrinsic drive within all living beings to assert and enhance their power and influence. Unlike traditional views of power as mere domination, Nietzsche's will to power encompasses creativity, growth, and self-overcoming. This concept is not a

fixed entity but a dynamic force shaping life and values. It challenges passive acceptance and promotes active engagement with existence.

Eternal Recurrence

Eternal recurrence is Nietzsche's metaphysical hypothesis that life infinitely repeats itself in the same form. This idea serves as a test of one's affirmation of life; embracing eternal recurrence means embracing life's joys and sufferings alike. It functions as a radical affirmation of existence and a rejection of nihilism, urging individuals to live authentically and fully.

Gilles Deleuze's Interpretation of Nietzsche

Gilles Deleuze, a prominent 20th-century French philosopher, offers a unique and influential interpretation of Nietzsche's work. In his book "Nietzsche and Philosophy," Deleuze presents Nietzsche as a philosopher of difference, becoming, and creativity rather than a mere critic of metaphysics. Deleuze emphasizes Nietzsche's break with traditional dialectics and his affirmation of life through the concept of difference and repetition. Deleuze's reading highlights the productive and transformative aspects of Nietzschean thought, especially regarding the will to power and eternal recurrence.

Difference and Repetition

Deleuze reinterprets Nietzsche's eternal recurrence not as the repetition of the identical but as the repetition of difference. This reading counters traditional metaphysical ideas that focus on static being or identity. For Deleuze, eternal recurrence signifies the creative unfolding of difference and variation, emphasizing becoming over being.

Will to Power as Creative Force

Deleuze aligns the will to power with creativity and multiplicity. Rather than a mere struggle for dominance, Deleuze's will to power is a force of continuous creation and transformation. It underpins the dynamic processes of life and thought, breaking away from hierarchical or static conceptions of power.

nietzsche and philosophy deleuze reddit: Deleuze and the Passions Ceciél Meiborg (Ed.), Sjoerd van Tuinen, 2016 In recent years the humanities, social sciences and neuroscience have witnessed an 'affective turn, ' especially in discourses around post-Fordist labor, economic and ecological crises, populism and identity politics, mental health, and political struggle. This new awareness would be unthinkable without the pioneering work of Gilles Deleuze, who replaced

judgment with affect as the very material movement of thought: every concept is an affective experience, a becoming. Besides entirely active affects, the highest practice of thought, there is no thought without passive affects or passions. Instead of a calm and rational philosophy of passions, Deleuzian thought is therefore inseparable from isolated and passionate cries that deny what everybody knows and what nobody can deny: every true thought is an aggression. This inseparability of reason and passion is by no means an anti-intellectualist or irrationalist stance. Rather, it is critical, since it protects reason from its self-imposed stupidity (*bêtise*) by relating it to the unthought forces that condition it. And it is clinical, because thought becomes possessed by a power of selection. The purely active, i.e. free-floating, unrecorded desire, is never enough to produce a consistent relation to the future, which is why we need the passions to give us an initial orientation, to force and enable us to think. Passions are the beliefs, perceptions, representations, and opinions that attach us to the world; they make up the very material of which our lives and thoughts are composed. Instead of truth as the ultimate criterion of judgment, the only principle according to which affective becomings can be selected and evaluated is the extent to which they proliferate joy. Spinoza and Marx show how the recruitment of desire traditionally takes place through the tyrants and priests who inspire sad passions in us. Similarly, the work of Deleuze and Guattari on capitalism and schizophrenia can be read as an encyclopedia of the passions that constitute the affective infrastructure of the *socius* of contemporary capitalism. If it takes a lot of inventiveness or imagination to be able to diagnose our present becomings, this is because becomings are always composites of joyful and sad passions. Capitalism could not exist if it did not also inspire happiness, love, courage, and perhaps even beatitude. That is why, today, we witness the spectacle of the happily dominated (Frédéric Lordon) of the self-entrepreneur, the managerial class, the flex worker, the citizen-consumer, the bean-roasting hipster, and the self-managed team. It is within this field of contradictory and heterogeneous passions that the authors of this volume pursue the diagnosis of our past and present becomings. Their contributions add up to a systematic taxonomy of the passions and indicate their importance for a thinking that reaches beyond itself.

nietzsche and philosophy deleuze reddit: On Affirmation and Becoming Paolo A. Bolaños, 2014-11-10 This book re-explores Friedrich Nietzsches critique of nihilism through the lenses of Gilles Deleuze. A Deleuzian reading of Nietzsche is motivated by a post-deconstructive style of interpretation, inasmuch as Deleuze goes beyond, or in between, hermeneutics and deconstruction. The book is not about Deleuzes reading per se; rather, it is an appraisal of Nietzsches critique of nihilism using Deleuzes experimental reading. As such, the book is an experiment in itself, as it shows how to partly gloss Nietzsches critique of nihilism through Deleuzian phraseology.

nietzsche and philosophy deleuze reddit: Difference and Repetition Gilles Deleuze, Paul Patton, 2004-11-12  Since its publication in 1968, *Difference and Repetition*, an exposition of the critique of identity, has come to be considered a contemporary classic in philosophy and one of Deleuze's most important works. The text follows the development of two central concepts, those of pure difference and complex repetition. It shows how the two concepts are related, difference implying divergence and

decentring, repetition being associated with displacement and disguising. The work moves deftly between Hegel, Kierkegaard, Freud, Althusser and Nietzsche to establish a fundamental critique of Western metaphysics, and has been a central text in initiating the shift in French thought - away from Hegel and Marx, towards Nietzsche and Freud.

nietzsche and philosophy deleuze reddit: Gilles Deleuze Todd May, 2005-01-10 This book offers a readable and compelling introduction to the work of one of the twentieth century's most important and elusive thinkers. Other books have tried to explain Deleuze in general terms. Todd May organizes his book around a central question at the heart of Deleuze's philosophy: how might we live? The author then goes on to explain how Deleuze offers a view of the cosmos as a living thing that provides ways of conducting our lives that we may not have dreamed of. Through this approach the full range of Deleuze's philosophy is covered. Offering a lucid account of a highly technical philosophy, Todd May's introduction will be widely read amongst those in philosophy, political science, cultural studies and French studies.

nietzsche and philosophy deleuze reddit: Deleuze and the Three Syntheses of Time Keith W. Faulkner, 2006 In the most important theory of time since Heidegger, Deleuze challenges Kant's unity of apperception, as well as the phenomenological account of time. This book, using the principles of structuralism, exposes how Freud's unconscious mechanisms synthesize time. It also gives a vibrant and original account of Deleuze's theory of the pure Event using detailed examples from Hamlet and Oedipus, as well as Nietzsche's doctrine of the eternal return. This book is essential reading for students and scholars who wish to understand Deleuze's dissolved subject as well as our modern sense of fragmented time.

nietzsche and philosophy deleuze reddit: Nietzsche and the Problem of Subjectivity João Constâncio, Maria João Mayer Branco, Bartholomew Ryan, 2015-10-16 Nietzsche's critique of the modern subject is often presented as a radical break with modern philosophy and associated with the so-called 'death of the subject' in 20th century philosophy. But Nietzsche claimed to be a 'psychologist' who was trying to open up the path for 'new versions and sophistications of the soul hypothesis.' Although there is no doubt that Nietzsche gave expression to a fundamental crisis of the modern conception of subjectivity (both from a theoretical and from a practical-existential perspective), it is open to debate whether he wanted to abandon the very idea of subjectivity or only to pose the problem of subjectivity in new terms. The volume includes 26 articles by top Nietzsche scholars. The chapters in Part I, "Tradition and Context", deal with the relationship between Nietzsche's views on subjectivity and modern philosophy, as well as with the late 19th century context in which his thought emerged; Part II, "The Crisis of the Subject", examines the impact of Nietzsche's critique of the subject on 20th century philosophy, from Freud to Heidegger to Dennett, but also in such authors as Deleuze, Foucault, Derrida, or Luhmann; Part III, "Current Debates - From Embodiment and Consciousness to Agency", shows that the way in which Nietzsche engaged
