online contract law course: Vanishing Contract Law Catherine Mitchell, 2022-09-01 English contract law provides the invisible framework that underpins and enables much contracting activity in society, yet the role of the law in policing many of our contracts now approaches vanishing point. The methods by which contracts come into existence, and notionally create binding obligations, have transformed over the past forty years. Consumers now enter into contracts through remote and automated processes on standard terms over which they have little control. This book explores the substantive weakening of the institution of contract law in a society heavily dependent on contracts. It considers significant areas of contracting activity that affect many people, but that escape serious

and sustained legal scrutiny. An accessibly written and succinct account of contract law's past, present and future, it assesses the implications of a diminished contract law, and the possibilities, if any, for its revival.

online contract law course: Contract Law in South Africa Louis F. van Huyssteen, Catherine J. Maxwell, 2017-07-20 Derived from the renowned multi-volume *International Encyclopaedia of Laws*, this practical analysis of the law of contracts in South Africa covers every aspect of the subject - definition and classification of contracts, contractual liability, relation to the law of property, good faith, burden of proof, defects, penalty clauses, arbitration clauses, remedies in case of non-performance, damages, power of attorney, and much more. Lawyers who handle transnational contracts will appreciate the explanation of fundamental differences in terminology, application, and procedure from one legal system to another, as well as the international aspects of contract law. Throughout the book, the treatment emphasizes drafting considerations. An introduction in which contracts are defined and contrasted to torts, quasi-contracts, and property is followed by a discussion of the concepts of 'consideration' or 'cause' and other underlying principles of the formation of contract. Subsequent chapters cover the doctrines of 'relative effect', termination of contract, and remedies for non-performance. The second part of the book, recognizing the need to categorize an agreement as a specific contract in order to determine the rules which apply to it, describes the nature of agency, sale, lease, building contracts, and other types of contract. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in South Africa will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative contract law.
