online interactive history: Bring History and Civics to Life Karalee Wong Nakatsuka, Laurel Aguilar-Kirchhoff, 2022-09-13 This user-friendly guide will empower and eguip teachers to take a fun, interactive approach to using technology to teach history and civics. For years, history and civics have been put on the back burner as schools focus on subjects like math, science and English language arts. Although all U.S. states have standards for the teaching of history, there's a lack of consistency when it comes to teaching civics. Today, we see evidence of declining levels of civic engagement, which is sadly reinforced as our educational institutions fail to prioritize history and civics education, while at the same time they often blame students for their lack of knowledge. Amid this backdrop, how can educators better prepare their students to become engaged, informed and empathetic citizens? One way is by harnessing the power of digital learning to make history come alive for students, establishing a climate and culture that encourages students to be effective collaborators and lifelong learners who care about and contribute to society. With this book, two dynamic, award-winning educators draw clear connections between history, civics, community - and technology - in meaningful and actionable ways to deepen students' understanding of democratic processes and civic engagement.
